## SECONDARY EDUCATION

PREPARED BY

CHARLES F. WHEELOCK

*Assistant Commissioner for Secondary Education*

During the school year 1915-16, there were in active operation in The University of the State of New York 746 public secondary schools and 195 academies, a total of 941 institutions of secondary education. In these schools, 8033 teachers gave instruction to 196,824 pupils. As compared with the preceding year there has been an increase of 9 institutions, 488 teachers and 19,027 pupils.

**Charters.** From January 1, 1915 to July 31, 1916, the Regents incorporated, amended the charters or changed the name of the following institutions. The title of the institution, the character of the charter, the location of the institution, and its object are given alphabetically with the date of incorporation.

Heathcote School, Harrison, charter made absolute, June 24, 1915.

Lake Placid School, charter made absolute, June 24, 1915.

Loyola School, New York, charter made absolute, December 2, 1915.

Mary Immaculate School of Eagle Park, provisionally, five years as an academic and elementary boarding day school, September 16, 1915.

(The) Misses Masters School, charter amended *in re* trustees, June 24, 1915.

Music School Settlement for Colored People, charter made absolute, December 2, 1915.

New York Business Institute, charter revoked, June 24, 1915.

Polytechnic Preparatory and Country Day School, Brooklyn, provisionally, five years, as an academy with an elementary department, July 1, 1916.

**Admissions.** The following schools have been admitted during the year as junior (J); middle (M); senior (S); academic (H); or have been dropped from the University roll.

Between January 1, 1915 and July 31, 1916, the following secondary schools were admitted to the University:

Academy of Our Lady of Lourdes (J), New York, July 1, 1916.

Beacon High School (H), April 27, 1916.

Brier Hill Union School (J), February 24, 1916.

Clark Mills Union School (J), September 16, 1915.

Chappaqua Mountain Institute (H), Valhalla, June 24, 1915.

Eastwood Union School (J), February 24, 1916.

Excelsior Union School (J), Schenectady, September 16, 1915.

Hebrew Sheltering Guardian Society High School (H), Pleasantville, June 24, 1915.

Helena Union School (J), December 2, 1915.  
 King Ferry Union School (J), February 24, 1916.  
 Kingston High School (H), February 24, 1916.  
 McDonough Union School (J), June 24, 1916.  
 Marymount Secondary School (H), Tarrytown, April 16, 1915.  
 Maryland Union School (J), July 1, 1916.  
 New Utrecht High School (H), Brooklyn, February 24, 1916.  
 Newfane Union School (J), February 24, 1916.  
 Piercefield Union School (J), February 24, 1916.  
 South Park High School (H), Buffalo, June 24, 1915.  
 St Peters Academy (H), Plattsburg, July 1, 1916.  
 St Rose School (J), Lima, February 24, 1915.  
 Westford Union School (J), July 1, 1916.

The following named schools were dropped from the University roll:

Bayville Union School, May 25, 1916  
 Doyle High School, September 16, 1917.  
 Fishkill Union School, April 27, 1916.  
 Fishkill-on-Hudson and Matteawan High Schools combined in the Beacon High School, April 27, 1916.  
 Rye Seminary, February 24, 1916.  
 Ulster Free Academy and Kingston Free Academy combined in the Kingston High School.

### Registration.

St Joseph's Commercial School as a business school, April 16, 1915.  
 Anderson School of Music, Peekskill, as a secondary school of music, June 24, 1915.  
 Barnard School for Boys as a high school, June 24, 1915.  
 Barnard School for Girls as a high school, June 24, 1915.  
 Eastman-Gaines School, New York, as a business school, July 27, 1915.  
 Groff School, name of registration changed to Clark School, February 24, 1916.  
 Mackenzie School, Monroe, as a high school, June 24, 1915.  
 (The) Misses Masters School, Dobbs Ferry, as a high school, June 24, 1915.

**Gradings.** The following secondary schools were changed in grade during the year:

Academy of Our Lady of the Blessed Sacrament, Stapleton, J to M, July 1, 1916.  
 Ardsley Union School from J to S, June 24, 1915.  
 Bloomingburg Union School from J to M, February 24, 1916.  
 Bolton Union School from M to S, June 24, 1915.  
 Briarcliff Union School from M to S, June 24, 1915.  
 Bridgewater Union School from M to S, April 16, 1915.  
 Callicoon Union School from S to H, April 27, 1916.  
 Centreville Station Union School from M to S, April 16, 1915.  
 Chestertown Union School from M to S, March 4, 1915; to H, February 24, 1916.

Congers Union School from M to H, April 16, 1915.  
 Croton-on-Hudson Union School from S to H, May 25, 1916.  
 Chaumont Union School from S to H, April 16, 1915.  
 Davenport Union School from J to M, February 24, 1916.  
 Eastport Union School from J to S, February 24, 1916.  
 Edwards Union School from S to H, June 24, 1915.  
 Farmingdale Union School from J to M, May 25, 1916.  
 Genoa Union School from J to M, February 24, 1916.  
 Georgetown Union School from S to H, June 24, 1915.  
 Good Ground Union School from J to M, June 24, 1915.  
 Hemlock Union School from J to M, May 25, 1916.  
 Hicksville Union School from S to H, April 16, 1915.  
 Kendall Union School from S to H, February 24, 1916.  
 Kenwood Union School from J to S, February 24, 1916.  
 Lodi Union School from J to M, February 24, 1916.  
 Meridian Union School from S to H, February 24, 1916.  
 Minoa Union School from M to H, March 4, 1915.  
 North Rose Union School from M to S, June 24, 1915.  
 Pelham Union School from S to H, March 4, 1915.  
 Peru Union School from J to M, June 24, 1915.  
 Philmont Union School from M to H, September 16, 1915.  
 Redwood Union School from S to H, February 24, 1916.  
 St Francis DeSales School, Geneva, from M to H, September 16, 1915.  
 St Ann's Academic School, Albany, from M to H, June 24, 1915.  
 St Augustine's Academic School, Brooklyn, from S to H, April 27, 1916.  
 Sauquoit Union School from S to H, April 16, 1915.  
 Setauket Union School from M to S, September 16, 1915.  
 Smithtown Branch Union School from S to H, February 24, 1916.  
 West Seneca Union School from J to S, February 24, 1916.

**The Academic Syllabus.** The changes in physical science are principally in the direction of a simplification of the work through the omission of quantitative problems.

Committees have been at work on careful revision of the syllabuses in English, Latin and in modern languages, but the results of such deliberations will appear in a later report.

#### ATTENDANCE

A study of the tables will show that there were in attendance in the academies 17,377 and in the high schools 175,986, a gain of 1698 in the academies and 17,348 in the high schools, a total gain of 19,046, or nearly 11 per cent. Distributed by grades, the gains were as follows:

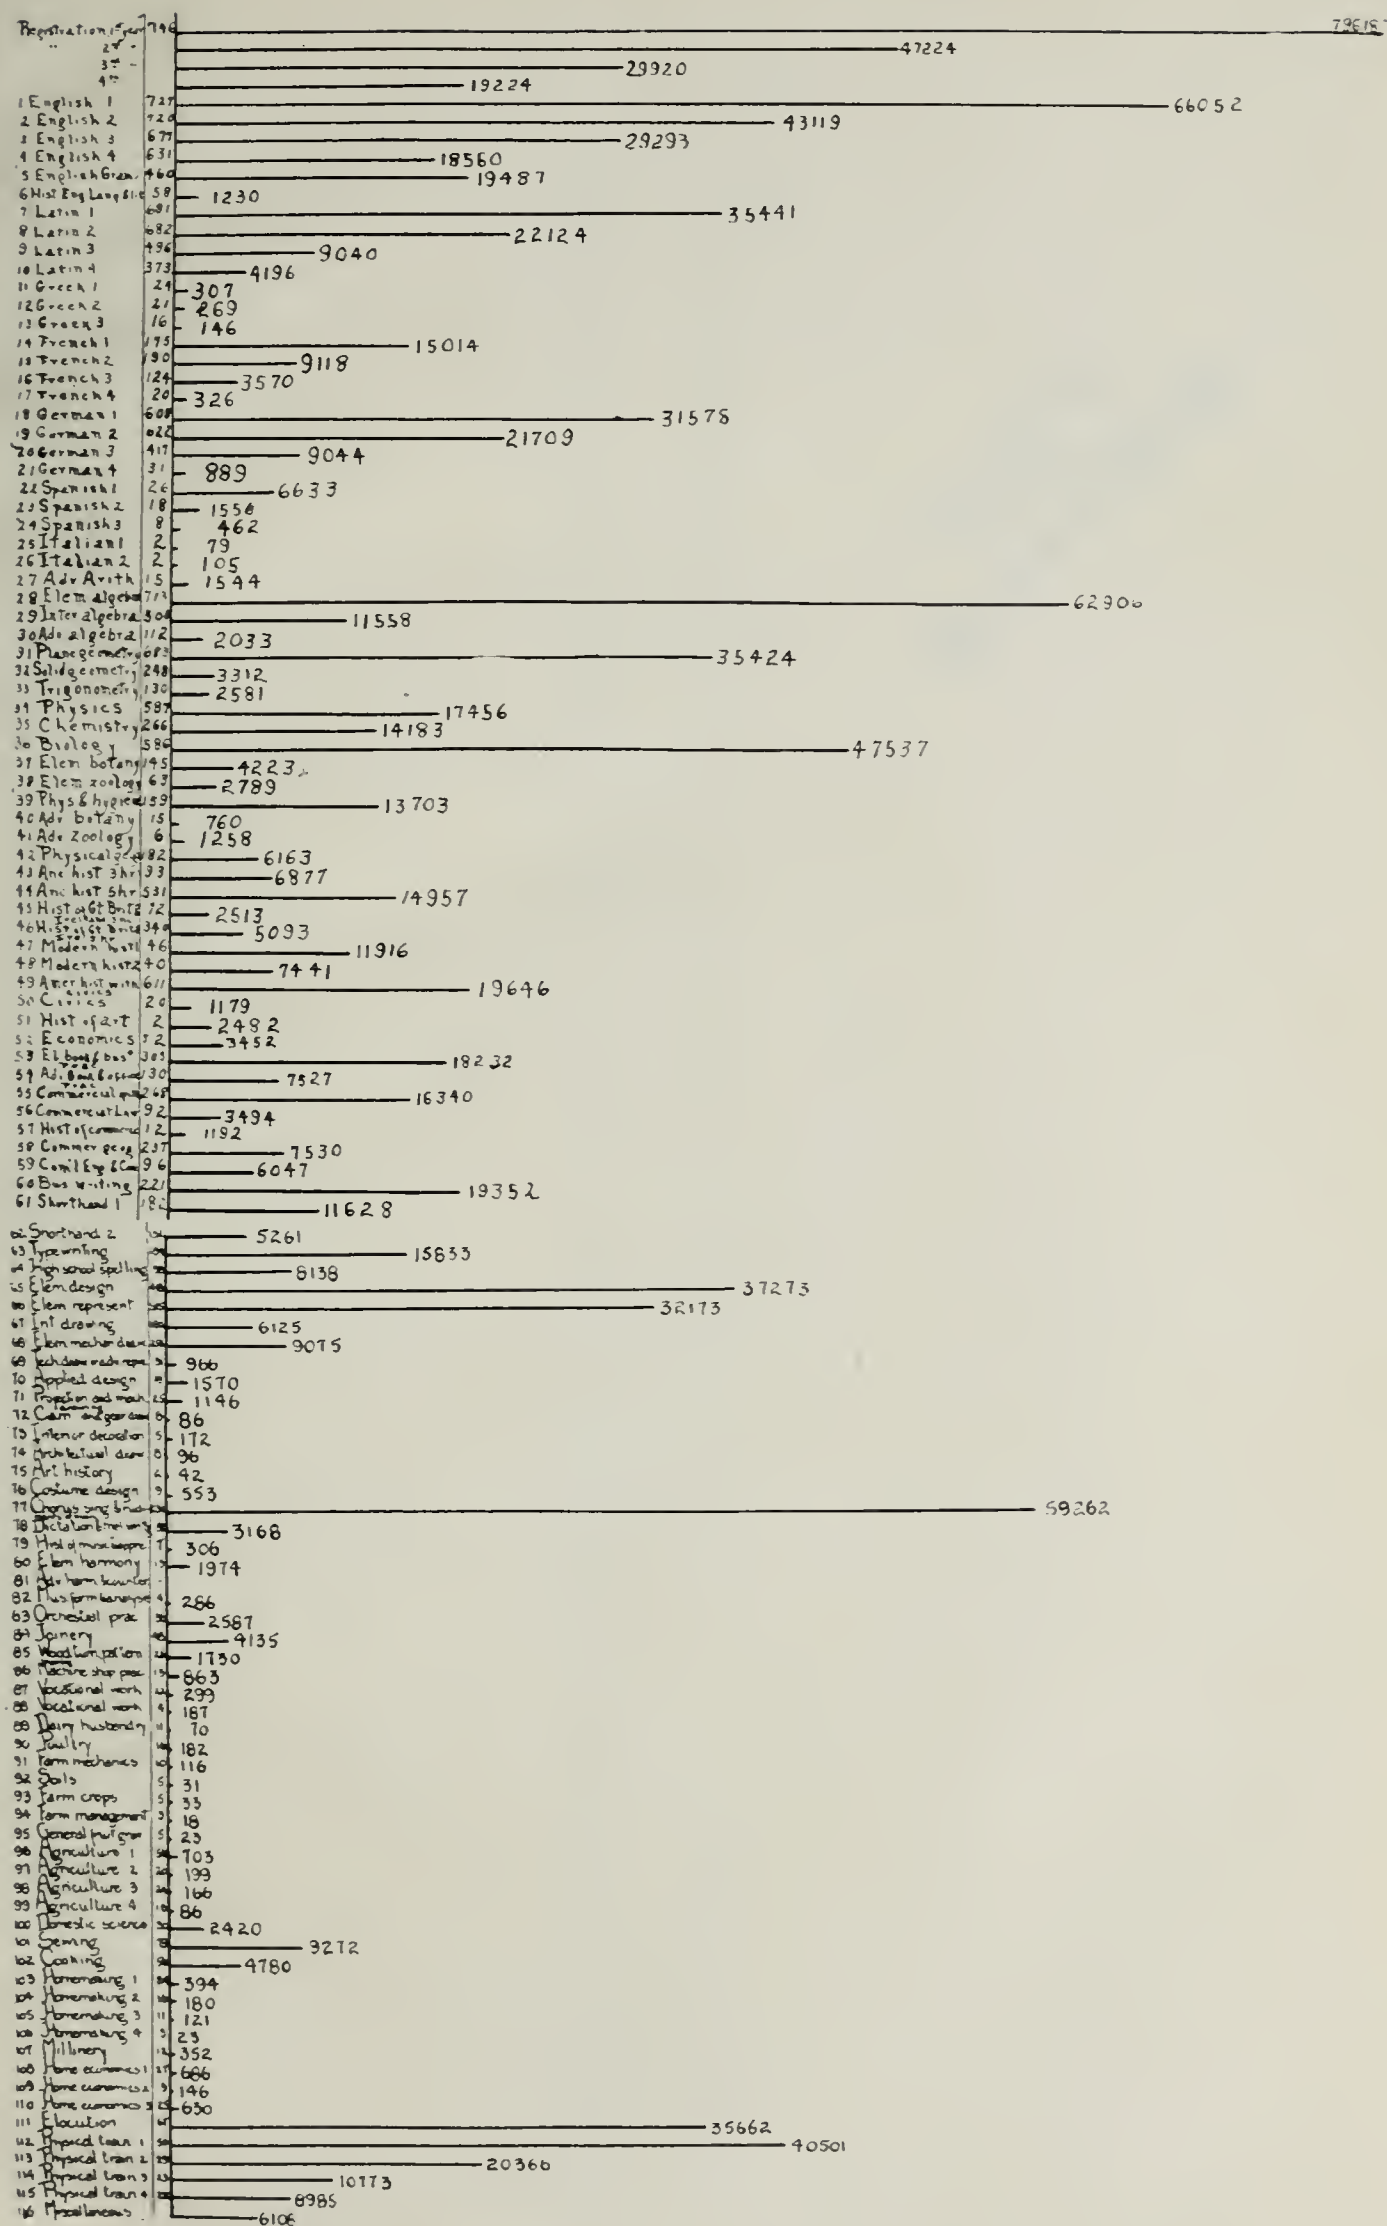

First year .....	8 725
Second year .....	5 437
Third year .....	2 784
Fourth year .....	2 089

In the table beginning on page 580 there is shown in detail the important facts concerning each one of these secondary schools and its activities for the year 1915-16. This table is essentially the report on secondary education. In the table will be found under the name of each school the grade of the school, the number of teachers employed, the number of pupils instructed in each of the four classes, the number graduated, the extent to which the graduates entered higher institutions, the extent and value of the equipment and the number of pupils registered in each of the subjects of instruction offered during the year.

Herewith is given a graphic summary of registration by subjects from which several important facts are apparent. It will be seen at once that 35.92 per cent of all the energies of the secondary schools of the State is devoted to linguistic study, that is, English and foreign languages. English naturally and properly occupies a larger share of attention than any other subject, the registration in all English branches being 237,428, or 19.8 per cent of the total registration in classes. The registration in all Latin classes is 81,437, or 6.8 per cent, an increase of 2690 over the preceding year, and in Greek the total registration is 2364, or .11 per cent, an increase of 138 over the preceding school year. Compared with the total number of pupils registered, the registration in Greek is 1.22 per cent while last year it was 1.27 per cent, or a decrease of 5/100 per cent.

A very interesting fact made evident by this diagram is the relatively small proportion of pupils in the high schools and academies who are taking industrial or vocational subjects outside of commercial subjects. The registration in commercial subjects is 121,644, which is larger than that in science, but slightly less than that in mathematics. In all the other industrial and vocational subjects combined, including domestic science and agriculture, shopwork etc., the total registration is 32,607, a little more than one-third the number taking Latin and slightly less than the number taking French. Apparently the high school pupils of New York State have not yet been made to see that it is profitable for them to devote their high school years to subjects of this character. It is especially interesting to note that in all the high schools and academies combined, only 1890 pupils were registered for agricultural courses, although agricultural courses may be accredited toward graduation from these schools. On the other hand, a very decided increase is shown in the number taking commercial

subjects, the total registration of which is this year 121,644 as compared with 99,563 last year.

The number of deductions and comparisons that may be made by a careful study of this table is unlimited. It is hoped that it may be fruitful.

On later pages are given graphic representations of the totals of the tables for academies and public high schools respectively. In these graphic representations the number of pupils registered for the study of each individual subject is shown in comparison with other subjects; and also the number of schools giving instruction in each subject.

#### CERTIFICATION OF HIGH SCHOOL TEACHERS

It is universally conceded that a good teacher is the one essential factor of a good school. Good buildings, a well-selected library and sufficient apparatus are all desirable, but given the right sort of teacher, results of deficiencies in any of these particulars will be minimized or entirely eliminated.

In the 1913 report as well as in the 1914 report, it was suggested that an initial step in this direction should be taken by issuing certificates of proficiency by departments to high school teachers, which certificates would not be required licenses, but simply testimonials of efficiency issued on satisfactory evidence. It was then and is now our belief that the adoption of this plan would immediately tend to better preparation of teachers in the special fields in which they are engaged.

Reference has been made in previous reports to our experience with the approval of modern language teachers for oral work. Such approval is not required of any teacher by this Department, but it has now become almost a requirement because employers will not enter into contracts with teachers who do not possess this certificate of approval. The plan for giving approval for oral work in modern languages was first instituted in September 1911. It was not thought necessary to hold a written examination, but the specialist visited all who applied for the approval and made the determination on an inspection of the work and on written evidences of training. The demand, however, increased to such an extent that in the early part of the year 1915 it was found impossible for our one specialist to cover the field. It was then decided to hold a written examination testing the general knowledge of the language possessed by the applicant as a preliminary step, thus eliminating from consideration those whose standing in this

examination was below a fixed minimum. Two examinations under this plan were held during the school year 1915-16, the first being in October 1915, the second in April 1916. The following blank form was used by candidates in making application for approval under the revised plan:

APPROVAL OF ORAL WORK IN FRENCH, GERMAN AND  
SPANISH

September 1, 1917

*To the Principal:*

This circular letter does not apply to those teachers who already possess a *permanent* approval in the modern foreign language. It does concern all modern language teachers whose approval is *temporary* and all *new* candidates for approval.

Holders of *temporary* approval granted during the school year 1916-17 and all other candidates who have passed the written examination but have not yet been approved after inspection, should make application to this office on or before the 1st of October for renewal of their approval or for permanent certification, without further written examination.

All candidates for *new approval*, that is those not included above, will be subject to the following regulations:

1 *Approval without written examination:*

Approval may be granted on application without written examination to any candidate who shall present evidence to this office on or before October 1st that he possesses the degree of M. A. (or a higher degree) with the modern language in question as the major subject, from a college or university recognized by the Regents of The University of the State of New York.

2 *Approval on examination:*

A written and an oral examination will be offered for candidates who can not qualify under 1. The written examination will be designed to test the candidate's practical knowledge of the language in question. All questions will be in the foreign language and all answers must be written in that language. A knowledge of phonetics is desirable (system of International Phonetic Association).

The written examination will be given on Friday, October 19, 1917, at 1.15 p. m., under the direction of the principal or other designated official in each school from which an application has been received at this office on or before the 1st of October.

Candidates who fail to pass the written examination with a minimum mark of 60 per cent will not be admitted to the oral examination.

The oral examination will consist of a personal inspection of the work of the teachers in their respective schools.

Approvals made under these regulations will be, in the first instance, for one year only; but any approval may be renewed or made permanent on evidence satisfactory to the Department.

Very truly yours

CHAS. F. WHEELOCK

*Assistant Commissioner for Secondary Education*

APPLICATION FOR APPROVAL OF ORAL WORK IN  
MODERN LANGUAGES

Name of school.....County.....

Name of teacher.....Language.....

I hereby make application for approval of oral work in.....  
[Language]

for.....under the requirement A (1), (2) or B.  
[Teacher] [Cancel item not applying]

Credentials submitted in accordance with requirement A

- a
- b
- c
- d

.....Principal  
Date.....

As will be seen, those who were able to present satisfactory documentary evidence of advanced study and proficiency were excused from the examination. In the written examinations held during the year there were 313 candidates in German and 123 candidates in French. Of these, 149 passed the written examination in German and 87 passed in French. There were moreover 70 candidates in German who were exempted from the examination because of the documentary evidence presented and 23 exempted from the French examination. The fact that 529 teachers applied for this approval during the year indicates the desirability of the credential, which is not required and is not a license.

AGRICULTURE

The following statement by Doctor Dean shows what is being done in the matter of the preparation of special teachers of agriculture:

Ten years ago the public high schools were hardly thought of as effective agencies for agricultural instruction. At present they constitute nearly 90 per cent of the agencies engaged in teaching vocational agriculture. In New York State the number of public high schools teaching agriculture, mechanic arts and homemaking increased 300 per cent in five years. At the present time there are 64 schools having vocational courses in agriculture. Eighty per cent of these schools are located in villages of from 150 to 1500 inhabitants. One of the most important problems in connection with this work has been the training of teachers, and I am making this a special part of my annual report.

The success of any educational enterprise depends to a great extent upon the teachers who are actually carrying on the work.

Since the teaching of agriculture in the secondary schools was a comparatively new undertaking, it was not strange that trained teachers were scarce. Few attempts had been made adequately to train men for this line of work. As the number of New York State schools carrying on vocational agriculture increased, the problem of securing trained teachers became more difficult. To assist in the solution of this problem the State College of Agriculture established the department of rural education. During the year in which the department has been in operation it has, with the assistance and cooperation of the Division of Agricultural and Industrial Education, formulated and put into operation an effective plan of teacher training.

It is generally conceded that it is highly desirable for prospective teachers of agriculture to have some teaching experience under guidance before they are put into schools on their own responsibility. Through a cooperation arrangement between the department of rural education of the New York State College of Agriculture and the Division of Agricultural and Industrial Education of The University of the State of New York such experience will be obtained by prospective teachers from the college. Such seniors have been placed as assistants to the teachers of agriculture in high schools of the State where vocational agriculture was being taught. One senior was placed for the first semester in each school selected. In order that the schools may plan on continuous assistance through the year, each of these assistants has been followed by another senior the second semester. These assistants are called apprentices.

The requirements for graduation from the New York State College of Agriculture are the completion of a minimum of 120 semester hours and a residence of eight semesters. Arrangements have been made at the college so that the apprentice receives one semester of residence and three hours of credit toward graduation for this half year of work in the high school. In addition, provision is made for him to receive thirty dollars a month for his services. This is about sufficient to pay for his room, board and traveling.

One of the objections that was raised at the college when the plan was first proposed was that it would decrease the amount of time the students would have for study. This is true to a certain extent, but all the men who are now in the field have as a result of their experience, indicated desire for further preparation. As a result of the time they have already put in and what they are

planning for, none of these men will be short more than one summer session of the regular eight terms of residence. From this it would appear that it will be only a relatively short time until this term of service in the high school may be required in addition to the eight terms of residence at the college if it should seem desirable.

The financial part has been handled as a result of the cooperation between the Division of Agricultural and Industrial Education and the department of rural education. The division issued to the senior a certificate that was good for one semester. The department of rural education paid the local board of education of the school twenty dollars a month for furnishing the teaching facilities for the apprentice, and for giving him a certain amount of supervision. The state vocational law provides that each teacher in a vocational school after the first, shall receive one-third of his salary from the State. These two provisions make it possible for a high school to secure an assistant teacher without expense. The time may come when it will be possible to ask the local school to bear a portion of the expense, but no considerable number of the schools in New York State have reached that stage. From the standpoint of the college, the fact that the assistants are furnished without expense to the high schools has a very decided advantage because the matter of selection of the places is not subject to any financial inducement on the part of the schools.

The schools were selected as a result of a conference between the specialist in agricultural education from the State Department and the head of the department of rural education. Four factors were taken into consideration in the choice: (1) the ability of the teacher of agriculture; (2) the attitude of the principal toward the work in agriculture; (3) the extent to which the school has developed extension activities; and (4) the number of students in agriculture. The significance of each factor is evident without discussion.

The only restrictions placed on the school were that the assistant teachers should have responsibility for at least one class, but should not be given a full program. They should have the benefit of the supervision of the teacher of agriculture and the principal and have an opportunity to visit the classroom work of any good teachers in the system.

The assistant teachers were visited twice by a representative of the department of rural education of the college, and once by the specialist in agricultural education of The University of the

State of New York. Each apprentice was required to send a written report to the college once a week. This report consisted of a statement of activities of the week in which he had a part, and of one lesson with his criticisms on it after he taught the lesson. In case of any immediate suggestions they were written to the man and when a visit was made to the school the outlines were carried along and gone over with the assistant. In addition, the assistant was given certain readings relating to his work that he was to study during his apprenticeship.

When the work is more completely developed, it is planned to have two instructors of the college devoting their time to this work of teacher preparation. During the first term one instructor will spend his time in the field supervising the assistants while the other is at the college giving preparatory work to those who plan on teaching; the second semester these instructors will change work. This will make it possible for the department to keep in close touch with the work in the high schools, a condition that is absolutely essential for the best teacher preparation. As a further means of strengthening the work, the students who go out during the first semester will make up a class during the second semester that will be devoted to the discussion of problems that arose in their experience, and those who are out during the second semester will have a similar opportunity during the summer session.

#### UNIVERSITY SCHOLARSHIPS

The influence of the University scholarship law on the general standing of scholarship in high schools continues to be manifest. The following list of highest and lowest standings for which scholarships were issued in the various counties is interesting:

##### Highest and Lowest Standings of Winners of University Scholarships, 1916

Albany.....	94.73	78.9
Allegany.....	92.5	73.61 ? 1 vacancy
Broome.....	96.99	84.47
Cattaraugus.....	88.64	81.41 ?

Wyoming.....	87.16	77.79
Yates.....	84.39	72.91 2 eligibles

? — The standing given is that of the last person to whom a scholarship is offered to fill the existing vacancy.

It will be noted that there were only eight scholarships in the State awarded on standings less than 75 per cent. In forty counties, a standing of over 80 per cent was necessary to insure an appointment. In view of this fact, the rule, which is to go into effect in 1917, requiring an average of 75 per cent for the college entrance diploma, will affect very few of those desiring scholarships.

The table appearing on page 838 gives an analysis of the number of college entrance diplomas earned at the various per cents, with the distribution of the scholarships by sex and by colleges. It is interesting to note that of the 750 appointments, 371 were boys and 379 were girls.

The following named appointees, who attained an average standing of 90 per cent or more for the college entrance diploma, constitute the honor list for 1916. They are arranged in the order of standing:

#### University Scholarships—Honor Roll

## MINUTES OF THE MEETING OF THE STATE EXAMINATIONS BOARD, DECEMBER 11, 1915

In response to a call issued by the President of the University and Commissioner of Education, the tenth annual meeting of the New York State Examinations Board was held at The University of the State of New York, Albany, N. Y., December 11, 1915.

The meeting was called to order by the President of the University at 9.30 o'clock. The following members were present:

Hon. John H. Finley, President of the University and Commissioner of Education, presiding

Dr Thomas E. Finegan, Deputy Commissioner of Education and Assistant Commissioner for Elementary Education

Dr Charles F. Wheelock, Assistant Commissioner for Secondary Education

Harlan H. Horner, Chief of the Examinations Division

President George S. Davis of Hunter College

Professor Elmer W. Smith, representing President Elmer B. Bryan of Colgate University

Professor Adam Leroy Jones, representing President Nicholas Murray Butler of Columbia University

President Rush Rhees of the University of Rochester

Rev. Edmund A. O'Connor of Little Falls

Superintendent Herbert S. Weet of Rochester

Principal Walter B. Gunnison, Erasmus Hall High School, Brooklyn

Principal Edward J. Goodwin, Packer Collegiate Institute, Brooklyn

Principal Frank D. Boynton of Ithaca

Superintendent Richard A. Searing of North Tonawanda

District Superintendent Charles W. Lyon, representing Superintendent William H. Maxwell of New York City

Superintendent Henry P. Emerson of Buffalo

Superintendent Wilbur E. Sprague of Utica

Superintendent Charles E. Gorton of Yonkers

### Remarks of President Finley:

"I have real pleasure in welcoming you, the members of this board, whether in your own persons or as proxies, on this beautiful day, and to this important work in which you are with noteworthy sacrifice serving the State.

“ I have often said that the State has two arms in its supervision of the schools: one is the examination arm and the other is the inspection arm. It seems essential that the State should be ambidextrous. However, there has been a feeling that at times one arm, one hand, has perhaps been doing something without the knowledge of the other, and so within the past year we have sought to bring into more helpful coordination these two arms. We have brought together the two divisions into one, under one general supervision, to the end that those who have to visit the schools may also have intimate knowledge of what is to be revealed through the examinations. As some of you know, a letter telling of this coordination has gone out to the superintendents. Those who have seen it will bear with me if I read a paragraph or two in order that others may know what has been in our thought:

Our great examinations system, exercising the large influence it inevitably does upon the teaching in the schools, can hardly accomplish its fundamental purposes until it carries back to the schools after each examination, helpful advice and suggestions as to how weaknesses in teaching and in administration, revealed by the examinations, may be remedied. Effort is now deliberately to be made to correlate the work of examinations and inspections so as to have examinations bring to light the help which individual schools need and to have the specialist carry that help back to the schools. It is a profitless task to record results of poor teaching and unwise administration, year after year, unless decisive steps are taken to help the schools to provide better teaching and to institute sounder administrative methods.

“ It is proposed to strengthen our force of inspectors — we now call them ‘specialists’ — and we want to keep in that group, and add to it, the strongest men available as specialists in the various subjects taught in the schools. We ask your cooperation, so far as you can give it, in bringing about such support as will make the development of this plan possible.

“ We are all regretfully aware of Doctor Maxwell’s absence, but we are glad that he is recovering his wonted health, and we welcome in his stead District Superintendent Lyon.

“ I note, with the aid of Doctor Wheelock, that all the members of the board are present, either in person or by proxy, except Chancellor Day of Syracuse University, whose customary proxy,

Professor Street, we all regret to know is prevented from being here, and Assistant Commissioner Downing, who is absent in the performance of his duties as member of the jury of award at the Panama-Pacific Exposition."

The minutes of the last meeting were approved as printed.

The following tabulation representing the results of the examinations in high schools and academies in January and June 1915 was presented for the consideration of the board:

Statistics of Academic Examinations in the Approved Secondary Schools, January and June 1915

The President offered for consideration the following list of topics, with the source of each indicated:

- I *Reports of standing committees:*
  - a The report of the syllabus committee will contain several important recommendations regarding changes in the Syllabus for Secondary Schools, among which will be included recommendations concerning the adoption of the revised syllabus in physics, the revised syllabus in chemistry, and the new syllabus in applied chemistry, copies of which were distributed to all the schools for suggestions last year
  - b An important report by the committee on the English syllabus
- 2 Shall committees for the preparation of question papers be increased by adding to the committee in each subject two teachers of that subject from medium-sized high schools?  
(Schoolmasters' Club, Allegany, Livingston, Wyoming and Steuben counties, and others)
- 3 Shall commercial English and correspondence be accepted in place of three years' English for an academic diploma?  
(John G. Opdyke, chairman English department, Julia Richman High School, New York City)
- 4 Shall history of commerce be added to the history group and be considered as meeting, in part, the history requirements for an academic diploma?  
(Principal Preston K. Pattison, Westfield, N. Y.)
- 5 Shall credit for a third language be accepted as an elective for a college entrance diploma?  
(Principal James Sullivan, Boys High School, Brooklyn)
- 6 Shall credit for college entrance board examinations be given toward a Regents college entrance diploma?  
(High School Principals Association of New York City)
- 7 Shall examinations in music be offered in January as well as in June?  
(Superintendent C. A. Hamilton, New York State School for the Blind, Batavia, and others)
- 8 Shall plans be considered for giving credit for music practice when such practice is done outside of school?  
(Arthur J. Abbott, director of music, Buffalo)
- 9 Shall a course be offered in advanced applied biology?  
(James E. Peabody, first assistant in biology, Morris High

School, New York City; Dr Chester Baldman, bureau of public health, New York City)

- 10 Shall a special diploma be offered for technical schools of special character?

(Principal Arthur S. Hurrell, Buffalo Technical High School)

- 11 Shall a single course of five hours be offered in modern history in place of the two present three-hour courses?

(Principal James Sullivan, Boys High School, Brooklyn)

- 12 Shall the Department furnish questions in first year high school subjects for the use of teachers, but not for record here?

(Principal Albert Downey, Hamburg)

- 13 Shall a test in penmanship be made a requirement for admission to high school?

(Penmanship Section, New York State Teachers Association)

- 14 Shall the syllabus in spheric trigonometry be revised by adding applications relating to astronomy and navigation?

(E. E. Arnold, Department specialist in mathematics, The University of the State of New York)

- 15 Shall the examinations in trigonometry be divided, making separate papers in plane trigonometry (2 counts) and spheric trigonometry (1 count)

(E. E. Arnold, Department specialist in mathematics, The University of the State of New York)

- 16 Shall the committee on final revision of question papers be reorganized?

(Superintendent William H. Maxwell of New York City)

- 17 Shall the requirements for a college entrance diploma in arts be modified by adding Spanish to the list on the same terms as French and German?

(Lawrence A. Wilkins, head of the department of Spanish, DeWitt Clinton High School, New York City)

- 18 Shall history of commerce be dropped from the list of subjects in which Regents examinations are given?

(W. E. Bartholomew, Department specialist in commercial subjects, The University of the State of New York)

- 19 Shall American history with civics be added to the list of electives for the college entrance diploma in arts?

(Principal Gary M. Jones of Watertown)

The syllabus committee, through its chairman, Principal Boynton, made the following report:

Your committee recommends

1 That the changes in the physics schedule as recommended by the report of the subcommittee on revision of the physics schedule, which report was printed and distributed to all the physics teachers of the State about one year ago, be accepted in place of the present syllabus in physics.

2 That the changes in the chemistry schedule as recommended by the report of the subcommittee on revision of the chemistry schedule, which report was printed and distributed to all the chemistry teachers of the State about one year ago, be accepted in place of the present syllabus in chemistry.

3 That an additional course in applied chemistry, as recommended by the subcommittee on chemistry revision, which report was printed and distributed to the science teachers of the State, be added to the science schedule of the present secondary syllabus.

4 That the recommendations of the subcommittee on modern languages be printed and distributed to the members of this board, to superintendents, principals and modern foreign language teachers of the State, with a view to receiving general criticisms, and be acted upon at the next annual meeting of this board.

5 That the report of the subcommittee on English be referred back to said committee for revision and that when revised the same be printed and distributed to the members of this board, to superintendents, principals and the English teachers of the State.

6 That examinations in advanced arithmetic be discontinued with the class of the present academic year.

7 That trigonometry be divided into plane and spheric, and that a separate examination be given in each, beginning with the school year in September 1916.

After extended discussion, each of the recommendations of the committee was adopted as the recommendation of the board.

On motion of Principal Goodwin, it was

*Resolved*, That the New York State Examinations Board request the colleges to accept the course in applied chemistry for one unit toward the admission requirements.

On motion of Professor Jones, it was

*Resolved*, That that portion of the proposed new regulations regarding the English work that provides that no paper in any subject be accepted if it is markedly deficient in English, be emphatically approved by this board.

Professor Smith offered the following resolution:

*Resolved*, That in the judgment of the Examinations Board, the purpose of teaching literature is to lead to an eager and appreciative reading of books suited to the pupil's age, for the development of his moral, emotional, esthetic and mental nature,

more specifically to cultivate high ideals, to stimulate the emotional and imaginative faculties, to broaden the mental experiences and to introduce the pupil to artistic conceptions and great characters.

On motion this resolution was referred to the syllabus committee.

On motion, the proposition to increase the membership of committees for the preparation of question papers was, after extended discussion, referred to the committee on nominations, with power, with the result that one member representing a small high school was added to the membership of each of the following committees: English, Latin, German, history, mathematics, physics and biology.

On motion, it was recommended that College Entrance Board examinations be credited toward a Regents college entrance diploma.

On motion, it was recommended that examinations in rudiments of music be offered in January as well as in June.

On motion, the proposition regarding a course in advanced applied biology was referred to the syllabus committee.

On motion, it was recommended that a special diploma be offered for technical schools of special character.

On motion, the proposition to substitute a single course of five hours in modern history for the two present three-hour courses was referred to the syllabus committee.

On motion, the proposition to revise the syllabus in spheric trigonometry was referred to the syllabus committee.

On motion, the proposition to revise the committee on final revision of question papers was referred to the President of the University with power and with the recommendation that there be two committees, one having to do with the papers in mathematics and science, and the other with the papers in languages and history, and that each of these committees have three members outside the Department staff.

On motion, it was recommended that the requirements for a college entrance diploma be modified by adding Spanish to the list of subjects for a college entrance diploma in arts, on the same terms as French and German.

On motion, it was recommended that history of commerce be dropped from the list of subjects in which Regents examinations are to be given after June 1915.

Topics number 3, 4, 5, 8, 12 and 13 were laid on the table.

On motion of Superintendent Gorton, it was

*Resolved*, That the State Department of Education be requested to have prepared a list of not more than 5000 words which occur most frequently in ordinary use; that the list be included as a part of the syllabus for elementary schools; that the Regents examinations in spelling be prepared from words taken from the list; that in order to obtain credit in the examination a standing of 85 per cent be required.

At the request of the classical section of the State Teachers Association, President Rhees offered the following preamble and resolution:

*Whereas*, Under the ruling of the Regents of The University of the State of New York, the winner of a classical academic diploma is not eligible for one of the new State university scholarships, which, according to that ruling, are available only for the winner of a so-called college entrance diploma, and

*Whereas*, The classical academic diploma is in reality a college entrance diploma, although it is not technically so called, but admits to college on an equality with the technically so-called college entrance diploma, and requires two more counts and has always been regarded as a most satisfactory evidence of fitness to enter college, and

*Whereas*, The ruling of the Regents referred to will, in our opinion, tend to discourage the taking of the classical academic diploma, and to cause some misunderstanding as to its value and desirability, therefore

*Resolved*, That we recommend to the Regents the inclusion of the classical academic diploma among the diplomas for which a State university scholarship is available, and if there is anything in the language of the law creating the State university scholarships which forbids this, we recommend that steps be taken to have the law amended so as to permit such inclusion. We do not think it is advisable to retain the present classical academic diploma if it is to be excluded from the competition for the State university scholarships.

Discussion of this proposition developed the fact that the specific requirements for the academic diploma in classical subjects and for the college entrance diploma differ only in respect to the number of counts in mathematics, the college entrance diploma requiring 12 counts in mathematics in specified subjects while the academic diploma in classical subjects requires only 10 counts in mathe-

matics, and in the further fact that the 4 elective counts of the academic diploma in classical subjects are without restriction while the electives in the college entrance diploma in arts are restricted to a definite list of subjects. If the electives of the academic diploma in classical subjects are selected with reference to that end, the requirements become the same.

On motion, the following resolution was adopted:

*Resolved*, That it is recommended that the issuance of the classical academic diploma be discontinued after the current year.

The President of the University appointed the following committee on nominations of question committees: Principal Goodwin, Superintendent Sprague, Superintendent Weet, Superintendent Searing, Doctor Finegan, Doctor Wheelock, Mr Horner. This committee rendered the following report:

### English

Charles R. Gaston, First Assistant in English, Richmond Hill High School, New York City

Cornell, Ph.B., Ph. D

Mrs Ada Y. Franklin, Vice Principal and Instructor in English, Cobleskill High School

Special courses in English at Chicago University and Teachers College

Elmer W. Smith, Professor of Rhetoric and Public Speaking, Colgate University

Colgate, B.A., M.A

Randolph T. Congdon, Assistant for Field Work, Examinations Division, The University of the State of New York

Syracuse, B.A.; Harvard, M.A.

### Latin

Edward C. Chickering, First Assistant in Classical Languages, Jamaica High School

Yale, B.A.; Harvard, M.A.; Columbia, Ph.D.

Alvah T. Otis, Principal and Teacher of Latin, Waterville High School

Syracuse, B.A.

Herbert H. Yeames, Professor of the Greek Language and Literature, Hobart College

Harvard, B.A., M.A.

S. Dwight Arms, Specialist in Ancient Languages, The University of the State of New York

Hamilton, B.A., M.A.

**Greek**

Francis R. Parker, Principal, Elmira Free Academy  
Queens University, B.A., M.A.

John Ira Bennett, Professor of Greek, Union College  
Union, B.A.

Horace L. Field, Assistant in Charge of Teachers Examinations,  
The University of the State of New York  
Cornell, B.A.; Columbia, M.A.

**Hebrew**

Max Radin, First Assistant in Classical Languages, Newtown  
High School, Elmshurst, N. Y.

College of the City of New York, B.A.; New York University, LL.B.;  
Columbia, Ph.D.

Charles P. Fagnani, Professor of the Old Testament Languages  
and Literature, Union Theological Seminary

College of the City of New York, B.A., B.S.; Columbia, LL.B.; Western  
Reserve, D.D.

Loring W. Batten, Professor of Old Testament Literature and  
Interpretation, General Theological Seminary

Harvard, B.A.; University of Pennsylvania, Ph.D.; Hobart, S.T.D.

**German**

Frederick Betz, Head of Department of Modern Languages,  
East High School, Rochester

Rochester, B.A., M.A.

Mabel W. Farmer, Teacher of German, North Tonawanda High  
School

St Lawrence, B.A.

Frank Coe Barnes, Professor of Modern Languages, Union  
College

Williams, B.A., M.A.

William R. Price, Specialist in Modern Languages, The Uni-  
versity of the State of New York

Cornell, B.A.; Columbia, Ph.D. Graduate student in Berlin and Paris

**French**

Frances Paget, Teacher of French, Morris High School, New  
York City

Elmira, B.A., M.A. Graduate student in Paris and Grenoble

Orlan G. Guerlac, Assistant Professor of the Romance Lan-  
guages, Cornell University

University of Paris, MA., LL.B.

William R. Price, Specialist in Modern Languages, The Uni-  
versity of the State of New York

Cornell, B.A.; Columbia, Ph.D. Graduate student in Berlin and Paris

## Special Committees for Crediting Teachers in Oral German and French

### German

Hermann C. Davidsen, Assistant Professor of German, Cornell University

Kiel, Ph.D.

William R. Price, Specialist in Modern Languages, The University of the State of New York

Cornell, B.A.; Columbia, Ph.D. Graduate student in Berlin and Paris

### French

Alice Higgins, First Assistant, French Department, Girls High School, Brooklyn

Adelphi, B.A.; Columbia, M.A.

William R. Price, Specialist in Modern Languages, The University of the State of New York

Cornell, B.A.; Columbia, Ph.D. Graduate student in Berlin and Paris

### Spanish

Lawrence A. Wilkins, First Assistant in Spanish, DeWitt Clinton High School, New York City

Syracuse, Ph.B.; Columbia, M.A.

John F. Stinard, Assistant Professor of Spanish and German, New York State College for Teachers

Brown, B.A.; Pennsylvania State College, M.A. Graduate work in Chicago University

Sara C. Knox, Examiner, The University of the State of New York

Cornell, B.A., M.A.

### Italian

Michael Caboni, Teacher of Italian, Hutchinson-Central High School, Buffalo

University of Rome, D.Sc.

Alfred G. Panaroni, Instructor in the Romance Languages, College of the City of New York

College of the City of New York, B.S.; Élève Titulaire, École pratique des Hautes Études, Paris 1909

Annie T. Keyser, Editor of Question Papers, The University of the State of New York

Vassar, one year; Cornell, two years.

### History and Economics

James F. Wilson, First Assistant in History, Boys High School, Brooklyn

Leland Stanford, B.A.; New York Law School, LL.B.

Burton P. Fowler, Principal, Dunkirk High School  
Syracuse, B.A.

Frank H. Wood, Professor of American History, Hamilton  
College

Syracuse, B.A., M.A.; Harvard, B.A.; Leipzig, Ph.D.

Avery W. Skinner, Specialist in History, The University of the  
State of New York

Syracuse, B.A.

### Mathematics

William E. Breckenridge, Chairman, Department of Mathe-  
matics, Stuyvesant High School, New York City  
Yale, B.A., M.A.

J. Murray Foster, Principal and Teacher of Mathematics, Dans-  
ville High School

Rochester, B.A., M.A.

David Eugene Smith, Professor of Mathematics, Teachers  
College

Syracuse, Ph.B., Ph.M., Ph.D., LL.D. Michigan State Normal College,  
M.Pd.

Elmer E. Arnold, Specialist in Mathematics, The University of  
the State of New York

Colgate, B.A.

### Physics

Carrol A. Mider, Principal, Spring Valley High School  
Cornell, B.A.

Curtis A. Edgett, Instructor of Science, Genesee Wesleyan  
Seminary, Lima

Colgate, B.S.

Clement D. Child, Professor of Physics, Colgate University  
Rochester, B.A.; Cornell, Ph.D.

Everett O'Neill, Senior Examiner in Science, The University  
of the State of New York

Cornell, Ph.B.

### Chemistry

Hubert W. Hess, Head of Science Department, Glens Falls High  
School

Colgate, B.A.

Albert J. Salathe, Instructor in Chemistry, Union College  
Colgate, B.A., M.A.

Charles N. Cobb, Specialist in Physical Science, The University  
of the State of New York

Syracuse, B.A., M.A.

**Biology**

Truman J. Moon, Head of Biology and Chemistry Department,  
Middletown High School

Cornell, B.A.

Mrs Mary C. Logan, Preceptress and Teacher of Sciences,  
Lyons High School

Syracuse, B.A., M.A.

William L. Bray, Professor of Botany, Syracuse University

Indiana University, B.A.; Lake Forest, M.A.; Chicago, Ph.D.

Arthur G. Clement, Specialist in Biologic Science, The Uni-  
versity of the State of New York

Rochester, B.A.

**Physical Geography**

Peter F. Piper, Teacher of Physical Geography and Physics,  
Hutchinson-Central High School, Buffalo

Syracuse, B.Sc.

C. T. McFarlane, Controller and Professor of Geography,  
Teachers College, Columbia University

Michigan State Normal School, Pd.M., New York State College for  
Teachers, Pd.D.

Charles N. Cobb, Specialist in Physical Science, The University  
of the State of New York

Syracuse, B.A., M.A.

**Commercial Subjects***Group 1<sup>a</sup>*

Edward O. Folsom, Head of Commercial Department, Utica  
Free Academy

R. E. Davey, Head of Department of Business Education, East  
High School, Rochester

W. E. Bartholomew, Specialist in Commercial Subjects, The  
University of the State of New York

Westchester State Normal School, Westchester, Pa.

*Group 2<sup>b</sup>*

William B. Curtiss, Instructor of Commercial Subjects, Dunkirk  
High School

---

*a* Group 1 Elementary bookkeeping and business practice, advanced book-  
keeping and office practice; commercial arithmetic, commercial  
law, history of commerce, and commercial geography.

*b* Group 2 Commercial English and correspondence, business writing, short-  
hand 1 and 2, and typewriting.

Jeanette C. Hall, Head of Commercial Department, New Rochelle High School

Syracuse, B.A.; New York University, B.C.S.

W. E. Bartholomew, Specialist in Commercial Subjects, The University of the State of New York

Westchester State Normal School, Westchester, Pa.

### **Drawing**

Harry W. Jacobs, Director of Art Instruction, Buffalo

Massachusetts Normal Art School

Leigh Harrison Hunt, Professor in Art Department, College of the City of New York

College of the City of New York, B.Sc., M.Sc., New York University, M.D.

Royal B. Farnum, Specialist in Art Education, The University of the State of New York

Graduate, Massachusetts Normal Art School

### **Music**

Hollis E. Dann, Head of Department of Music, Cornell University

Alfred University, Mus. D.

Julia E. Crane, State Normal School, Potsdam

Graduate State Normal School, Potsdam

Mrs Charlotte M. Waterman, Director of Music, Oswego Normal School

Graduate of Music Department, Cornell University

*For college graduate professional certificate*

### **Psychology, history of education, principles of education and methods of teaching**

Leonard A. Blue, Dean and Professor of Education, New York State College for Teachers.

Cornell College, Iowa, Ph.B., Ph.M.; University of Pennsylvania, Ph.D.

George M. Forbes, Professor of Philosophy and Education, University of Rochester

Rochester, B.A., M.A.; Colgate, LL.D.

Jeremiah M. Thompson, Principal, State Normal School, Potsdam

Colgate, Ph.B., M.A.; New York State College for Teachers, Pd.D.

*Preacademic*

### **English, history and spelling**

George H. Covey, District Superintendent, Katonah

Graduate Potsdam State Normal School

James M. Glass, Principal, School 4, Rochester  
Hamilton, B.A., M.A.

Edith Marshall, Teacher of English Methods, State Normal  
School, Buffalo

### Arithmetic and geography

Howard G. Burdge, Superintendent of Schools, Wellsville  
Allegheny College, B.A.

Lamont F. Hodge, Assistant Superintendent of Schools, Yonkers  
Colgate, B.A.

James G. Riggs, Principal, State Normal School, Oswego  
Amherst, B.A., M.A.; New York State College for Teachers, Pd.D.

In accordance with the resolution relating thereto, the President of the University has appointed the following committees on the final revision of question papers:

#### *For languages, literature and history*

President Nicholas Murray Butler of Columbia University

Superintendent Herbert S. Weet of Rochester

Rev. Edmund A. O'Connor of Little Falls

#### *For science, mathematics and other subjects*

President Elmer B. Bryan of Colgate University

Superintendent William H. Maxwell of New York City

Superintendent Charles E. Gorton of Yonkers

The three Assistant Commissioners and the Chief of the Examinations Division are ex officio members of both of these committees.

On motion of President Davis, it was

*Voted*, That this board expresses its appreciation of the cordial hospitality of President and Mrs Finley.

On motion, it was

*Voted*, That this board expresses its regret at the absence of Superintendent Maxwell from its deliberations and its pleasure in learning of his recovery.

The meeting adjourned sine die.

CHARLES F. WHEELOCK

*Secretary*

# ANNUAL REPORT OF THE NEW YORK STATE COLLEGE FOR TEACHERS

PREPARED BY THE PRESIDENT

I hereby submit my first annual report. It will review much that is familiar to you as trustees, but will be of value, I hope, to the graduates of the college and to the friends of public education throughout the State, who have a proper concern in the State College for Teachers. My first year has been largely occupied by a careful and detailed study of the work of the college, its curriculum, entrance requirements, material equipment, general purpose, traditions and ideals. It has been a year of great profit to me educationally and the ties of friendship and acquaintance with the college faculty have already become a source of great pleasure to me.

**The budget.** The college moneys secured from the Legislatures through the State Education Department are given below, showing the classified expenditures for two years.

## 1 Receipts .

	1914-15	1915-16
1 Appropriations		
<i>a</i> Maintenance .....	\$97 000 ..	\$110 000 ..
<i>b</i> Betterments .....	5 000 ..	8 494 40
2 Fees (estimated) .....	7 082 ..	8 500 ..
	<hr/>	<hr/>
	\$109 082 ..	\$126 994 40

## 2 Expenditures

	1914-15	1915-16
Salaries and wages.....	\$90 249 20	\$105 229 80
Light, power, fuel, water.....	3 360 ..	3 544 60
Supplies: industrial .....	2 300 ..	3 000 ..
stationery .....	1 600 ..	1 600 ..
laboratories .....	1 200 ..	1 200 ..
Lectures .....	400 ..	475 ..
Printing .....	750 ..	1 000 ..
Transportation .....	500 ..	525 ..
Telephone and telegraph .....	180 ..	200 ..
Rent .....	1 000 ..	1 000 ..
Repairs to plant and equipment.....	742 80	625 ..
Miscellaneous .....	200 ..	500 ..
Purchase of equipment:		
industrial .....	3 000 ..	3 500 ..
science laboratories .....	1 889 90	2 203 73
library .....	600 ..	600 ..
General plant betterments.....	1 110 10	1 791 27
	<hr/>	<hr/>
Totals .....	\$109 082 ..	\$126 994 40

**The faculty.** The salary adjustments made during the year have placed the faculty on a surer financial basis by bringing the salaries approximately on a level with those paid by other institutions of equal rank. The faculty positions have been established formally as of four grades: professors, assistant professors, instructors and assistants. The minimum and maximum salaries of professors are \$2500 and \$3500 respectively; of assistant professors, \$1800 and \$2400; of instructors, \$1200 and \$1700; of assistants \$800 and \$1100. Laboratory assistants are paid according to the time and kind of service rendered. The college now has the following professorships and assistant professorships: professor of the English language and literature, professor of the Latin language and literature, professor of German, professor of French, professor of mathematics, professor of physics, professor of chemistry, professor of biology, professor of history, professor of government and political science, professor of sociology and economics, professor of education, professor of secondary education, professor of industrial education, professor of philosophy, professor of commerce and business administration, two assistant professors of industrial education, assistant professor of English. There are 28 instructors, 2 assistants and 6 laboratory assistants now on the college faculty.

**Student body.** The student body represents every county in the State except Orleans and Wyoming; and one or more students represent each of the following states: Vermont, Massachusetts, Connecticut, New Jersey, Pennsylvania, Maryland and Iowa. The enrolment for the last two years has been as follows:

	1914-15	1915-16
Graduates .....	43	57
Seniors .....	103	108
Juniors .....	124	166
Sophomores .....	140	173
Freshmen .....	222	309
Specials .....	38	41
	<hr/>	<hr/>
	670	854
Extension .....		158

The graduate students come to State College to pursue professional courses in education and especially to take courses in special methods of teaching. They hold bachelor's degrees from the following colleges and universities: New York State College for Teachers, 25; Syracuse University, 4; College of New Rochelle, 3; Cornell University, 2; Wellesley, 2; Smith, 5; Vassar, 3; Columbia,

2; Radcliffe, 2; and one each from University of Chicago, University of Vermont, University of Wisconsin, University of Toronto, Boston University, Catholic University, Mount Holyoke, Manhattan, Swarthmore, Worcester Polytechnic Institute, and St Francis Xavier.

**Additional buildings.** Our enrolment has grown rapidly since the present buildings were planned in 1907, a decade ago.

1907.....	351	1912.....	503
1908.....	254	1913.....	590
1909.....	187	1914.....	556
1910.....	272	1915.....	670
1911.....	413	1916.....	854

This is an increase of 137 per cent and will show the strain to which the capacity of the present plant has been subjected. The work of the college is seriously hampered by the crowded conditions. I summarize here the principal cases where lack of building facilities impair our efficiency:

1 All laboratories are so constantly in use and so crowded that the work of preparation for laboratory exercises and the proper cleaning of the tables between laboratory hours has become impossible.

2 Recitation rooms are constantly in use, necessitating the use of the same room by from two to five different courses. The different kinds of work produce confusion and seriously interfere with the proper conduct of the work.

3 This constant use of recitation rooms makes it impossible for the faculty to hold necessary conferences with individual students.

4 All available space has been pressed into service for recitations and lectures leaving no adequate rooms for the reading and study purposes of the students. The reading room can not accommodate a quarter of those who desire to use it and as a result scores of students are compelled to read in dimly lighted corridors, wholly unsuited for the purpose.

5 The college has only one gymnasium, used by both men and women students. It is too small for the present student body, but the greatest need is that a separate gymnasium should be provided for the men.

6 The shops of the mechanical and industrial courses are wholly inadequate. Basement rooms have been adapted for these shops but they are so dark that artificial light must be used throughout the day in several instances.

7 The department of commerce and business administration is now crowded into a space that is wholly inadequate. It demands three additional rooms for its proper expansion.

8 The department of art must have additional room if it is to perform its proper function. It is impossible to prepare art supervisors for the schools with our present facilities.

9 The Milne High School, the practice school for the courses in education, is occupying space needed by the college. The practice school should be housed in a separate building where a high school atmosphere can be maintained.

These conditions show the insistent demand for enlarged facilities for the college. A large building including a gymnasium to house the department of practical arts and a small building for the Milne High School are imperatively needed. The latter should be a model high school in economy of construction and equipment, a building to which the communities of the State could look with confidence as a model for similar buildings.

**Housing of students.** The students of the college are not housed satisfactorily. They cannot secure satisfactory rooms in sufficient numbers near the college. Consequently many live great distances away, others crowd the nearby rooms. Fully two hundred boarding houses are under the supervision of the college but they are so scattered that adequate supervision of the physical and social conditions under which they place the students, is very difficult. It is desirable to have a dormitory where suitable accommodations can be provided for the women students. A cooperative dormitory would be satisfactory, privately owned and managed, but under the careful supervision of the college. This would provide a social center for the students and could be maintained under wholesome conditions. I hope private enterprise will come forward to provide such a cooperative hall.

**Extension courses.** The college has established extension courses for teachers in service within an easy travelling radius from the college. It is generally recognized that teachers in service need further training. There are several reasons for this need. There is the need (1) for the new point of view, the new enthusiasm which will come from advanced work along a specially selected line; (2) promotions are more and more made on the basis of professional study; (3) normal school graduates desire to do work leading to college degrees; (4) the value of the teacher in service is greatly increased by an active pursuit of some course of study

and investigation. With a view to satisfy these needs of teachers and from a desire to discharge its obligations to the teachers of the State, the State College for Teachers offers courses in Albany, Troy and Schenectady to teachers who desire to do work under rigorous scholastic requirements. The courses are given under the same conditions as at the college and examinations are required on the same basis as at the college. The response on the part of the teachers of the eastern part of the State has been altogether gratifying. The quality of work is high and the college faculty feels that these courses are accomplishing much. It may therefore be hoped that this work will be extended to more remote parts of the State in future years.

The Regents of the University in establishing the State College for Teachers specifically provide that its function shall be to train (1) teachers for the high schools of the State; (2) teachers and supervisors of special subjects, such as music, drawing, commerce, industrial arts, and physical education; (3) principals and supervisory officers of elementary and high schools. The college is now in its tenth year of effort in this assigned field, seeking to develop a curriculum that shall be adequate in scope and in thoroughness of application for the specific purpose before it. I am deeply impressed with the demand for thorough scholarship, high character, and professional enthusiasm, which this lays on us. Our problem is to draw from the high schools of the State those graduates who have well-defined tastes and pronounced ability for scholarly work, and who have a clearly apparent aptitude for teaching; and to send back to the high schools of the State men and women to whom we have given sound and extensive training in the liberal arts, in whom we have developed proved skill in teaching. The college must also teach a high school conception of duty to the State in the teachers of its children and it must induce in its graduates a genuine devotion to the cause of learning everywhere.

**Entrance requirements.** Students are admitted as freshmen on the basis of graduation from a high school, together with the following specific requirements. Candidates for admission must have completed the following requirements. These requirements are stated in points, 2 points being given to a subject of study pursued through a school year with not less than four recitation periods each week. Subjects aggregating 30 points are required for entrance and of these the following named in group 1 must be presented. The remaining points may be selected by the applicant from those indicated in group 2.

Students will be permitted to enter conditioned in 2 points; but such conditions must be removed before entering upon the work of the sophomore year.

Regents credits will be accepted for all entrance subjects.

*Group 1*

For candidates for the degree of B.A. (Prescribed: 26 points)		For candidates for the degree of B.S. (Prescribed: 24 points)

<sup>1</sup>Candidates for the degree of B.S. in Business Administration, Industrial Education or in Household Economics, may meet the foreign language requirements by presenting 8 points in one, two or three languages.

Candidates for the degree of B.S. in Household Economics will be required to present biology or botany and zoology instead of intermediate algebra and five points only will be elected from group 2.

These requirements are dictated by the practice of American colleges of high standing and by the "college entrance diploma" issued by the Regents of the University. They represent the average attainment of American high school graduates. It can not be assumed that these attainments constitute the only basis or the best basis for a higher, liberal education; and it is unmistakably clear that many who fully meet the requirements nevertheless fail to show the power and mental grasp necessary to do well the work properly required of freshmen. We note the following deficiencies in freshmen: a lack of capacity for difficult work; a lack of initiative; a lack of interest in scholarship, in learning for its own sake. I am well aware that these deficiencies are not chargeable to the high school alone. But there is a vicious circle in a superficial population, an easy-going educational scheme, and unscholarly teachers in the schools. There is great need of a new departure somewhere, and the college is best fitted to take the initiative. Above all, a college whose fundamental purpose is the training of teachers, must insist upon educational virility.

I seriously question the advisability of admitting to college students who could maintain no more than a passing grade of 60 per cent in their high school course. That grade of scholarship is not sufficient for those that desire to become the future high school teachers of the State. This institution must in fairness to itself and in justice to the schools of the State set for itself a higher standard of attainment. The standard should be set at least at 75. It may be wise to approach this in easy steps, by requiring a passing grade of 65, 70, 75, in three successive years, but whatever the method, the higher standard is our imperative need.

**Tests for admission.** Up to the present time scholarship has been the only test seriously required of matriculants by colleges anywhere. It is a test easily applied and probably adequate in most cases. But scholarship is not the only test for prospective teachers. The trained intellect alone can not guarantee teaching power. At least two other tests should be added — health and character.

**A health test.** It is an economic waste for the State to provide a free professional training for persons of such insecure health that no return in teaching service can be rendered to the State. Furthermore, such students may, and often do, menace the health of their fellows, and if they do become teachers for brief periods, they will be a constant menace to the health of their pupils. The State should therefore require a health test of all matriculants. I

believe it is a great desideratum to have such a test incorporated as an integral part of our entrance requirements, and I hope it may be done in the near future.

**A personal power test.** Fine scholars may become useless and helpless teachers; mediocre scholars often become strong and valuable teachers. This apparent paradox merely calls attention to valuable elements of teaching power not included under the term scholarship. We sum up these elements under the name of personality, a vague and much abused term. But there are certain elements of supreme value to the teacher. To the Teachers College it is a matter of supreme importance to discover early whether the future teacher gives sufficient evidence of personal power to warrant his continuance in training. Those personalities should be eliminated who leave no impress upon those with whom they come into contact, who can not control others, who have no projecting power as individual mentalities. To this end a personality test is needed. Can we test personal power? It is a difficult matter and must be approached with great caution. But we can at least test the purpose of the prospective teacher. A high purpose to become educated, to become a teacher, invariably indicates a positive individuality with something to give to others; the absence of such high purpose will be evidence that the person lacks the necessary teacher-motive force. Other elements besides purpose are judgment, self-control, initiative, power of resistance to mental suggestion, ambition. If the psychologists can devise an adequate test for these qualities, they will perform a service of great value to those whose business is the training of teachers.

**Brief teaching service.** The National Education Association in its report of 1913, under the Department of Superintendence, shows that the average length of service of women teachers is less than four years, of men teachers less than eight years. The causes of this condition are apparent. Marriage withdraws the women; other, more lucrative activities the men. The brevity of service has an adverse influence upon the teaching profession on the one hand; and on the other, it suggests that the State may have an inadequate economic return from its investment in teacher-training institutions.

Professional skill and dignity come by slow growth. Professional ideals and high professional spirit are largely dependent upon stability and permanency. None of these fine qualities can be fully realized in a body whose personnel changes every half decade as is

the case with teachers. This is particularly true with teachers because so few enter the work with a distinct purpose to make it a life work. It is to be an ad interim occupation rather than a profession to a large percentage of teachers. As a result there is little professional solidarity, little professional ambition and a decided tendency to professional stagnation.

The State of New York expends annually a substantial sum for the preparation of teachers for its schools. In the case of State College the per student cost is \$165 annually, or an investment of \$660 through a four-year course for each high school teacher graduated. Taking the N. E. A. figures of five years as the average length of service for men and women, it is clear that each teacher costs the State of New York \$132 for each teaching year. It is desirable therefore to increase the length of service materially, to secure better returns for the State both in terms of dollars and in terms of higher professional ability which is efficiency.

The State College for Teachers also inevitably suffers from this brief teaching service, because its efficiency is measured in terms of service rendered to the State by its graduates. Its prestige is determined by its graduates who attain honorable place and win distinction. Its influence in the world of scholarship is measured by the amount of scholarly work done by its graduates. Manifestly the achievements in scholarship during a five-year service are comparatively small. The teacher's highest power is likely to be developed in the second decade of service. Our greatest usefulness must therefore await the time when our graduates will devote their lives to teaching. The factors necessary to bring this to pass are (1) more men teachers, (2) teaching by married women, (3) increased remuneration, (4) greater professional enthusiasm. The last factor the college can contribute. We can induce longer service if we make the teacher's scholarship so thorough that it will produce an unquenchable enthusiasm in the young teacher, an enthusiasm that will become the basis for a professional idealism of a life time.

Bradley, Arthur E.	Waverly	Dolan, LeRoy A.	Oxford
Butterworth, Norman Ford	Utica	McCarthy, Robert F.	Waverly
		Saunders, Orthello	Leonardsville

HIGHER EDUCATION

The training school for officers and enlisted men of the naval reserve force at Columbia University. A portion of a photograph on the front steps of the library of Columbia University.

# HIGHER EDUCATION

PREPARED BY

AUGUSTUS S. DOWNING

*Assistant Commissioner for Higher Education*

The Department's eleventh Annual Report, that of 1915, which may properly be called a "decade report" as well, reviewed in part IV, not only the items of interest in higher education for the school year 1913-14, but also for the decade. It treated certain items historically and traced important results to their source. The "decade report" presented the whole field of the Regents activities in higher education, and students desirous of more detailed information than that presented in the annual reports are referred to it. The annual report preserves the same continuity of subjects as that evolved in the first ten annual reports, which is outlined in the eleventh or the "decade report."

The Report on Higher Education for 1916 (129th Regents Report) emphasized the inevitable disagreement between stronger men and conflicting interests in the stronger institutions, which I have endeavored to report year by year without bias.

## SECOND PAN-AMERICAN SCIENTIFIC CONGRESS

This report on higher education has for its theme the broadening educational interests developing on the western hemisphere. There was held in the city of Washington, December 27, 1915 to January 8, 1916, the second Pan-American Scientific Congress, convoked by the government of the United States pursuant to a resolution of the first Pan-American Scientific Congress held in Santiago, Chile, December 25, 1908 to January 5, 1909. Under article 48 of the final act of the second Pan-American Scientific Congress, the third congress shall meet in the city of Lima in connection with the celebration of the anniversary of the independence of Peru, in 1921, and the committee for its organization comprises: Dr Javier Prado Y Ugarteche, rector of the University of San Marcos, Lima; Dr Manuel Vicente Villaran, Lima; and Dr Alejandro Deustua, Lima.

**Purpose.** The purpose of the congress was to bring into close and intimate contact the leaders of scientific thought and public opinion in the American republics, to the end that by exchange of

views results might be reached of service to the peoples of the American continent, and that by personal intercourse foundations would be laid for a harmonious cooperation for scientific procedure in the future. In the early autumn, "The Final Act and Interpretative Commentary Thereon," appeared from press, which was prepared by James Brown Scott, reporter general, appointed by the executive committee of the congress to prepare in its name and in its behalf the general report of the scientific labors of the congress. The final act is therefore official in the highest degree. The volume contains in general the program as finally carried out, the list of scientific institutions, associations and learned societies participating in the congress, and the lists of names of all persons invited to take part in the proceedings. The Final Act is printed in advance of the proceedings, which will fill many volumes.

**Members.** The members of the congress comprised representatives of universities, institutions, associations, learned societies and other private organizations, and specially invited scientists, scholars and publicists. An embarrassment arose from the difficulty of securing adequate representation from the Central and South American countries owing to the great expense of the journey and the disturbed financial conditions due to the war. It was arranged that the Carnegie Endowment for International Peace should participate in the form of inviting delegates as guests, other than those appointed by the several governments, and the Endowment allotted \$100,000 for this purpose, a truly generous and altruistic act. It is not too much to say that but for the financial assistance, extended at a critical point in the preparatory arrangements, the congress would not have attained its ultimate great success. The delegates that accepted the invitation of the Endowment to be its guests; the countries from which they came, and the trip provided for their entertainment, on the adjournment of the Congress, to the educational centers of the East, are reported in the 1916 "Year Book of the Carnegie Endowment for International Peace."

**Aims.** The aims of the congress are to increase the knowledge of things American, to disseminate and to make the culture of each American country the heritage of all American republics, to further the advancement of science by disinterested cooperation, to promote industry, inter-American trade and commerce, and to devise ways and means of mutual helpfulness in these and in other respects.

The program of subjects was divided into nine appropriate sections and several subsections.

Section IV, entitled "Education," included five subsections — elementary, secondary, university, the education of women, and technical education. In this section the discussions covered the establishment, present status and future development of public and private education as carried on in the republics of the western hemisphere; the possibility of Pan-American correlation of subjects and standardization in subject and equipment, which would permit interchange of professors and students between the American republics. This is not the place or the time in which to discuss the influence and effects of this Congress upon the future relations of the republics of this hemisphere. In the judgment of the participants in the proceedings, the congress inaugurated a new era in these relations, created a sentiment of solidarity and mutual interest, and established a basis for future understanding and cooperation such as has never before existed, and could not have been so effectively created in any other way.

**Resolutions and recommendations.** The resolutions and recommendations embodied in this Final Act comprise 49 articles. Those resolutions and recommendations of interest in education are found in articles 5, 16, 17, 18 and 19: (1) that proper steps and measures be taken to bring about in the American republics a general use of the metric system of weights and measures . . . in educational and scientific work; (2) that there be established in the universities of the United States chairs of the history, development, and ideals of the Latin-American peoples, and in the universities of Latin America chairs of the history, development, and ideals of the people of the United States; (3) that Spanish be taught more generally in the schools, colleges and universities of the United States and that English be taught more generally in the educational institutions of the Latin-American republics, and that both languages be taught from the point of view of American life, literature, history, and social institutions; (4) that the study of sociology be inaugurated in American universities where it is not at present taught; and (5) that the governments of the American republics further the interchange of educators of all grades, and of students of university, normal and technical training, and encourage both to make visits of instruction to other American countries.

## NATIONAL ASSOCIATIONS OF HIGHER INSTITUTIONS

For the general information of the higher institutions of the world, brief mention is made of items of special interest and helpfulness taken from the publications of associations of a national character and influence.

**The General Education Board.** The report of the secretary for the year is published in book form and issued under date of July 1, 1916. In addition to the officers and members of the board, and its letter of transmission, the report contains:

1 The work of the General Education Board, including a brief reference to colleges and universities, public education, medical education, and research.

2 College and university appropriations, showing that during the year appropriations to colleges of \$900,000 were made toward \$4,100,000.

3 Public education in Maryland and the report giving the results of the survey, presented to the Survey Commission and to Governor Goldsborough in December; a comprehensive bill reorganizing the state educational system became a law April 3d, in operation June 1, 1916.

4 Educational research, including ten interesting items.

5 An institute of public health, including the report of a conference and the resultant establishment by the Rockefeller Foundation of a school of hygiene and public health at the Johns Hopkins University.

6 Publications, including the publications of the year and a minute of the board to avoid misconception of its attitude. "The General Education Board does not indorse or promulgate any educational theory, but is interested in facilitating the trial of promising educational experiments under proper conditions . . . ."

7 Other activities, including farm demonstrations, secondary education, rural schools for whites, and negro rural schools.

Valuable information is given in chart form, and the treasurer's report completes the table of contents.

**Bulletins of the Bureau of Education.** The United States Commissioner of Education, Washington, D. C., publishes a list of the documents issued annually from 1906 to date. The bulletins of interest in higher education, issued by the bureau during the year 1916, are given by title and author, with a brief statement of contents.

Reserve officers' training corps, Cornell University. A company ready to march out of Ithaca to camp for the night. These practice hikes are taken by companies and sometimes by battalions in the spring and autumn.

LIBRARY  
OF THE  
UNIVERSITY OF ILLINOIS

*Number 6-50. Statistics of State Universities and State Colleges.* Contains lists and tables showing changes in courses and methods of instruction, gifts, buildings and improvements, directory of institutions, teaching force, enrolment, property and income.

*Number 19. State Higher Educational Institutions of Iowa.* Contains discussions of higher education with incidental reference to public secondary education, expenditures, hours, duplication in psychology and education, the principle of major lines, liberal arts in the state college, subcollegiate, extension and graduate work, courses in home economics, journalism and commerce, physical education and housing of women students, buildings, administration, instructional staffs and recommendations.

*Number 25. Commercial Education.* Includes discussions on commercial education in higher institutions in England, Germany, Latin America and the United States.

*Number 26. A survey of Educational Institutions of the State of Washington.* Includes a report and recommendations regarding higher education.

*Number 27. State Higher Educational Institutions of North Dakota.* Contains discussions of conditions and needs of the people, the university and the agricultural college, the schools of forestry and of science, the library commission, comparisons, illustrations and recommendations.

*Number 30. University Training for Public Service.* Contains discussions of the relation of the university to the city, needs, methods and results of cooperation, reports of typical urban universities, bibliography.

*Number 33. Registration and Student Records for Smaller Colleges.* Contains discussions of student and alumni records and the various forms to be used in this work.

*Number 37. The Cooperative System of Education as Developed in the College of Engineering, University of Cincinnati.* Contains discussions of the cooperative idea, the experimental period, the reorganized system, other applications of the cooperative plan, typical instruction sheets and outlines, inspection-trip reports, illustrations, bibliography.

*Numbers 38 and 39. Negro Education.* Includes an account of the higher education of the negro.

*Number 43. Educational Directory.* Contains information as to college and university officials.

*Number 46. Recent Movements in College and University Administration.* Contains university surveys for Iowa, Washington and North Dakota, reports of educational and financial statistics, a discussion of college entrance requirements, a study of pensions and insurance, of training for public service, of the proposal for a state university in Massachusetts, of academic freedom.

**The Association of American Universities.** The seventeenth annual conference of this association was held at the University of California, August 27 and 28, 1915. A representative of the University of Michigan presided and a representative of the University of Pennsylvania was secretary. Delegates were present from seventeen of the twenty-two universities of the association, the Carnegie Foundation and the Bureau of Education.

*Columbia University*, through Mr Cassius J. Keyser, presented a paper prepared by Mr John Dewey, entitled "Faculty Share in University Control," which preceded a discussion by Messrs Comstock, Lovejoy, Taft and Embree. A recess was taken to attend the university meeting at the Greek Theatre, after which the discussion of Mr Dewey's paper was continued by Messrs Hill, Adams, Pritchett, Creighton, Lovejoy and Blackmar.

*The University of California*, through Mr A. O. Leuschner, presented a paper on "The Organization and Budget of the Graduate School in Its Relation to the Other Schools of the University," which was discussed by eleven participants.

At the third session the secretary presented the report of the committee on bibliography of university and college publications, as presented by the chairman, Mr E. C. Richardson, librarian of Princeton University, which the executive committee had voted to report to the association. The plans were approved by the association and an appropriation of \$500 was made to carry it out.

The association received and filed a report from its representative appointed to cooperate with the Bureau of Education to consider the question of the classification of American colleges.

The report from the conference of deans regarding the master's degree was presented and action thereon taken by the association.

A second resolution from the deans' conference, recommending that a committee be appointed to report to the association on the subject of academic and professional higher degrees, was adopted.

The association seems to have anticipated the action of the second Pan American Scientific Congress in the matter of the use of the metric system, by the following preamble and resolution:

*Whereas*, The international system of weights and measures is already employed almost exclusively for scientific work in all parts of the world, and in all public affairs in most of the countries of the globe, and

*Whereas*, The metric system is much simpler, shorter, and more definite than the English system of weights and measures in customary American use, and

*Whereas*, The general introduction of the metric system in America and American educational institutions would tend to greater international unity and mutual understanding.

*Resolved*, That the secretary be instructed to use the metric system hereafter in the Association's publications.

The committee on classification of universities and colleges presented a brief report of progress, that was accepted.

Fourteen institutions were represented at the sessions of the conference of deans and other administrative officers of the graduate schools, which were held at the University of California, in the afternoon and evening of August 26th. The first session was devoted to the discussion of the subject, "Summer Sessions and the Master's Degree." At the second session, on a report of the committee, the resolutions already referred to were adopted. The second topic discussed by the conference was that of the use of the master's degree for professional courses, which led to the appointment of a committee to report to the association on the general subject of "Academic and Professional Higher Degrees."

**National Association of State Universities.** The twentieth annual meeting was held at the University of California, Berkeley, August 30 and 31, 1915. Its transactions and proceedings appear as volume 13, edited for the association by Guy Potter Benton.

The president of the association, President Benjamin Ide Wheeler of the University of California, presented to the association in his address "a wide variety of scattered and mostly commonplace items which taken in the mass may help to characterize the present status within its evolving fate of the American state university." He characterized the distinction between the European and the American university as follows:

"The plain fact is, the two systems are so wide apart in manner and spirit as not to be comparable. For the initiation of our university scheme and type we borrowed much stimulus and some machinery from Europe, but we are well past borrowing now. . . . If there is borrowing in the future it will proceed in the reversed direction, by Europe from America." Having discussed the two types of American universities, the privately endowed and the state, he said: "Though the two university types are today

not widely differentiated they are apparently not approximating. . . . There are certain features which are bound to contribute regularly, even though they are externals, to the differentiation of the state university." These he groups in six or seven items: first, and foremost, education; second, the technical disciplines in engineering which help to raise standards of hard work. Agriculture leaves the door open, while the confusion of religious worship with religious theories preclude the peaceable administration of church or chapel in the state university, which is to be deplored. The emergence of compulsory military drill and the absence of a robust and frank tuition fee are commented upon. He finds that the perpetuity of the structure in essentially its present proportion is guaranteed in the plain persistence of the public need.

There was a discussion of the "Function of a University in the Preparation of High School Teachers," presented under the subdivisions: (a) Shall it offer instruction in all subjects which the high school may choose to teach? (b) The relation of the school of education to other departments of the University, (c) Who shall constitute the faculty of the school of education?

There was a discussion on "The Relation of Professors to Outside Employment," at the same session.

The third session had for its stated paper "The Reasons Why the State University, as Distinguished from Other State Institutions, Deserves Government by a Distinct and Separate Board of Regents," and a discussion of the Wisconsin survey. The final paper was entitled "The Junior College," and had for its subdivisions: (a) its curriculum in reference to the prerequisites of the university curriculum; (b) conflict of the nearer and farther aims in the shaping of a student's course.

**The Carnegie Foundation for the Advancement of Teaching.** The tenth annual report of the president and of the treasurer of this foundation was issued in October 1915. A new division appears in this report which comprises: part 1, the business of the year; part 2, the division of educational inquiry; part 3, pensions; and part 4, *de mortuis*, and the report of the treasurer. The report of the president, in part 1 gives the business of the year—the annual meeting of the trustees, the meetings of the executive committee, and the allowances. This is followed by a list of the annual reports and other publications of the foundation. In part 2, the division of educational inquiry, which is maintained by a separate fund, after the general introduction there appear studies

of legal education, of engineering education, of the training of teachers in Missouri, of education in Vermont, and of college charges for tuition, which are referred to hereafter. Part 3 contains an interesting discussion of pensions for public school teachers, for university professors, for clergymen, and industrial pensions. Tabular statements follow, including a summary of teachers' pension systems.

**Kahn Foundation for the Foreign Travel of American Teachers.** No report from this foundation has been received since that referred to in my report of last year, that is, the report to the trustees by Benjamin Sledd, professor of English in Wake Forest College, which appeared in volume 4, no. 1.

#### EDUCATIONAL LEGISLATION RELATING TO HIGHER EDUCATION

From February 1916 to January 1917

The following is a synopsis of the new statutes enacted for the promotion of higher education in the United States so far as available since the report of 1916.

*Georgia* (ch. 471) admitted women to the practice of law on the same terms and qualifications as apply to men; (ch. 324) established a board of examiners in optometry, defined its powers and duties and regulated the practice of optometry; (ch. 562) placed "other non-drug-giving schools of medicine" under the same restrictions as those of osteopathy, prescribed graduation from a high school and from a school of osteopathy having a four-year course of nine months each before admission to the examination; (ch. 330) established the Alexander H. Stephens Institute at Crawfordville as a part of the University of Georgia.

*Kentucky* (ch. 9) created a state board of accountancy, prescribed its powers and duties, provided for examinations, issuing of certificates and the penalties for violations of the act; (ch. 20) provided that the "State University, Lexington, Kentucky," be hereafter designated as "University of Kentucky," added the state board of agriculture as *ex officio* members of the university board, established, in connection with the agricultural extension work, a cooperative bureau for fostering marketing and appropriated \$10,000 for encouraging the study of agriculture in the common schools and for farm demonstration work; (ch. 71) regulated the practice of veterinary medicine, established a state board of veterinary medical examiners and provided penalties for violation of the act.

*Maryland* (ch. 79) enlarged the powers of Woodstock College of Baltimore county by giving it the right to acquire property without limitation as to amount and to confer any degree in any of the faculties, arts, sciences and liberal professions; (ch. 173) created a state board of chiropody examiners, provided for the examination and licensing of chiropodists and for penalties for the violation of the act; (ch. 225) directed the governor to appoint the same persons to the state board of agriculture as are appointed to be trustees of the State College of Agriculture; (ch. 230) authorized the board of medical examiners to admit without examination licensees of the "National Board of Medical Examiners"; (ch. 372) incorporated the Maryland State College of Agriculture and transferred to it all the property real, personal and mixed now used by the Maryland Agricultural College and the Maryland experiment station; (ch. 376) authorized the Educational Survey Commission, created in 1914, to continue the survey by including the academies, colleges, agricultural and professional schools of the state; (ch. 509) extended the period of professional study for admission to the bar from two to three years; (ch. 527) lowered the age for admission to the examination for registered nurse from 23 to 22 years, and forbade the practice of "graduate" or "certified" nurses without the certificate of R.N. from the state board of examiners of nurses; (ch. 660) authorized the governor to commission the faculty of St John's College as officers of the National Guard.

*Massachusetts* (ch. 234) authorized the Massachusetts Agricultural College to acquire not more than 1000 acres of land to be known as the Mount Toby state demonstration forest for the instruction of students in forestry.

*Mississippi* (ch. 107) created a state board of law examiners, prescribed a high school education for applicants for examination, but a diploma from the University of Mississippi conferring the degree of bachelor of law exempts from the professional examination; (ch. 114) created a new board of pharmacy examiners and reenacted the pharmacy law.

*New Jersey* (ch. 58) provided for an annual registration fee of \$2 to be paid the secretary of the optometry board by all licensed optometrists; (ch. 109) amended the medical act by providing for the admission of a candidate to the licensing examination that has completed his four-year high school course with the exception of the last year in ancient languages; (ch. 152) prohibited the

conferring of any degree without the approval of the state board of education.

*New York* (ch. 129) amended the dental law by defining the practice of dentistry, providing for the appointment of a secretary by the Regents, advancing the period of dental study from three to four years, requiring annual registration and establishing for women the profession of dental hygienist; (ch. 289) authorized the Homeopathic Medical College to increase its property holdings from two to five million dollars; (ch. 327) increased the pharmacy preliminary requirements from 15 to 30 counts; (ch. 328) required the successful completion of an approved four-year high school course or its equivalent before beginning the first year of medical study; (ch. 352) incorporated the "Grimes Foundation" for the purpose of establishing homes for the aged, homes and institutions for young men and women, to relieve the worthy, needy poor without regard to race, creed or color, to establish playgrounds, club rooms and gymnasiums and to educate deserving young men for the Roman Catholic priesthood — these activities to be carried on within the Syracuse diocese of the Roman Catholic church; (ch. 580) extended the powers of the College of the City of New York in granting degrees; (ch. 545) incorporated the Institute for Public Service at New York City and affiliated centers to conduct training schools for public service and to study the management of public business, higher education, benevolent foundations, methods of securing efficient citizenship and kindred subjects.

*Porto Rico* (ch. 59) established a board of veterinary examiners and regulated the practice of veterinary medicine.

*Virginia* (ch. 84) repealed all previous medical acts, reenacted the medical law, defined chiropody and included the chiropody law; (ch. 148) established a board, defined and regulated the practice of optometry; (ch. 400) established an art commission to decide on the design and location of all works of art acquired by the state.

### CONVOCATION

The fifty-second Convocation of the University of the State of New York occurred October 19-20, 1916, in the State Education Building at Albany. The general meetings were held in the auditorium, which was christened, on this occasion, "Chancellor's Hall." In the absence of the Chancellor, Vice Chancellor Vander Veer presided.

The program arranged was of peculiar interest, in that few of the subjects chosen had ever been discussed at educational meetings, or, if treated at all, had never been approached from the practical and fundamental viewpoint that was maintained in this program. Three of the sessions were devoted to the consideration of a trilogy — the spoken word, the written word and the pictured word.

During the session, Dr James Sullivan was formally inducted into office as State Historian; and the degree of LL.D. was conferred upon Thomas Alva Edison.

Two interesting sessions occurred simultaneously on the morning of the second day of Convocation, in the form of conferences. The first was on the Junior High School, under the chairmanship of the Assistant Commissioner for Secondary Education, which is reported elsewhere. The report of the second follows.

**Conference of university and college representatives.** A conference of representatives from the colleges and universities was held under the chairmanship of the Assistant Commissioner for Higher Education on October 20th, in the Education Building. There were representatives of the following higher institutions present: Alfred University, Colgate University, College of the City of New York, Columbia University, Elmira College, Hamilton College, Hunter College, Manhattan College, New York State College for Teachers, New York University, St Francis College, St John's College, Syracuse University, Teachers College, Union Theological Seminary, Union University, and Vassar College.

The chairman made a concise statement of facts regarding the registration of colleges of liberal arts and science under sections 401 and 404 of the Regents Rules. He presented as a first topic for discussion the question: "What standings if any should a university student maintain in the college of his choice in order to justify his retention as a scholar?" This topic was discussed by Professor Lewis of Hamilton College, Dean Brownson of the College of the City of New York, President MacCracken of Vassar College, Professor Kayser of Hunter College, Chancellor Richmond of Union University, Dean Baker of Syracuse University, and Professor Jones of Columbia University.

President MacCracken offered a resolution and Chancellor Richmond suggested an amendment, which were stated by the chair, and on formal action it was

*Voted*, It is the sense of this conference that the Department of Education should ascertain from the colleges or universities of the State, suggestions as to the standards that should be maintained by holders of all scholarships,

whether University or other, the same to be digested and reported as one of the topics for discussion at the next meeting of the Association of Colleges in the State of New York.

The second topic presented by the chairman was, "The requirements a college must meet to be entitled to full recognition by the Regents." The chair called attention to the fact that property and equipment were established by law or Regents rules, as well as the faculties at adequate salaries, the course of study and the admission requirements. Under the general education preliminary to college entrance were four subdivisions: age, character, preparation and tests. The last of these presents several complications, due to methods of administration. There are the examinations by the College Entrance Examination Board and by the Regents for the college entrance diploma; there are certificates from approved secondary schools without college examinations, and certificates of secondary schools supplemented by examinations in the college. Chancellor Richmond stated that a committee had been appointed under his presidency of the Association of Colleges in the State of New York to investigate and report on the entrance requirements to the various colleges of the State, and that Dean Keppel was chairman of this committee. On formal action it was

*Voted*, To defer the discussion of this topic until the committee's report should become available.

The third topic presented by the chairman for discussion was, "The minimum number of hours that should be required for graduation from college." He presented in tabular form the requirements of representative institutions, in hours a year, and also comparisons of arts and science requirements with professional and technical, in the following form:

*A* Present requirements of representative institutions in hours a year

College of the City of New York (592); Columbia College (512); Harvard College (446 to 460); Holy Cross College (800); Amherst College (520); Hamilton College (612); Rochester (536); Bryn Mawr (465).

*B* Comparison of arts and science requirements with professional and technical

1 Representative New York colleges

For men 510 hours (Colgate)

For women 444 hours (Vassar)

For both 495 hours (Syracuse)

2 Medicine — minimum 850 hours (State)

### 3 Engineering 806 hours (Brooklyn Polytechnic)

The representative of Colgate reported that that college had this year added 72 hours.

President MacCracken thought the minimum requirement of hours a year was a question to be determined by the character and degree of advanced study attained, also the amount of credit given laboratory and other extra classroom hours. He thought the Vassar minimum of 444 was exclusive of required physical training, of laboratory hours, of practice in music, and art and public speaking. The chairman at once called attention to the facts as set forth in Vassar's announcement, viz:

15 hours a week.....	freshman
14½ or 15 hours a week.....	sophomore
14 or 15 hours a week.....	junior
12 to 15 hours a week.....	senior
55½ week hours	
32 weeks a year	
Hence 444 hours or 480 hours	

The discussion was participated in by the representatives of Columbia, New York University and Syracuse, and on formal motion it was

*Voted*, The third topic as outlined be referred by the Department to the colleges of the State, the results digested and tabulated, and it then become a topic for discussion by the Association of Colleges in the State of New York.

**Honorary degrees conferred by the Regents.** The honorary degree of LL.D. was conferred upon Thomas Alva Edison at the fifty-second Convocation, as noted above. In this connection the following list of honorary and other degrees in medicine conferred by the Regents from the beginning to date is preserved for ready reference. The list gives uniformly the degrees and the names and addresses when known, of the recipients chronologically arranged, the date of the degree's conferment, and volume and page reference of the Regents record, with such notes as are at present available from the records.

#### *Honorary M.D. Degrees*

Oliver Comstock, William Kirkpatrick, Andrew Morton, Alexander Sheldon, John Augustine Smith, John Stearns, David B. Warden, Joseph White, Westel Willoughby; March 10, 1812; 2:36. Thomas Cooper, professor in Dickinson College "for his profound knowledge of chemistry . . . and his valuable writings on scientific subjects"; March 4, 1816; 2:129. John D. Jacques, as trustee of College of Physicians and Surgeons, New York;

March 17, 1817; 2:160. Richard Davidson, Port physician, New Orleans; William H. Richardson, professor in Transylvania University; John Van Cleve, physician, Princeton, N. J.; April 1, 1819; 2:212. Luther Riley, recommended by "the most eminent characters, both in Pennsylvania, the state of his residence, and in this state"; February 19, 1828; 3:185. Lewis Phoenix, Morristown, N. J.; March 17, 1829; 3:235. Christopher C. Yates, New York; March 20, 1832; 3:384. Henry Marshall, Edinburgh, Scotland; "Deputy General Inspector of Military Hospitals in Great Britain . . . for valuable contributions to medical and general literature"; February 25, 1847; 5:176. Louis Agassiz, Neufchatel, Switzerland; William Farr, London, England, "author of several works on vital statistics . . . editor of 'The British Annals of Medicine' . . . principal medical clerk in the office of the registrar general of England"; December 3, 1847; 5:218.

*Doctor of Medicine (M.D.)*

On the nomination of the State Medical Society; after 1840 pursuant to chapter 336.

Jonathan Eights, Albany county; Thomas Fuller, Otsego county; Laurens Hull, Oneida county; John Onderdonk, New York county; Gain Robinson, Wayne county; James Stevenson, Washington county; March 13, 1827; 3:162. Thomas Brodhead, Columbia county; Eleazer Gedney, Orange county; John D. Henry, Monroe county; April 16, 1828; 3:216. Daniel Ayres, Montgomery county; Joseph G. T. Hunt, Kings county; Henry H. Garrison, Kings county; James Hogeboom, Rensselaer county; William Rockwell, New York city; March 8, 1858; 6:499. Merritt H. Clark, Orange county; Richard Lanning, Tompkins county; Peter P. Staats, Albany; James M. Sturdevant, Oneida county; March 10, 1859; 6:545. Francis J. D'Avignon, Clinton county; Peter Moulton, Westchester county; Harrison Teller, Kings county; March 27, 1860; 7:31. Charles G. Bacon, Oswego county; Charles Barrows, Oneida county; February 26, 1861; 7:69. R. Spencer Chapin, New York city; Leonard G. Warren, Albany; March 24, 1864; 7:226. Ferris Jacobs; Richard S. Satterlee, U. S. A.; May 9, 1865; 7:282. John Van Ness, Brooklyn; April 9, 1867; 7:378. Lewis Post, Lodi; January 14,

1869; 7:433. Elijah S. Lyman, Thorburn; Tobias J. Green, Parish; January 12, 1871; 7:517. Evander Odell, Unadilla; June 2, 1871; 7:545. William Lamont, Charlotteville; Cornelius H. Schaaps, Brooklyn; August 7, 1872; 8:15. Peter Denny, Dutchess county; William Newman, New York; November 6, 1874; 8:143. Nathan R. Tefft, Onondaga county; May 24, 1882; 9:136. Titus Lonson Brown, Binghamton; Edward Snyder Coburn, Troy; Everitt Hasbrouck, Brooklyn; Samuel Lilienthal, New York; July 6, 1886; 9:357.

On the nomination of the Homeopathic State Medical Society, pursuant to chapter 268, Laws of 1862.

Frederick F. Stamm, Brooklyn; January 13, 1865; 7:257. Oliver E. Noble, New York; Ira C. Owen, Sherburne; Stephen D. Sherman, Lyons; June 14, 1869; 7:471. Caspar Bruchausen, Norwich; Alfred W. Gray, Milwaukee; William B. Reeve, Quogue; August 7, 1872; 8:15. John F. Gray, LL.D., New York; Constantine Herring, Philadelphia; March 23, 1876; 8:220. William Gulick, Watkins; Harrison V. Miller, Syracuse; William H. Watson, Utica; Egbert Guernsey, New York; July 11, 1878; 8:319. Edward Payson Fowler, New York; Cornelius Ormes, Jamestown; Charles Sumner, Rochester; July 8, 1879; 8:382. Austin Wells Holden, Glens Falls; Edward Bayard, New York; Asa Stone Couch, Fredonia; Lester Marcus Pratt, Albany; January 9, 1880; 9:27. William Cowles Doane, Williamsport, Pa.; Orland Groom, Horseheads; Henry Minton, Brooklyn; Andrew Robinson Wright, Buffalo; January 14, 1881; 9:72. Alonzo Spofford Ball, New York; Edwin Henry Hurd, Rochester; Charles Taylor Harris, Syracuse; Horace Marshfield Paine, Albany; July 12, 1881; 9:85. E. Darwin Jones, Albany; Charles E. Swift, Auburn; May 24, 1882; 9:136. John William Dowling, New York; Lorenzo Marcellus Kenyon, Buffalo; John James Mitchell, Newburgh; Reuben Curtis Moffatt, Brooklyn; July 11, 1883; 9:199. Timothy F. Allen, New York; S. Powell Burdick, New York; July 9, 1884; 9:263. William Tod Helmuth, New York; Henry Clark Houghton, New York; July 5, 1887; 9:413. Selden H. Talcott, Middletown; W. M. L. Fiske, Brooklyn; July 10, 1888; 9:469. Elliott Colburn Low, Plattsburgh; March 13, 1890; 10:16. Herbert M. Dayfoot, Rochester; John Talcott Greenleaf, Owego; June 11, 1891; 10:81. Conferring of honorary M.D. degrees discontinued by Regents action, February 9, 1893; 10:169.

On examination, pursuant to chapter 746 of the Laws of 1872.

Edward William Vietor, Brooklyn; H. Lansing Waldo, West Troy; July 7, 1875; 8:174. Louis E. Rade; March 9, 1880; 9:35.

Howard Simmons Paine, Albany; July 12, 1881; 9:85. Isaac William Silberman, Brooklyn; George Blumer, Syracuse; May 24, 1882; 9:135. Milton Ambrose Wilson, North East, Pa.; January 11, 1883; 9:151. Russell Clark Paris, Samuel Spencer Wallien; May 29, 1883; 9:193. Juan Garcia Puron, New York; July 8, 1884; 9:253.

#### ASSOCIATION OF COLLEGES IN THE STATE OF NEW YORK

This association met pursuant to call on February 1, 1916, in the Regents Room of the State Education Building, at 10 a. m.; Chancellor Richmond of Union University in the chair.

The following colleges or universities were represented at this meeting: Adelphi, Alfred, City of New York, Columbia, Cornell, Fordham, Hamilton, Hobart, Hunter, Manhattan, New York State, New York, Niagara, St Bonaventure's, St Francis, St John's, Union, Vassar and Wells.

After the reading and approval of the minutes of the previous meeting, and the appointment of committees, the chairman announced two topics for discussion:

*College athletics.* The discussion of this topic was opened by President M. Woolsey Stryker, who stated that, in his judgment, the legitimate aims of college athletics are two: (1) wholesome exercise for health; (2) fun or amusement. He held that inter-collegiate athletics is productive of evil in that it introduces obscure ethics and provides athletics for only a few.

The discussion was participated in by several members of the association, and it appeared that in several colleges the athletics are under rather complete faculty control.

After full discussion of the subject and on formal motion it was

*Voted*, That the president appoint a committee of three to investigate and report at the next meeting, upon the control of college athletics.

On formal motion of instruction it was

*Voted*, That the secretary draw the attention of the members of the organization to the standards and plans of the National College Athletic Association.

*College entrance requirements.* Dean Keppel in opening the discussion on this topic compared it to the action of the joint inasmuch as there was the long and the short lever to consider; that there are two million high school pupils in the country, only 10 per cent of whom get to college; that the typical high school is a high school of four or five teachers rather than the large high school that those residing in cities are wont to have in mind;

that, therefore, the high school is concerned with the preparation of the 90 per cent that must complete their education in the high school and the 10 per cent that must be prepared for entrance to college; that the preparation for life is the long lever; and the preparation for college entrance is the short lever. He also said that the changing conditions of civilization must be borne in mind (if it may be called civilization); that college entrance subjects are not ordained; that every subject is on the defensive; that topics of tests are not ordained, and that they too are on the defensive. He expressed his opinion that colleges are fortunate in having certain controlling forces at work, holding in check radical departure from the old before the tests have determined that such departure is desirable.

President MacCracken made a plea for condensation of admission requirements, advocating the use (as far as may be possible) of a comprehensive examination test, and the grouping of the required subjects.

Doctor Jones of Columbia University contended that there should be uniformity in the underlying principles of admission; that English, mathematics and foreign language might be agreed upon as covering at least nine of the fourteen or fifteen units required for admission; that when uniformity in these units had been secured, the remaining five or six units could be determined by each institution after studying carefully the personal equation of the applicant.

Dean Brownson earnestly supported this position and thought when the uniformity had been attained it was as far as the association should go in making recommendation for uniformity.

After full discussion by the other members of the association and on formal motion, it was

*Voted*, That the president appoint a committee of three to investigate the subject of college entrance requirements and to report at the next meeting, with recommendations. Dean Keppel was appointed chairman of this committee, with associate members H. N. MacCracken, K. D. MacMillan, C. L. Brownson, A. P. Saunders.

The committee on nominations then reported, and on formal motion it was

*Voted*, That the committee of selection for Rhodes scholars be President Rush Rhees of Rochester University, for one year; President Nicholas Murray Butler of Columbia University, for two years; and Chancellor James R. Day of Syracuse University, for three years.

President M. Woolsey Stryker of Hamilton College was unanimously elected president.

RHODES SCHOLARSHIPS

This report for the third year of the second decade has reference only to the experience of the year and announcements for the coming year.

**Conference.** The committee on selection of a Rhodes scholar for 1916 met in the office of the permanent secretary, Dr Augustus S. Downing, January 20, 1916. Three candidates presented themselves. Joseph Bartlett Armstrong, B.A., Willets Point road, Whitestone, Long Island, of Columbia University, class of 1915, was appointed the ninth Rhodes scholar from New York State, to enter on residence at Oxford in 1916. In announcing the appointment, in the presence of all the candidates, Chancellor Brown explained that both Mr MacKenzie and Mr Griffith will be eligible for appointment in 1917 and also in 1919.

**Committee on selection.** At a meeting of the Association of Colleges in the State of New York, held February 1, 1916, a committee on selection was nominated and on formal motion was unanimously elected. The committee is: Rush Rhees, President of Rochester University, 1916, chairman; Nicholas Murray Butler, President of Columbia University, 1917; James R. Day, Chancellor of Syracuse University, 1918.

**Examinations.** In 1913-14 a change was made in the system of selection of Rhodes scholars in the United States. Under this system the 48 states were divided into three groups (A, B and C) of 16 states each. New York State is found in group A from which scholars are selected for 1916 and for 1917.

Qualifying examinations were held in New York State October 3 and 4, 1916, in Albany, Education Building, Proctor, Henry L. Taylor; New York, Columbia University, Proctor, Adam Leroy Jones; Ithaca, Cornell University, Proctor, H. A. Hitchcock; Rochester, Rochester University, Proctor, Agnes E. Smith.

Candidates taking Rhodes scholarship examinations October 3-4, 1916

NAME	HOME ADDRESS AND COLLEGE ADDRESS	DEGREE AND CLASS	WHERE EXAMINED
Fassett, James Maxwell...	324 W. 8th st., Erie, Pa.....	B. A.	Albany
Griffith, Ernest Stacey....	Colgate University, Hamilton, N. Y.....	1918	
	1409 Oneida st., Utica, N. Y.....	B. A.	Albany
	Hamilton College, Clinton, N. Y.....	1917	
MacKenzie, Hugh.....	Millbrook, N. Y.....	B. A.	Albany
	Cornell University, Ithaca, N. Y.....	1916	
Mahneke, Harry William...	33 N. Washington pl., New York, N. Y.	LL.B.	New York
	Fordham University, New York, N. Y.	1916	
Saunders, Stanley Stewart..	Clinton, N. Y.....	B. A.	Albany
	Hamilton College, Clinton, N. Y.....	1917	

No examination will be held in New York State in the autumn of 1917 for selection of a scholar, under present rules.

The result of the examination conducted by the delegacy October 3 and 4, 1916, was reported by the local examination offices at Oxford, England, on November 1, 1916. Mr Hugh MacKenzie was awarded exemption from responsions.

Mr James M. Fassett has satisfied the examiners in Latin, arithmetic, and either algebra or geometry, and will be entitled to exemption from responsions as soon as he either shall have passed *in Oxford* the examination in the Greek language only at responsions, or shall have satisfied the examiners in Greek in a subsequent examination conducted by the delegacy for the Rhodes trustees. The following candidates are not entitled to any certificate on the results of the recent examination: Ernest S. Griffith; Harry W. Mahneke; Stanley S. Saunders.

**The American Oxonian.** The 1916 quarterly devoted to the interests of the Rhodes scholars from America began with no. 1, January 1916, and was completed with no. 4, October 1916. The first volume, 1914, comprised two numbers; the second volume, the quarterly, four numbers. Permanent arrangements for its publication by George Banta, Menasha, Wisconsin, have been made by the Alumni Association of American Rhodes Scholars, whose official magazine it is, and whose editor is Frank Aydelotte.

Perhaps no better epitome of volume 3 can be given than that set forth in the January number, under the caption "Features for 1916."

A second manual for prospective Rhodes scholars, dealing especially with the choice of a course at Oxford.

Lists of men who are successful in the qualifying examination and of those elected to go to Oxford in October.

A series of articles on the adaptation of Oxford methods to American universities: Princeton, Yale, Columbia, Oberlin, Minnesota, and the University of Washington.

A full discussion of the question, "What do Rhodes scholars think of preparedness?"

A Rhodes scholar's account of the Ford Peace Pilgrimage.

In addition, the usual departments of Personals, Editorials, Reviews, Oxford News, and an Annual Address Book.

The purpose of The American Oxonian is presented as follows:

A magazine for past, present, and prospective Rhodes scholars, for Oxford men living in America, for school, college and public libraries, and for that part of the general public which is interested in the intellectual results of a great educational experiment.

## STATISTICS OF HIGHER INSTITUTIONS

For many years this report has made comparisons between the attendance on the higher institutions of this State and those of other states and countries.

Comparison with the foreign countries of Europe has been impossible from reasons that are graphically set forth in the limited publications that reach us. The few annuals from universities of Europe that have been printed are interesting only as a means of estimating those "serving with the colors" or "lectures S and M," the other days than Saturday and Monday being devoted to service for the fatherland. The interesting comparisons instituted between the statistics of this State and those of Europe, as shown in the *Deutscher Universitäts-Kalender*, have been impossible for three years, due to our inability to secure this publication as well as other standard German authorities. Conditions in England are revealed in the *American Oxonian*. "Athletics at Oxford are, of course, at low ebb. . . . The annual Oxford v. Cambridge match went to the Oxford team. . . . The team was composed of ten Americans, three South Africans, one Welshman and one Scotchman."

"From the *Oxford Magazine* we learn that the number of men in residence this last term was 550, as against 1087 for this term last year and 3097 in 1914."

The educational activity reported last year in developing closer relations between the United States and other countries of the western hemisphere, increased during the year. At the Christmas vacation important meetings were held in Washington, D. C., at which numerous suggestive plans of development were entered upon, from which, undoubtedly, closer educational relations will be drawn between the countries of this hemisphere.

In New York State several problems of educational administration arising from the changing relations on the western continent were discussed. The *Columbia University Quarterly* for September 1916 refers to one of these:

That migration from one university to another which has been so long a practice of students in Europe has of late become widespread among our own colleges. The advancing requirements for admission to professional study, and the more careful standardization of the requirements for admission to graduate study, had already called for an attempt to determine more adequately the values of college courses throughout the country; but migration made the determination practically necessary. . . . Difficult enough even for our own institutions, it is far more difficult when it includes evaluation

of the work of foreign institutions. Yet the number of students from foreign institutions who apply for admission to our colleges and universities is constantly increasing and may well increase so rapidly in the near future as to form an important part of the student body even in the smaller institutions. The proper evaluation of the previous education of such students is a matter of great moment. We must not lower our standards by rating their previous training too high, nor should we do them the injustice of rating it too low.

The requirements for admission to the study of medicine are rigidly determined by law in most states. In this state the question whether a candidate has met the legal requirement is decided by the State Education Department. It is necessary, therefore, for this department to evaluate the course of study in any institution, at home or abroad, from which an applicant comes. To so great an undertaking the Department has devoted much labor. The result is a table of values covering "secondary" institutions in every country of Europe and America, to say nothing of Egypt and Japan. [See "Department Activities"].

The immediate importance of this table of values lies in the fact that applicants for admission to professional study are likely to be more numerous in this State than in any other. It is probable also that the practice of New York will be followed generally and that the valuation employed in the case of prospective students in professional schools will sooner or later be employed for other students as well. The State Education Department, much criticised in certain particulars, has none the less rendered much valuable service to education both within and without this State; but if vindication of the importance of its function were needed, the completion of so far-reaching a service which few agencies were either willing or able to undertake might suffice.

**Items of interest in New York State.** Reference was made in the last two reports to the financial needs of higher institutions, which are being met through private gifts. Columbia University with its "undercapitalization" of approximately fifty million dollars, was used for illustration, which may very properly continue to serve that purpose. The president's annual report, released in November 1916, says: "If the university was truly described in 1902 as a giant in bonds, then in 1916 it is a whole company of giants bound hand and foot by financial impotence. This is the situation with which the trustees are day by day confronted, and it will remain to confront them, in one form or another until the time when their capital funds are increased by \$30,000,000."

Noteworthy events occurred during the school year 1915-16 in the following institutions of higher education, as reported by their executive officers. The institutions of the University not specifically mentioned in the following list either did not report items of special interest or had nothing out of the ordinary routine to report. No attempt is made to draw conclusions from these evidences of educational vitality. They are unstudied, as there

was no opportunity for the reporters to confer or make suggestions. The variety and extent of these noteworthy items seem in themselves most noteworthy, in that there is such an absence of repetition and such a variety of activities.

*Cathedral College.* The publishing of "The Story of Dramatics of Cathedral College from 1903 to 1917."

*Colgate University.* The building of the new chapel, and the completion of the alumni campaign for funds for a new gymnasium.

*College of the City of New York.* The introduction of the social science course, and the change in the requirements for admission from 14½ to 15 units.

*Hamilton College.* The entrance of a freshman class of 88 members, the largest class that ever entered; the building at an expense of \$40,000 of a new stone hall by the Sigma Phi society.

*Hobart College.* The greatly increased use of the library, and the marked development of a wholesome student sentiment.

*New York University.* The requirement of a second year of college work as preliminary to admission to the medical college; the provision for granting the two degrees of bachelor of science and doctor of medicine on the completion of a combined course in arts and medicine, six and one-half years in length; in the graduate department, the establishment of relations with the Brooklyn Botanic Garden under which the university is enabled to offer courses in botany in the laboratories of the garden; the organization in the school of commerce of a graduate division and an undergraduate day division.

*St Francis College.* The organization of a debating society having for its object the cultivation of eloquence, and a notable debate in philosophy discussed in Latin and in English by the junior and senior classes.

*St Stephen's College.* The death of the professor emeritus of Latin, the Rev. Dr George Bailey Hopson, who retired three years ago, after an uninterrupted career of fifty years of teaching the Latin language and literature, during which he was known to have missed only one class recitation.

*College of Mount Saint Vincent.* The work of the Alumnae Association continuing the effort to raise a \$100,000 building fund, and a very successful Shakspeare play and pageant in honor of the tercentenary year of the poet's death.

*College of New Rochelle.* The completion of a large addition to the college chapel, and the introduction of a secretarial course.

*Barnard College.* The Schiff gift of \$500,000 for a students' hall, and the Talcott Foundation of \$100,000 for religious instruction.

*D'Youville College.* The opening of music courses for the training of teachers and supervisors of music in elementary schools.

*Elmira College.* The admission into the Association of Collegiate Alumnae, that would mean little to a men's college, but is most significant to the women's; the gifts of \$130,000, making possible the erection of new buildings and adding \$30,000 to the endowment.

*Hunter College.* The establishing of regular college courses during the summer, thus utilizing the plant throughout the entire year.

*Vassar College.* The celebration of the fiftieth anniversary, with the inauguration of President MacCracken; the raising of the million dollar endowment; the inauguration of the new plan of comprehensive entrance examinations.

*Wells College.* The installation of a new sewage system, and the addition of \$100,000 to the endowment.

*Adelphi College.* Changes in the course of study, and the introduction of a new course leading to the degree of bachelor of science in education; the discontinuance of the art department; a material increase in the number of students entering.

*Alfred College.* The discontinuance of Alfred Academy as a preparatory school; a bequest of \$50,000 to the college.

*Cornell University.* The election to the board of trustees of representatives from the faculty. "The first time, we believe, in American universities, where faculty members are sitting on terms of equality with other members of the board of trustees"; the beginning of a solution of the student housing problem. The question of conferring honorary degrees in connection with the program for the celebration of the university's semicentennial in 1918 was specially considered by the university faculty, and it was decided with virtual unanimity that "it is unwise for the university to depart from its fixed policy of not conferring honorary degrees."

*St Lawrence University.* The selection of a president, and the installation of a dean of women.

*Syracuse University.* The construction of the Joseph Slocum College of Agriculture costing \$300,000; the placing of the University Hospital of the Good Shepherd on a sound financial basis.

*Alfred Theological Seminary.* A very successful summer school, and twenty-five college students now studying religious education.

*Auburn Theological Seminary.* Summer schools have passed the experimental stage and have fully justified themselves as real schools. The summer schools are not conferences or assemblies. Steady progress is making in the modernizing of theological education.

*Colgate University Theological Seminary.* The successful pursuit of the "even tenor of our way."

*The General Theological Seminary.* The unusual number of men of very high standing in the last senior class—seven in a class of thirty-six.

*The Jewish Theological Seminary of America.* The death of the president, Dr Solomon Schechter; the appointment of Dr Israel Davidson, as professor of Mediaeval Hebrew literature.

*Rochester Theological Seminary.* The inauguration of President Clarence A. Barbour, professor of homiletics; the lamented death of Walter R. Betteridge, professor of the Hebrew language and literature; graduation of one of the largest classes in May.

*St Bonaventure's Seminary and College.* The erection of a gymnasium; the introduction of wireless telegraphy.

*St Joseph's Seminary.* Numbers have increased so greatly and so rapidly that there is absolute need to extend the building or erect a new building.

*Union Theological Seminary.* The retirement of Prof. Marvin R. Vincent after 29 years' active service; the inauguration of Rev. Frederick J. Foakes as the first incumbent of the Charles A. Briggs Professorship of Christian Institutions.

*Columbia University, School of Law.* The appointment for the academic year 1916-17 of Harold Hazeltine, as lecturer. Mr Hazeltine is reader in English law at the University of Cambridge, England, and is delivering a series of lectures on English legal history.

*New York Law School.* "Like the guides at the pyramids—when the summit is reached they have to go down and get some more; so the process is never-ending but always interesting."

*Syracuse University, College of Law.* The graduation of the last class containing students to be awarded the degree of LL.B., without having taken some college work in preparation therefor; the raising of the tuition by adding one-half thereto, it being now \$150 besides incidentals.

*New York State College for Teachers.* Extension courses for teachers in active service were opened October 1, 1915, conducted in Albany, Troy and Schenectady, and 193 teachers were enrolled; the requirements for the bachelors' degrees are stated in the group system.

*College of Physicians and Surgeons.* The action of the trustees concerning the school of dentistry and the admission of women.

*Cornell University Medical College.* The reorganization of the surgical service at Bellevue, and the symposium held in the third term of the fourth year class.

*Fordham University, School of Medicine.* The increase of the requirements for admission to the school to two years of college work, in 1918; the rearrangement of the surgeons at Fordham Hospital, through the courtesy of Bellevue and allied hospitals.

*The Long Island College Hospital.* A complete reorganization. A new by-law setting an age limit for professors and visiting physicians and visiting surgeons; at the age of 65 they are automatically retired. An active campaign to raise \$1,000,000 endowment for the college.

*New York Medical College and Hospital for Women.* The advancement of the preliminary requirements to college grade work; the plan to raise funds for the college.

*Polyclinic Hospital.* The employment of motion pictures of surgical operations as an adjunct to the teaching of surgical technic; the inauguration of courses of individual instruction to graduate physicians.

*New York Post-Graduate Medical School and Hospital.* The elaboration and simplification of the various chemical reactions used in blood chemistry in the determination of the etiology, pathology and treatment of diseases; the extension and application of the usefulness of X-ray technic.

*The University and Bellevue Hospital Medical College.* The extending of the clinical teaching of the fourth year class to a number of hospitals which heretofore had not been available for teaching.

*Syracuse University, College of Medicine.* An enrolment equal to that which was customary before the raising of the standard of admission to two years of college work; the improvement in the students and the character of their work is noted by the members of the faculty.

*University of Buffalo, Medical Department.* The gift of \$500,000 as the beginning of the Knox Foundation, and the Edmund Hayes gift of \$250,000 for the key building on the university campus.

*Union University, Albany Medical College.* The addition on the board of trustees of men of reputation from other cities; the director of the division of laboratories and research of the State Department of Health has assumed immediate charge of all the work in public health in the college.

*College of Dental and Oral Surgery.* The gift of \$50,000 for the new building, lots for which have been purchased; a department for the correction of defects of speech, in connection with orthodontia.

*New York College of Dentistry.* Negotiations in regard to a university affiliation, and greater attention to keeping a record of the attendance of students.

*University of Buffalo, Dental Department.* Compelling the purchase of textbooks by students and seeing that they actually use them; a lecture-recitation system, that is, the professor gives a lecture once a month, explaining enough technic in the textbook for four recitations, and the classes are divided into sections of thirty-five each and are quizzed on the text which the professor has explained in the lecture. They are getting much more out of the work than when lectures were the main source of instruction.

*Albany College of Pharmacy.* The raising of the entrance requirements to two years of high school work.

*Brooklyn College of Pharmacy.* Completion of twenty-five years of work by the college, and the matriculation of the largest number of students in its history.

*Columbia University, College of Pharmacy.* The largest student body in the history of the school, and the largest ratio of university students matriculating on the basis of high school graduation.

*New York State Veterinary College, New York University.* Increased student enrolment, and additional facilities for the veterinary school.

*New York State Veterinary College, Cornell University.* A large increase in the number of students and their high educational preparation; the last year in which the students were admitted to a three-year course.

*Clarkson College of Technology.* The graduation of the largest class (35) with the degree of bachelor of science in engineering.

*Columbia University, School of Mines, Engineering and Chemistry.* The new three-year advanced courses leading to the

professional engineering degrees; the degree of master of science is now under the jurisdiction of the faculty of applied science, which is open to students having the necessary bachelor's degree in the subject in which they wish to do their work for the master's degree.

*New York University, School of Applied Science.* Evening courses in engineering subjects by the extramural division of the university.

*Polytechnic Institute of Brooklyn.* The raising of \$500,000 to reestablish the preparatory department on a suburban site, and its incorporation on July 1st as the Polytechnic Preparatory Country Day School.

*Rensselaer Polytechnic Institute.* The establishment of a system of dormitories and of a dining hall.

*Syracuse University, L. C. Smith College of Applied Science.* The unprecedented demand for graduates and the increased number of students studying chemical engineering.

#### CHARTERS, DEGREES AND LICENSES

The acts and rules under which charters, degrees and licenses are issued by the Regents are set forth in the Decade Report, and are not repeated here.

**Charters.** During the year the Regents incorporated or amended the charter of the following institutions. More detailed information, concerning the incorporations and the powers conferred, appears in the Journal of the Board of Regents.

November 19, 1914

The Daughters of Israel, Newburgh; as a school for the instruction of Hebrew children in the language, religion and history of their race; provisionally for five years.

The Savage School for Physical Education, New York; a stock company, power to issue \$10,000 capital stock; provisionally for five years.

Smith Business School, Elmira; stock company, power to issue \$10,000 capital stock; provisionally for five years.

Von Ende School of Music, New York; stock company, power to issue \$25,000 capital stock; provisionally for five years.

March 4, 1915

New York Red Cross Hospital Alumnae Association, New York; as an association of graduates of the New York Red Cross Hospital and Training School for Nurses; provisionally for five years.

Wood's Business School, Brooklyn; charter amended by increasing number of trustees to four.

June 24, 1915

The Misses Masters School, Dobbs Ferry; charter amended to permit the board of trustees to grant pensions to former teachers, officials and employees.

New York Business Institute; charter revoked.

September 16, 1915

The Historical Society of the Town of Warwick, Warwick; provisionally for five years.

Mary Immaculate School of Eagle Park, Ossining; as an academic and elementary day and boarding school; provisionally for five years.

Hope-Jones Unit Orchestra School, North Tonawanda; corporation dissolved, charter surrendered.

December 2, 1915

Peking University, China; charter amended by changing name from "Trustees of Peking University" to present title.

**Degrees.** The Regents confer degrees under three classes of institutions, namely, the chartered foreign institutions, the separate professional institutions and the provisionally chartered institutions. During the year the following institutions were authorized by the Regents to confer and did so confer degrees upon their graduates as follows: bachelor of arts, 18; bachelor of science, 14; bachelor of divinity, 31; doctor of medicine, 12; doctor of dental surgery, 400; bachelor of library science, 15; total degrees conferred by the Regents for the year, 490.

**Bachelor of arts.** On the following eighteen graduates of the University of Nanking, Nanking, China:

Chang Chi Yih  
Chen Chuen Ho  
Cheng Yü Gwan  
Cheo Teh Hsi  
Kung Tsen  
Liu Chün  
Liu Tsung Luh  
Tsü Ying Ho  
Wang Chwen Yung

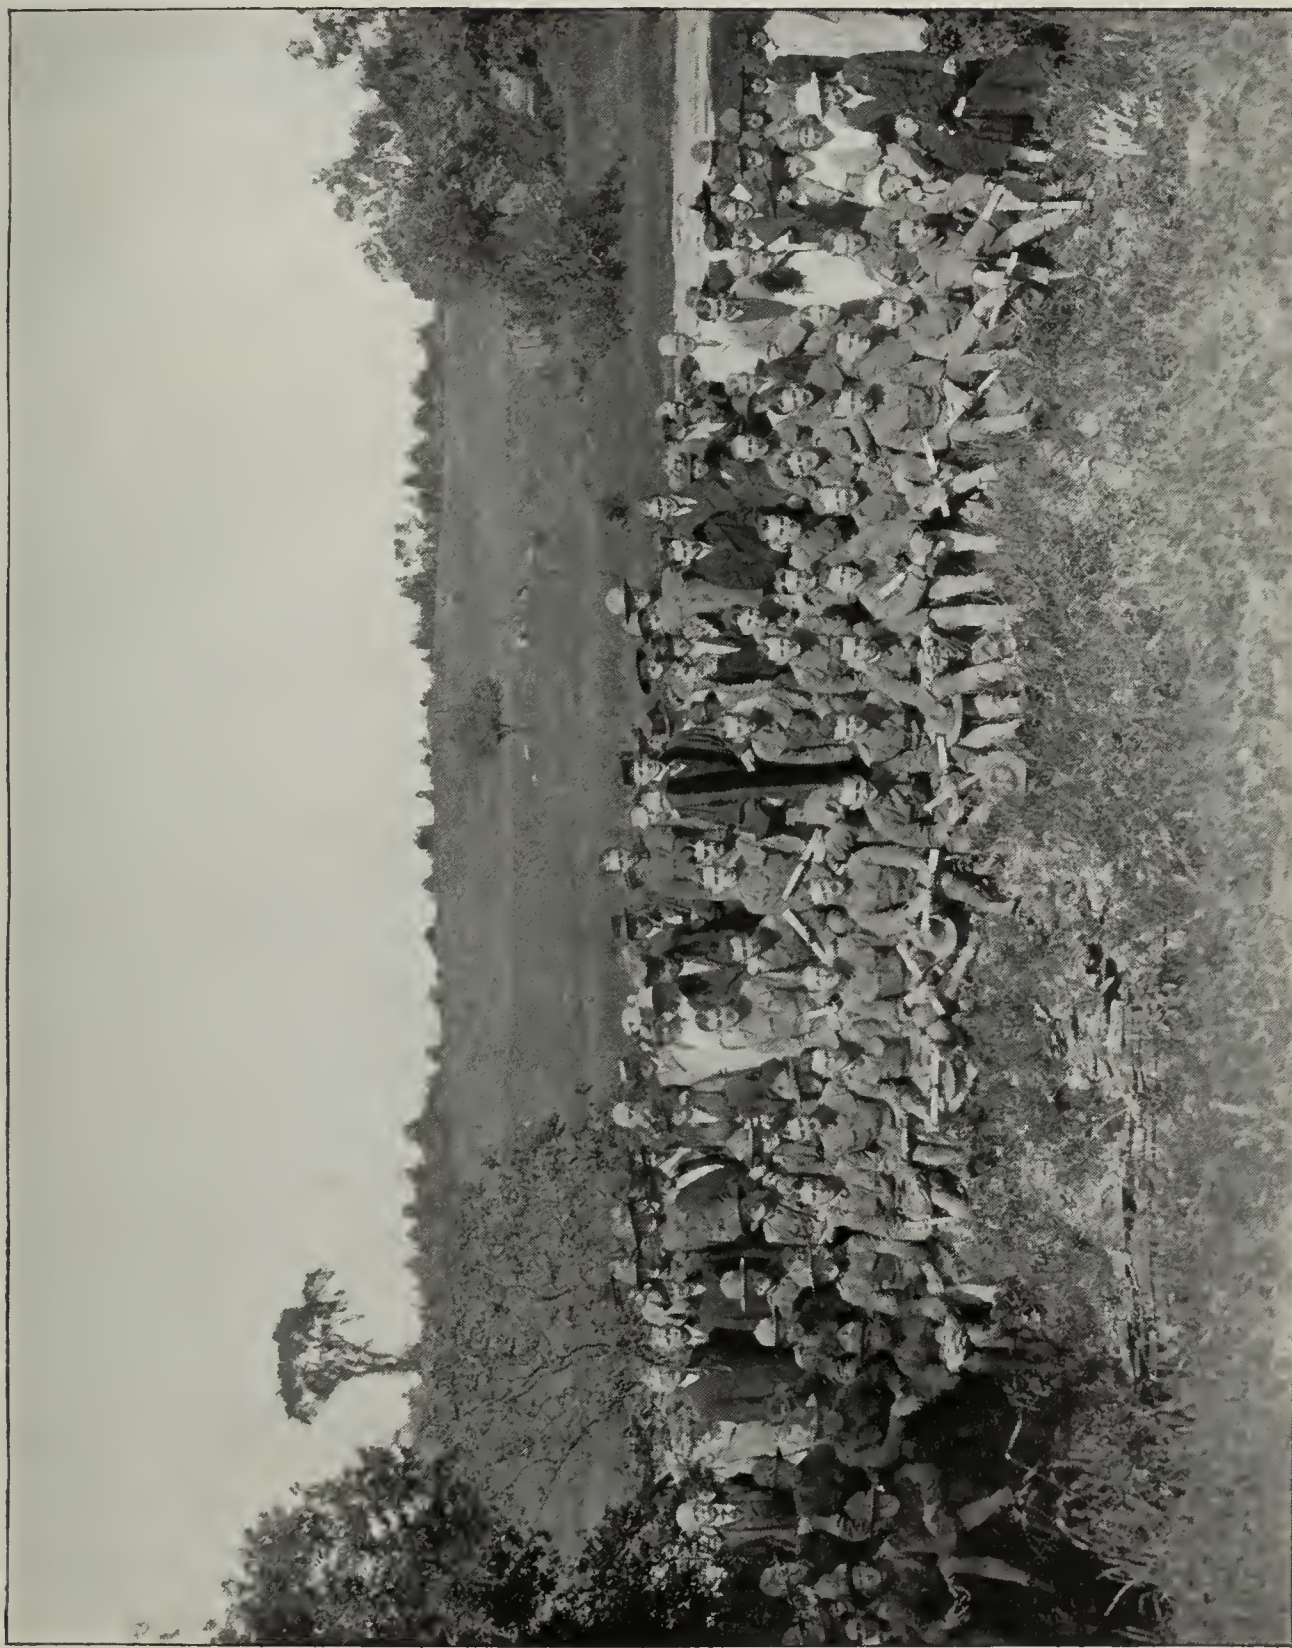

Cheo Chi Kao  
Hu Hsioh Yuen  
Hung Yu Feng  
Li Chen Hwang  
Li Wei Nong  
Ren Ying Chong  
Gardner Tewksbury  
Tung Chi Tao  
Wu Tong Choh

**Bachelor of divinity.** On the following thirty-one graduates of Union Theological Seminary:

Adams, David Ernest  
Auld, Walter Richard  
Bennett, Vincent Leroy  
Bentson, Henry Arthur  
Borders, Karl  
Brown, Elmer Leonard  
Chaffee, Edmund Bigelow  
Croyle, Harley Irwin  
Douglas, George Harley  
Gaige, Hurlburt Gerald  
Gilkey, James Gordon  
Kastanek, Rudolph  
Leger, Samuel Howard  
Lemkau, John Henry  
McInnis, John Lewis  
MacLeod, Wilfred John

Merrill, Randolph Seaman  
Newell, Frederick Buckley  
Pardee, Charles James  
Pierce, Lorne Albert  
Pontius, Paul Reid  
Romig, Edwin Blaine  
Ryder, Raymond Muse  
Stevenson, John McGown  
Swift, Arthur Lessner, Jr  
Tyler, Edward Ernest  
Westerfield, Walter Henry  
Wills, Alvin Lamar  
Wilson, James William  
Woodward, Charles Alexander  
Young, William Harold

Union University conferring degrees in 1917. President Richmond and the class at the military training camp.

**Bachelor of science in civil engineering.** On the following fourteen graduates of Mackenzie College, Sao Paulo, Brazil:

Braulio Pereira Barretto  
Braulio Guedes daSilva  
Domicio deLacerda Pacheco e Silva  
Eduardo William Shalders  
Elon Rodrigues Alves  
Fernando Aguirre deMoraes Barros  
Fernando Botelho Villela

Fileu daSilveira Machado  
Gumerindo Pereira dos Reis  
Heitor de Vargas Cavalheiro  
João Fonseca de Camargo e Silva  
João Henrique Diniz  
José Pedro de Castro Filho  
Sebastiao Cintra Cunha

**Doctor of medicine.** On the following twelve graduates of New York Medical College and Hospital for Women:

Collins, Vera Lillian  
Cootner, Rosetta Aida  
Ginsburg, Rose-Vera-Woolf  
Hathaway, B. Cordelia  
Humphreys, Frances A.  
Israel, Hildred Danziger

Mintzer, Ida J.  
Morse, Ellen M.  
Pitt, Marion Goldie  
Roney, Helen Burt  
Teichmann, Rebecca  
Treat, Lillian A.

**Doctor of dental surgery.** On the following one hundred twenty-five graduates of the College of Dental and Oral Surgery of New York:

Alstadt, Benjamin  
Bach, Kaufman  
Barrall, Louis Alexander  
Berman, Bessie  
Berman, Louis Manvice  
Bevier, Monroe Brown  
Birnberg, Leopold  
Blanck, Lillian  
Bowman, Ralph Freeman  
Boyer, Morris Judah  
Broff, Maurice Henry  
Browman, Sarah  
Brown, Charles Harold  
Brust, Robert Bernhardt  
Campbell, Alger Leon  
Celniker, Samuel Jacob  
Cooper, Leo  
Croker, Arthur Gerald  
Dickerson, Leon Everett  
Durkee, Clarence George  
Edelman, Emanuel  
Ellis, Rachel  
Elphant, Edward Harold  
Esakov, Niman  
Ewings, Norman Morton  
Feldman, Ella Sylvia  
Feldstein, Bernard  
Felsenfeld, Joseph Louis  
Finder, Harry Theodore  
Fischer, Samuel Joseph  
Fortgang, Maurice Joseph  
Frieman, Charles Wenzel  
Furman, Morris Harry  
Garbulsky, Morris Mendelson  
Ginsburg, Matilda  
Gittelson, Moses  
Goldberg, Abraham  
Goldberg, Morris  
Goldburg, Abraham Bennett  
Goldfarb, Mary  
Goldfarb, Samuel Harold  
Goodman, Louis Sanders  
Gottlieb, George  
Graubart, Esther  
Gray, Leonard  
Guarini, Charles Dante  
Herman, Louis  
Herman, Louis Lawrence  
Hershkowitz, Max  
Hyman, Nathan Henry  
Jablow, Jacob Harry  
Jacobs, Adolph  
Jagendorf, Moritz Adolf

Jarmulowsky, Harry  
Katz, Jacob  
Kelly, John Joseph  
Kinney, M. DeLan  
Kivovits, Edward  
Klatzkin, Arthur  
Kopensky, Jacob  
Kremen, Meyer  
Kressin, Anna  
Lampert, Joseph  
Lefrak, Isaac  
Leight, Hyman  
Leikin, Meyer George  
Lerner, Harry  
Levenson, Bernard  
Levin, Morris  
Levinson, Leon Reuben  
Levit, Elsie  
Levitt, Abraham  
Levitt, Fannie  
Liebfreund, Leonard  
Littwin, Joseph  
Livant, Gussie  
Lowenthal, Louis  
Maisel, Bella Rubenstein  
Marcus, Benjamin  
Mashkowitz, Myron Irving  
McCaffrey, John Aloysius  
Meinwald, Herman  
Mensching, Frederick Francis  
Messinger, Max  
Minion, Stephen Harold  
Monash, Alexander  
Moss, David Irving  
Mulcahy, Joseph Francis  
Neulinger, Arnold Jerome  
Neveloff, Bessie  
Ogur, Charles  
Paskow, Harry Aaron  
Perlman, Maxim Robert  
Rabinowitz, Celia  
Rappaport, Louis Hirsch  
Reed, Albert Edward  
Reff, Maurice  
Reiss, Margaret Elizabeth  
Roller, Morris  
Rosenberg, Samuel  
Rosenfeld, Henry Nathaniel  
Rosenson, Mitchell Leonard  
Rosenthal, Morris  
Rosenzweig, Alexander  
Schelpert, John William, Jr  
Schlissel, Harry

Schmitt, Edgar Wallace  
 Schoen, Joseph  
 Schoenberg, Jacques  
 Schoenberg, Mollie  
 Shandel, Bessie Louise  
 Shapiro, Ada  
 Shapiro, Benjamin  
 Sharaga, Leontine  
 Sheahan, Edwin Joseph  
 Shenker, Simon Alter

Spielberger, Max  
 Steinhart, Pauline  
 Steurer, William Henry  
 Strong, Roland Edward  
 Warfield, Florence  
 Webb, Arthur Cleary  
 Weyler, Jacob  
 Wien, Nathan  
 Wilen, Charles Henry

On the following two hundred seventy-five graduates of the New York College of Dentistry :

Aaron, Irving Pensak  
 Abowitch, Solomon  
 Adorjan, Bernard  
 Arnold, Isador  
 Balter, Abraham Joseph  
 Baron, Harry  
 Becher, Isidor Oscar  
 Becker, Charles William  
 Beer, Herman Harvey  
 Bellet, Jacob Alfred  
 Berkowitz, Benjamin Bernard  
 Berman, Arthur Emanuel  
 Bernstein, Abraham Isaac  
 Beyer, Samuel  
 Bick, Charles  
 Blank, Isidor  
 Blatt, Isidor  
 Blumen, Harry  
 Blumenthal, Emanuel  
 Blumenthal, William

**Bachelor of library science.** On the following fifteen graduates of the New York State Library School:

Bailey, Beulah  
 Brown, Ruth L.  
 Emerson, Ralf P.  
 Furbeck, Mary E.  
 Hall, Anna G.  
 Haynes, Marguerite B  
 Hull, Edna M.  
 Kemmerer, Leila

McCollough, Ruth D.  
 Meisel, Max  
 Overholtzer, Katherine A.  
 Price, Marian  
 Shields, Ethel A.  
 Thompson, Elizabeth H.  
 Webb, William

**Licenses.** Under the professional laws, the Regents conducted at stated intervals during the year examinations for admission to the practice of teaching, medicine, dentistry, pharmacy, as druggists, veterinary medicine, optometry, chiropody, for the registration of nurses, the certifying of public accountants and of shorthand reporters.

It has not been the policy of the State to make the advancing requirements of its professional laws retroactive. Hence licenses continue to be issued under earlier statutory requirements, which are reported under the item of exemptions. These exemptions annually diminish.

As the result of State examinations during the year, the Regents licensed 553 physicians, 9 osteopaths, 464 dentists, 327 pharmacists, 124 druggists, and 29 veterinary surgeons. They registered 1132 nurses, 47 certified public accountants, 27 optometrists, 36 chiropodists and 5 certified shorthand reporters.

Under the exemptions of the various professional laws, the Regents also licensed during the year 36 physicians, 22 dentists, 45 pharmacists,<sup>1</sup> 3 druggists,<sup>1</sup> 22 veterinary surgeons, and registered 91 nurses, 5 optometrists and 4 certified shorthand reporters.

The licenses granted by the Regents during the year on examination and exemption are given in tabular form on other pages of this report. In those tables the candidates are given in three groups: (1) New York schools; (2) schools in other states; (3) schools in foreign countries. Information is also given regarding their professional education and the method of securing a license.

**Registration.** The higher institutions of Canada and the United States registered by the Regents during the period August 1, 1915 to December 31, 1916; also those whose registration was rescinded. Arranged alphabetically by provinces or states.

### Canada

New Brunswick. General Public Hospital, St John. Superintendent, Maude E. Retallick. Sec. 421, 14 S 16.

Toronto Western Hospital, Superintendent, Beatrice L. Ellis. Sec. 421, 14 S 16.

### United States

Arkansas. Arkansas College, Batesville. Acting president, D. M. Frierson. B.A. Sec. 403, 27 Ap 16.

California School of Jurisprudence, University of California, Berkeley. Director, William C. Jones. Sec. 407, 2 D 15.

Clara Barton Hospital, Los Angeles. Superintendent, M. C. Hodgdon. Sec. 421, 16 S 15.

---

<sup>1</sup> In exchange for licenses issued under former boards of New York State.

- District of Columbia. Columbia Hospital, Washington. Superintendent, Lucy Minnigerode. Sec. 421, 14 S 16.
- Georgia. Mercer University, Macon. President, W. L. Packard. B.A., B.S. Sec. 404, 14 S 16.  
Mercer School of Pharmacy, Macon. Dean, W. F. Gidley. Ph.G. Sec. 411 (19), 14 S 16.
- Illinois. Knox College, Galesburg. President, Thomas McClellan. B.A., B.S. Sec. 404, 16 S 15.  
Chicago College of Osteopathy. Dean, W. Burr Allen. Sec. 409, 2 D 15 (as of 20 S 15).  
Michael Reese Hospital, Chicago. Superintendent, Elizabeth C. Burgess. Sec. 421, 14 S 16.  
Wesley Memorial Hospital, Chicago. Superintendent, Bertha L. Knapp. Sec. 421, 19 O 16.
- Indiana. Franklin College, Franklin. President, E. A. Hanley. B.A., B.S. Sec. 404, 24 F 16.
- Iowa. Mt St Joseph College, Dubuque. President, Sr. Mary Chionia. B.A., B.S. Sec. 404, 16 S 15.
- Maryland. St Joseph's College, Emmitsburg. President, Sister Francis. B.A. Sec. 404, 2 D 15.  
University of Maryland School of Medicine and College of Physicians and Surgeons. Dean, J. M. H. Rowland. Sec. 409, 28 N 16.  
Maryland State Agricultural College, College Park. President, H. J. Patterson. B.S. (gen. Sec. 404, B.S. in Agr. and Eng. Sec. 403, 27 Ap 16.
- Massachusetts. Boston College. President, Charles W. Lyon. B.A., Ph.B., B.S. Sec. 401, 21 O 15.  
College of the Holy Cross, Worcester. President, James A. Mullen. B.A., Ph.B. Sec. 401, 21 O 15.  
Burbank Hospital, Fitchburg. Superintendent, Freeman A. Tower. Sec. 421, 24 F 16.  
Lawrence General Hospital. Superintendent, Martha P. Parker. Sec. 421, 21 O 15.  
Long Island Hospital, Boston Harbor. Superintendent, Mary A. Meyer. Rescinded Sec. 421, 28 N 16.  
Lynn Hospital. Superintendent, Mrs Frances A. Worrall. Sec. 421, 2 D 15.  
Leland Powers School of the Spoken Word, Boston. Principal, Leland Powers. 27 Ap 16.  
Peter Bent Brigham Hospital, Boston. Superintendent, Carrie M. Hall. Sec. 421, 24 F 16.
- Missouri. Drury College, Springfield. President, James G. McMurtry. B.A. Sec. 404, 27 Ap 16; B.S. Sec. 403, 27 Ap 16.  
Washington University Hospital, St Louis. Superintendent, Julia C. Stimson. Sec. 421, 27 Ap 16.
- Montana. School of Pharmacy, University of Montana, Missoula. Dean, Charles E. Mollet. Ph.G. Sec. 411 (19), 1 J1 16.
- New Hampshire. New Hampshire State Hospital, Concord. Superintendent, Bertha Conwall. Sec. 421, 21 O 15.  
New Hampshire College of Agriculture and Mechanic Arts, Durham. President, E. F. Fairchild. B.S. in Ch.E. Sec. 404 (restricted).

New Jersey. College of Jersey City. Dean, Joseph Koppel. Sec. 411 (19), 21 O 15.

Paterson General Hospital. Superintendent, Annie M. Keaver. Rescinded Sec. 421, 24 F 16.

Elizabeth General Hospital. Superintendent, Eugenia D. Ayers. Rescinded Sec. 421, 14 S 16.

Muhlenberg Hospital, Plainfield. Superintendent, Jessie M. Cann. Sec. 421, 14 S 16.

St Mary's Hospital, Passaic. Superintendent, Sr. M. Rose Vincent. Rescinded Sec. 421, 28 N 16.

New York. Adelphi College, Brooklyn. President, Frank D. Blodgett. B.S. in Ed. Sec. 404, 24 F 16.

Columbia University, New York. School of Journalism. Director, Talcott Williams. B.S. in Journalism. Sec. 403, 16 S 15.

College of Pharmacy. Dean, Henry H. Rusby. Ph.C. Sec. 411 (20), 16 S 15.

School of Mines. Dean, Frederick A. Goetze. B.S. in Ch. Sec. 404 (restricted), 16 S 15.

Cornell University, Ithaca. President, Jacob Gould Schurman. B.Ch. Sec. 401, 21 O 15.

University of Buffalo. Secretary, Julian Park. 1st year of arts and science, 16 S 15.

Bushwick Hospital (Jewett), Brooklyn. Superintendent, Mary H. Bodine. Sec. 421, 24 F 16.

Eastern District Dispensary and Hospital, Brooklyn. Chairman, Otto Struse. Rescinded Sec. 421, 1 J1 16.

Olean General Hospital. Superintendent, Ethel M. Henders. Sec. 421, 24 F 16.

Physicians Hospital, Plattsburg. Superintendent, Iva J. Godshalk. Sec. 421, 1 J1 16.

S. R. Smith Infirmary, Tompkinsville. Superintendent, Mrs Charles Goodwin. Rescinded Sec. 421, 28 N 16.

St Joseph's Hospital, Elmira. Superintendent, Sister Rose Alice. Sec. 421, 24 F 16.

Staten Island Hospital, Tompkinsville. Superintendent, Mrs Charles Goodwin. Sec. 421, 28 N 16.

Rensselaer Polytechnic Institute, Troy. Director, Palmer C. Ricketts. B.S. (gen.) Sec. 401, 16 S 15; C.E., M.E., E.E., Ch.E. Sec. 404 (restricted), 16 S 15.

Union University, Schenectady. Chancellor, Charles A. Richmond. B.E. Sec. 404 (restricted), 19 O 16.

North Carolina. Salem College, Winston-Salem. President, Howard E. Rondthaler. B.A. Sec. 403, 16 S 15.

Ohio. Ohio State University, Columbus, College of Homeopathic Medicine. Dean, Claude A. Burrett. Sec. 409, 21 O 15; College of Medicine. Dean, W. J. Means. Sec. 409, 21 O 15.

Grant Hospital, Columbus. Superintendent, Mary A. Jamieson. Sec. 421, 24 F 16.

Mount Sinai Hospital, Cleveland. Superintendent, Claribel Wheeler. Sec. 421, 28 N 16.

- Oklahoma. University of Oklahoma, Norman, School of Law. Dean, Julien C. Monnet. Sec. 407, 24 F 16. School of Pharmacy. Dean, Charles H. Stocking. Sec. 407, 24 F 16.
- Oregon. Pacific University, Forest Grove. President, C. J. Bushnell. B.A. Sec. 403, 27 Ap 16.
- Pennsylvania. Geneva College, Beaver Falls. President, W. Henry George. B.A., B.S. Sec. 404, 21 O 15.  
 Allegheny General Hospital, Pittsburgh. Principal, Lottie A. Darling. Sec. 421, 28 N 16.  
 Columbia Hospital. Superintendent, M. Ruth Eby. Rescinded Sec. 421, 28 N 16.  
 Pottsville Hospital. Superintendent, Mrs Hilker. Rescinded Sec. 421, 28 N 16.  
 Pennsylvania State College. President, Edwin E. Sparks. B.S. in Agr. Ch. Sec. 404 (restricted), 1 J1 16.
- Porto Rico. University of Porto Rico, Rio Piedras. College of Liberal Arts. President, Paul C. Miller. B.A., B.S. Sec. 403, 2 D 15.  
 College of Law. Dean, Fred K. Fleagle. Sec. 407, 27 Ap 16.  
 College of Agriculture and Mechanic Arts. Dean, R. S. Garwood. B.S. in Agr.E., B.S. in E.E., in C.E., in M.E., in Sugar Ch. Sec. 403, 27 Ap 16.
- Rhode Island State Hospital for the Insane, Howard. Superintendent, A. H. Harrington. Sec. 421, 21 O 15.
- South Carolina. College of Charleston. President, Harrison Randolph. B.A., B.S. Sec. 403, 25 My 16.
- Tennessee. Southwestern Presbyterian University, Clarksville. President, J. R. Dobyns. B.S. Sec. 403, 19 O 16.
- Texas. Southwestern University, Georgetown. President, Charles McT. Bishop. B.A. Sec. 404, 24 F 16.
- Utah. University of Utah, Salt Lake City. President, John A. Widtsoe. B.A. Sec. 404, 19 O 16.

- West Virginia. West Virginia University, Morgantown. School of Medicine. Dean, James M. H. Rowland. Sec. 409, 28 N 16.  
 Department of Pharmacy. Dean, John N. Simpson. Sec. 411, 19 O 16.
- Wisconsin. Milwaukee-Downer College. President, Ellen C. Sabin. B.A., B.S. Sec. 404, 2 D 15.

**Foreign institutions.** By reason of present conditions that make correspondence with the institutions of the University without the territory of New York difficult, if not wholly impracticable, the policy is continued of reporting the conditions in these institutions and their statistics under a separate heading from the higher institutions in the State.

During the year progress was made in the restoration of lost records, as well as the more formal acts of incorporation.

*Brazil*

*Mackenzie College.* January 10, 1916 President Alexander, of the board of trustees, when forwarding the certification of graduates of the college, reported, "that shortly after signing this certificate your representative, Dr Orville Derby (Cornell '73), committed suicide at Rio in the Hotel dos Estrangerios." March 16th he reported that President Waddell was on his way to New York to attend a meeting of the board of trustees and would "give a first-hand impression of what the college is doing and preparing to do." In April the president of Mackenzie College and the Assistant Commissioner for Higher Education conferred regarding an additional year's work in the college, which resulted in the following understanding:

It is proposed to add six months to the present course leading to the degree of B.S. in C.E. before certification shall be made to the Board of Regents that students pursuing this course are entitled to receive a diploma at the hands of the Board of Regents. This will lead to our making the certification of the president and representative of the Board of Regents in June instead of in November.

By this procedure the diplomas may be received at the college by the middle or last of October.

During the semester intervening between the date of certification in June and the regular commencement exercises in November, the students thus certified will still be under instruction in what may be termed a semester of graduate work. The satisfactory completion of this semester of graduate work will determine whether the signatures of the college authorities shall be placed upon the diplomas as of the date of the completion of such graduate work.

The diploma will be withheld from any student failing to complete satisfactorily such semester of graduate work until such a time as he shall have satisfactorily completed the work; and his failure to complete the work within one year from the time when he should normally have completed the work, will result in the unused diploma being returned to the Board of Regents for cancelation.

*China*

*Educational Bureau of Chiaoyupu.* During the year the Chinese educational commissioner to America (the Honorable U. Y. Yen), the title of whose bureau is the above caption, rendered valuable assistance to the Department in obtaining information concerning

Chinese institutions of higher education. His offer of service, both by way of explaining present conditions and also of translating into the English, official Chinese documents, has proved of great service in our study of secondary and higher educational conditions in foreign countries.

*Canton Christian College.* America's interest in China is permanent and sure to increase to vast proportions, to the mutual benefit of both countries. With an increase in cooperation there will be greater appreciation of the Chinese, who are a social and friendly people, capable of a high development along modern lines. We must all wish to have a share in helping them realize their material, intellectual and spiritual possibilities. The question is, "How can we do this most effectively?"

The trustees naturally wish to get *the whole case* of the Canton Christian College clearly before those who are in a position to assist in its development. There are certain higher schools that naturally grow out of its general work as branches out of a tree, or can be satisfactorily grafted upon the main trunk if the roots and trunk are sufficiently strong. The college is an educational mission to China under Christian auspices, managed by trained educationalists who take the educational point of view and thus are able to give the foundation training necessary to good professional schools.

Anyone beginning a financial, commercial, manufacturing, mining, agricultural or religious enterprise in China will quickly discover that he is in a large measure engaged in a work of education, is in fact conducting a school, and that a large part of what should be legitimate profit is absorbed in the finding and training of men. Much may be said of the industrious, honest Chinaman, but one may look in vain for specialists of any kind, or for dependable local managers and workmen who will find out exactly what is the matter in a given case and provide the remedy. The basal man is doubtless as good as that found in any other part of the world but he is not yet fit for the higher social organization of the modern world. The most serious deficiency is the moral one. Men are seeking official and other positions which they are incapable of filling. Hence to secure and retain a really competent and dependable body of workers it is better to begin with the young and to train them under men of marked ability and integrity who are at the same time interested in their welfare and progress. This is exactly what the Canton Christian College is doing.

We do not wish to overstate the claims of Canton as an educational center but we wish to emphasize its strategic importance.

There is much misinformation afloat about South China, which has its origin chiefly in the North. The people of Kwangtung, while speaking a different language or dialect, have contributed many leading business men and statesmen to the North, and are among the most advanced of all the Chinese in their willingness to deal with and learn from foreigners. Witness the fact that China's ministers or ambassadors to other countries, legation secretaries and consuls are still for the most part Cantonese, and that these same people are found in a multitude of places in a great variety of businesses and professions in all parts of the world.

The fact that one-fourth of all Protestant Christians in China live in the province of Kwangtung is enough of itself to show that its people are ready and eager for modern education. It is sad to relate, however, that there are no really high grade schools for them to go to, certainly none which has an educational plant and teaching staff, such as would be deemed adequate in America for the full training of teachers and professional men. The old style private or home school, with its one man teacher in Chinese classics, is rapidly going out with an undeveloped modern system to take its place. Government schools have suffered serious setbacks due to the lack of continuity or a settled policy, and many and sudden changes in the personnel of governors, school directors and teachers. The methods of appointment and control have tended to suppress local initiative and development. There are, however, a large number of schools supported by the gentry throughout the province, in addition to five or six hundred primary and secondary schools and academies connected with the churches of the various denominations, and nearly forty missions. These schools are being encouraged and standardized through united efforts, the college serving as a common meeting ground for the purpose.

The Canton Christian College represents an effort to found in China a system of Christian schools from the kindergarten to the university with a sufficient number of trained Christian teachers to insure individual attention in and out of the classroom. It stands for the highest standards of educational efficiency and the development of Christian manhood. It aims to provide such academic and technical courses as will best serve the interests of the people of China, fitting the higher training to the individual aptitudes and capabilities of the students in order that their education may be directed to skilled service in the department of work which each may be called upon to enter. In the attainment of these aims, the policy of the college is to use qualified teachers,

preachers, lecturers, et al, and to conduct such conferences and summer schools as will make it an intellectual and spiritual center.

When the college reorganized its work and reopened in 1899-1900, it was obliged to get along as best it could in rented buildings. It was not until September 1904, that it moved to its present site into two long rambling bungalows. Now it has a plant costing \$300,000, or will have one costing that amount as soon as the money and subscriptions on hand designated for buildings has been fully expended. The history of the college during these fifteen years has shown that it is necessary to maintain lower schools as part of the social structure of the college in order to prepare the boys morally, intellectually and physically for higher work. Hence the college has been slower of development than otherwise would have been the case. With this more consistent foundation it is prepared to advance the grades by the natural demand of its own students. Its greatest need is a reliable income to give continuity to its work and not unduly overburden the trustees and faculty with the struggle to secure support.

The broad aspects of the undertaking and its higher educational aims can be seen in the outline given below. This can be realized in a comparatively brief period if adequate support is forthcoming:

- 1 A regular arts and science course, including the major sciences — mathematics, physics, chemistry and physiology.

- 2 A teachers' college or normal school, organized upon the model of the Teachers' College at Columbia University and the University of Chicago, with a graded school attached for observation and practice, running from the kindergarten through the primary and grammar grades. Teacher training, though not organized formally, has for some years been part of the work of the college.

- 3 A school of industries. This term may cover several training courses, some of which are incidental to the curriculum of the lower schools, such as manual training, and some of which lead to an industrial or technical career, such as printing, wood work, mechanical and electrical engineering, plumbing etc.

- 4 A medical school. In accordance with the design of the founders, the trustees took steps toward the establishment of a medical department in 1899 by sending out a competent physician. Up to that time medical education had been of a very simple order, conducted in a mission hospital, the students having had no previous scientific training, such as is now given at the Canton Christian College. The foundation for thorough courses in medicine and surgery is now well laid, and three additional physicians have joined the faculty who can be retained if proper support is forthcoming.

- 5 A school of agriculture. Nature study and gardening are already part of the regular course in the lower and middle schools. This department promises ultimately to be in peculiar favor and demand in the southern provinces, which are largely agricultural in their physical resources.

6 A school of economics, commerce and civics, with a peace bureau comprising a special library, museum and reception hall, should be established under the direction of competent university professors, with a correspondence school and extension work.

7 A woman's department will be opened as soon as the present work for boys is on a safe financial footing. The model kindergarten and primary school will serve for both boys and girls. The girls' grammar and middle schools will have separate buildings, though in some cases, especially in the Chinese classics, the same teachers may be used. In the college of arts, teachers' college and college of medicine the same laboratories and teachers in science will serve for both men and women until the numbers taking the higher courses justify separate plants. About twenty girls are now attending the primary school or receiving separate instruction in the higher grades.

In considering the amount of money actually required to make the Canton Christian College a strong educational center uniting Chinese and foreigners in the steady development of a Christian university with its lower and upper schools, one may say that \$50,000 is the least that is needed as an annual contribution from America. With this amount practically assured in the form of interest on endowment and annual gifts, the constituency of the college will rapidly increase and larger and larger gifts may be expected from both Chinese and Americans. \$100,000 per annum is actually needed for the college to take the place its Chinese friends seem to desire it to occupy; any less means a slower pace.

When once an educational system is set going in competent hands, without loss of continuity, as is now the case in the Government's educational efforts, it will grow with great rapidity and require a large staff of educators to meet the demand for teachers. The trustees and faculty have set themselves squarely to the task of teacher-training and by conducting separate schools for boys and girls, beginning in the grammar grades, within five years should be putting a large proportion of their middle school students into teaching work. Ten years hence, with proper support, the college should be graduating trained teachers by scores who will be establishing like model schools in all the chief towns and cities in the province. Government, local gentry and the people generally can be counted upon to cooperate, if the college, through its alumni, furnishes the educators, and thus the benevolent forces brought to work in harmony for the good of China.

For a summarized report of the year ending December 1916, *see* exhibit K, table 1.

*Fukien Province.* The development of closer relations between the University of the State of New York and the ministry of education in China has been referred to above, and it is fitting

to contrast therewith the changing conditions that face other educational interests in China. In March 1911 a conference of those interested in the higher Christian education for men in the Fukien province was held, at which Bishop J. W. Bashford set forth his problems. The last few years have witnessed a remarkable growth of state universities in the United States. During the same period the small and weak denominational colleges have found it impossible to compete with the better equipped and better supported state institutions. For example, the establishment of Chicago University, with its large endowment and superior equipment, has endangered the life of many of the small denominational colleges in the Mississippi valley. When this fact was brought to the attention of Mr John D. Rockefeller, he started a fund for the purpose of studying the small denominational colleges and assisting those that are strategically located.

The small denominational colleges in China are face to face with a situation similar to that in America. The government institutions are growing rapidly in number and efficiency, and they have at their command great resources. For example, the establishment of the Hongkong University within fifty miles of Canton Christian College will probably make it difficult for the latter institution to retain its students. The home boards will find it burdensome to supply funds for their respective colleges in China in sufficient amounts to keep them abreast of the government institutions. By combination or confederation only will they be able to meet the competition of the strong government institution, and there is hope that Mr Rockefeller and other individuals will out of their wealth assist well-established union Christian universities in China.

*University of Hongkong.* Incorporated under local ordinance March 30, 1911. Opened March 11, 1912, when the teaching staff of the Hongkong College of Medicine became lecturers in the faculty of medicine. On March 11, 1917, the college was to be dissolved and merged in the university. For further information, consult the Yearbook of the Universities of the Empire, and the publication of the institution.

*Fukien Union University.* At the conference referred to above, a resolution was adopted that it was not only desirable but essential to establish in the province of Fukien a Christian union university in which all the Protestant denominations may join, and which shall include bachelor, postgraduate, and professional courses. Copies of the minutes of the meeting were sent to the local secretary of each mission working in the province and

Swatow, with a view to bringing the matter to the attention of the authorities in the field and at home. Each mission concerned was asked to elect one representative to serve on a preliminary committee. Bishop Price of the Church Missionary Society was made convener of the committee and the Rev. Lewis Hodous of the American Board of Commissioners for Foreign Missions was made secretary.

Six missions duly appointed their representatives on the committee which held stated meetings in August 1911, February 1913, August 1913, March 1914, August 1914, March 1915 and July 1915. At this meeting the actions of the several missions on the establishment of the college were reported; the establishment of the college of liberal arts was approved; the board of managers appointed a committee on site for the Fukien Christian University, and a committee on incorporation was appointed, comprising Messrs Jones, Beard, Walsh, Eyestone, Williams and Hodous. The board of managers was instructed to inform the Chinese authorities of the progress made in the advancement of higher education in Fukien. It was voted to change the name from Foochow Christian University to Fukien Christian University, subject to the approval of the missions, and to ask the college that the preliminary committee be informed from time to time of the progress made by the college of liberal arts, the Foochow Union Theological School, the Amoy Union Theological School, the Foochow Union Medical School and the Foochow Union Normal School.

In May 1915 occurred the first meeting of the board of managers of the Fukien Union College of Liberal Arts, at which Prof. E. C. Jones was elected president and the Rev. W. Williams, treasurer.

In October 1915 a meeting of the managers of the college was held, at which provision was made for fees, enrolment, Chinese name and additional members on the faculty.

December 1915 the secretary wrote the president of The University of the State of New York, "We have come to the place where we feel the need of a charter to grant degrees and incorporation to enable us to hold the property which is slowly accumulating and is now being held by the various missions for the union schools. Could you kindly advise us as to the way to proceed with incorporation with the University of New York, as to form of our constitution, the board of trustees in America, and their relation to the board of managers in the field?" He reports the organization of the Foochow Union Medical School with 16 students; a

union normal school with 40 students; a union theological school with 88 students and a Fukien Union College (February 1916) with 80 students of college grade.

*University of Nanking.* This institution was incorporated by the Regents April 19, 1911 under the auspices of the Board of Foreign Missions of the Methodist Episcopal Church, the Christian Church and the Presbyterian Church. It was a union of Nanking University and Union Christian College without degree-conferring power. There were amendments to the charter in May and in December 1912. Baccalaureate degrees have been conferred jointly by the Regents and the trustees, as are reported elsewhere in these reports. The university includes the Nanking Medical School that was organized in 1910, affiliated with the university in 1912 and registered by the Regents in April 1915. There are at present seven departments comprising (1) the college, (2) the medical school, (3) the school of normal training, (4) the college of agriculture and forestry, (5) the department of missionary training, (6) the high school, (7) the middle school.

April 1915 Judge Charles E. Lobinger was appointed examiner to the University of Nanking by the Regents, to succeed Dr Amos P. Wilder.

For summarized report of the year ending December 1916, *see* exhibit K, table 1.

*Peking University.* In August 1915 Frank M. North, of the board of trustees of Peking University, applied for information regarding the revision of its charter with a view to promoting and securing union on the field and to bring about the proper combination of forces for the division of the responsibilities involved.

The "Trustees of Peking University" was incorporated in June 1890 under the act of April 12, 1848. "After twenty-five years of development, during which many students have been graduated, the staff of teachers has been enlarged and land acquired and buildings erected, the institution has reached a point where its character has become recognized in the capital city of China, where its friends and supporters desire so to strengthen its position as to enable it successfully to meet the larger ideals of education now beginning to dominate the Chinese Republic." After prolonged correspondence and the clearing up of technicalities the Regents amended the charter by changing the corporate name to Peking University, and by changing the second and third paragraphs of the certificate of incorporation, the details of which are given in the Journal of the Regents of December 2, 1915.

*Peking Union Medical College.* Reference is made in this report to the unification of educational efforts in China under the caption Foochow University, which finds further illustration and expansion in the chartering of Peking Union Medical College by the Regents February 24, 1916. In June 1915 the trustees of the London Missionary Society and the Rockefeller Foundation entered into an agreement to create a new body corporate for the purpose of conducting a medical college. The agreement shows also that the "Trustees of the Missionary Society are the owners of the Union Medical College and student quarters situated in Peking, China, and of the hospital near thereto, and also of the Women's Hospital, ladies residence, girls' boarding school, street chapel and adjoining rooms, dispensary buildings, church building and boys' boarding school and seven foreign residences and several Chinese residences. . . . In addition to the said London Missionary Society two other English societies, namely the Society for the Propagation of the Gospel in Foreign Parts and the Medical Missionary Association of London, and three American societies, namely, the Board of Foreign Missions of the Methodist Episcopal Church, the Board of Foreign Missions of the Presbyterian Church in the United States of America and the American Board of Commissioners for Foreign Missions are jointly interested in carrying on the work of the said Union Medical College."

In July 1915 an application for a charter under the Education Law for the China Medical Board of the Rockefeller Foundation was made to the Regents. "The Rockefeller Foundation was incorporated by special act of the Legislature of the State of New York (chapter 488, Laws of 1913), its corporate purposes being to promote the well-being of mankind throughout the world. Believing that a valuable service to humanity would be rendered by undertaking medical work in China, particularly along educational lines, the Foundation at a meeting held January 29, 1914, voted to establish a commission to study and report on conditions of public health and medicine in China. . . . The commission visited China and made an elaborate report. . . . On the basis of this report the Foundation decided to undertake a comprehensive plan for the improvement of medical and hospital conditions in China. The report of the commission has, in its general outlines, been adopted by the Foundation as a basis for its work in China, but details will be studied separately, and each project will be taken up for definite decision."

“To carry out this work the Rockefeller Foundation established a special organization called the China Medical Board of the Rockefeller Foundation. The plan outlined by the commission looks forward to the development of medical education in China as the first step toward effective work. Before hospitals can be established in larger numbers and before extensive work in public health and preventive medicine can be done, a large body of well-trained doctors, qualified to man hospitals and to administer public health measures must be secured. It is expected that the Foundation may find it desirable:

1 To assist missionary societies to strengthen their medical schools and hospitals by providing equipment and other facilities and by making annual grants, as may be found expedient, for the support of physicians and nurses selected by the respective missionary boards, subject only to the Foundation's approval of the professional qualifications of the appointees.

2 With the consent of the missionary boards, to reorganize and expand existing medical schools, with their hospitals, and to support these, wholly or in part, from its own funds.

3 To aid other medical schools that are not strictly missionary.

4 To establish, equip and support new medical schools and hospitals. In choosing its agents, physicians and nurses for independent schools or hospitals, the Foundation will select only persons of sound sense and high character who are sympathetic with the missionary spirit and motive, who are thoroughly qualified for their work professionally, and who will dedicate themselves to medical administration in China. Beyond these qualifications, the Foundation can not properly impose tests of a denominational or doctrinal nature, such as are deemed desirable by missionary boards for their own medical missionaries or agents.”

The board arranged for its second commission to visit China, three of whom were among the proposed incorporators of the board.

The commission, on its return from China reported that arrangements had been made with the Chinese authorities by which the China Medical Board of the Rockefeller Foundation could hold title to real estate without incorporating. Thereupon plans were made for an application to the Regents for the incorporation of the Peking Union Medical College, to be located at Peking, China, which resulted in a provisional charter, granted by the Regents February 24, 1916, under the above name, with thirteen trustees.

Until the granting of the absolute charter the Board of Regents will confer upon the graduates of the college, who, in the judgment of the Regents, have fully earned the same, suitable degrees of The University of the State of New York.

*St John's University and St Luke's Hospital in Shanghai.* An offer of conditional financial aid for these institutions, made by the Rockefeller Foundation, was not accepted by the Protestant Episcopal Board of Foreign Missions at its meeting in New York February 9, 1916.

The offer was held in abeyance until it could be determined whether the assistance would in any way interfere with the complete control of the institutions by the Episcopal Church. They are two of the largest in China and have been maintained successfully for years by that church. The Rockefeller Foundation is preparing to establish a medical school at Shanghai and proposes to cooperate with the Episcopal institutions.

*College of Yale in China.* In the fall of 1915 correspondence was in progress with the Chancellor regarding the incorporation of the Yale Mission College in Changsha, China, which wished to become registered under the Regents.

This institution is at present incorporated in the state of Connecticut. It conducts a college of about one hundred and twenty-five young men in Changsha, the capital of the province of Hunan, and with its staff of about a dozen American-trained men it is in a position to supply excellent education of collegiate grade. . . . It is one of the four institutions in China recently picked out by the Rockefeller Medical Commission for financial aid. . . . It receives an annual grant of \$20,000 from the province of Hunan, which grant is guaranteed by the federal government of Peking.

In the application for the incorporation, received October 28, 1915, the educational objects of the incorporation are set forth: to conduct an institution of learning with its main departments of instruction situated at the city of Changsha, province of Hunan; to afford instruction in lower and higher grades of learning to Chinese students, and to operate and conduct whatever departments shall be necessary and advisable to this end.

### *Egypt*

At the outbreak of the war there was correspondence in progress regarding the chartering of certain educational institutions in Egypt at Assiut and Cairo.

*Assiut College.* In 1915 President R. S. McClenahan of Assiut College, then in America, took up the matter of the incorporation of the college, which is located at Assiut, Egypt, and for the

past fifty years conducted, as it still is, under the auspices of the Board of Foreign Missions of the United Presbyterian Church of North America. He reported that "there are about six hundred students in attendance, about three hundred of whom are in the collegiate department, and the remainder in the four years of the preparatory department. . . . The college has assets of land and buildings and permanent funds to the value of almost \$500,000. There are thirty-two professors and instructors." In a later letter the president states "In answer to your inquiry, I may say that what is now known as Assiut College was formerly known as Assiut Training College, the word 'Training' having been dropped by the desire of those who conducted, both in Egypt and in America, because it was misleading."

### *Turkey*

*Euphrates College.* This institution was incorporated under the laws of the state of Massachusetts in 1878. At that time the name was "Armenia College," which was changed to "Euphrates" in 1888 because of the objection raised by the Turkish Government. The name of the corporation is "The Trustees of Euphrates College Funds." The charter is silent in regard to courses of study and the institution has not the power to confer the B.A. degree. President Riggs was in correspondence regarding the registration of this institution when the war broke out.

In reply to the question "why the decision that Euphrates College could not be registered was not made at the outset of the correspondence" two answers were given: (1) The desire to accord recognition to the work of an individual applying for admission to the bar examinations under the rules of the Court of Appeals, and (2) the desire to accord proper recognition to Euphrates College, whose "graduates have shown by the way they have taken up graduate work in American and European institutions that their mental discipline received in their college course has not been inferior." Suggestions were made in the course of the correspondence looking to the reincorporation of the institution with degree-conferring power. Were such action taken it would doubtless lead to the recognition of the institution's degrees by the Regents, which would protect the diplomas held by its graduates under the New York requirements.

*Robert College.* Correspondence with Robert College was in progress in 1915 regarding the organization of a school of engineering. The department of engineering was organized in 1910 and

in 1912 began regular instruction in engineering subjects which, as an experiment, proved that there was a great demand for technical education in that country. To meet the demand it was contemplated that buildings of a permanent character should be erected, laboratories installed and a faculty engaged that should guarantee the highest order of instruction in modern engineering practice. It was believed that certain advantages would accrue if the department were incorporated as a college composed of four departments, civil, electrical, mechanical and mining engineering. The work of erecting the buildings was delayed by the war, but in 1915 the work of instruction was carried on partly in the college buildings and partly in the engineering buildings already erected, namely, the power house, engine room and west wing containing shops. The question of chartering the engineering college was held in abeyance until it could be learned whether the original charter provides for the establishment of other colleges in addition to the college of arts and science. As the college was originally organized under a general law affecting benevolent and charitable institutions, it may be of advantage to have the charter provisions revised or amended to permit of extending the scope of the activities of the college at the close of the war.

*St Paul's Institute of Tarsus.* This institute was incorporated under chapter 319 of the Laws of 1848 by filing a certificate in the office of the Secretary of State February 17, 1887. From the certificate it appears that the institute had no authority to change to a college and had no power to confer degrees. In 1914 there was correspondence with Dr John H. MacCracken regarding the proposed amendments to the incorporation of the institute, and to change of name to St Paul's College, which has been interrupted by the war.

*Syrian Protestant College.* This institution was chartered April 24, 1863 under the general act of 1848, the certificate of incorporation being filed with the Secretary of State. In 1864 an act of Legislature gave its trustees the right to take and hold real and personal property, and in June 1906 the Regents amended its charter by increasing the number of trustees. It is incorporated under the Education Law in conformity with the requirements of the Regents. As it had five schools organized, it was classified in the statistics of the Department as a university. When the war broke out the migration of students to the United States was seriously interrupted and later a number of medical students were

cared for by admission to registered medical schools in New York City.

For summarized report of the year ending December 1916, *see* exhibit K, table 1.

**Summaries.** An attempt to summarize from the statistical tables based on reports from foreign institutions is so misleading as to render the results valueless. The attempt will be deferred until more accurate information becomes available.

**Statistics.** The grand totals for higher institutions, including foreign universities, colleges, professional, technical and other schools, are here classified by officers of instruction, number and classification of students, degrees and summaries of property and expenditure.

No reports were received in 1916 from Peking University or Syrian Protestant College.

## DEPARTMENT ACTIVITIES

The interrupted condition of transportation delayed the transmission of certain reports, and conditions in Europe resulted in the return of several shipments to institutions within the war zone. If any institutions received both the Annual Report and the reprint from it, they should inform the Department of the duplication, to the end that this may be avoided.

Executive officers of all institutions of higher education throughout the world that received this reprint or the Twelfth Annual Report will confer a favor on the Department by sending copies of their announcements for the school year with samples of their new forms in use, laws, ordinances and regulations governing admission to the practice of the various professions adopted during the year, their current publications and any additional information that will prove serviceable in the cause of education.

**Migration of students.** An important conference was held in the Department June 1916 by representatives of Columbia College and the Department, regarding the value to be accorded to foreign

New York University. The extramural division started in the 71st Regiment armory a course in military training to equip men for positions as noncommissioned officers and to provide instructors under the requirements of the state law for the military training of all boys between the ages of 16 and 19.

credentials (1) for admission to professional schools, (2) for admission to colleges of liberal arts and science, (3) for admission to graduate schools. In accord with the requests made at this conference the outlined tabular statement of the recognition accorded secondary education throughout the world is appended. To the intent that greater uniformity of action might result, the following principles were enunciated for guidance in the equation of foreign credentials:

1 Students from foreign universities that have completed the nine-year curriculum without securing the maturity certificate on examination by the state authorities, shall be entitled to 72 counts and one year of college work.

2 Students that have completed the course and can present the maturity certificate in addition, shall be entitled to credit for two years of college work; but candidates applying for medical student certificates must present evidence of having had at least one year of physics, chemistry, biology and a modern language, respectively.

3 Students that have completed the eight-year curriculum without securing a maturity certificate on examination by the state authorities, shall be entitled to 72 counts, and such students may earn a certificate entitling them to two years of college credit after the completion of not less than one and one-half years of assigned college work and the successful passing of the examinations on the same.

4 South American students seeking admission to professional schools shall be given credit as outlined in the tabular statement below, which is the maximum credit to be allowed.

5 Students that have completed the lycée or collégio of the French system shall be entitled, on the face of the certificate, to 72 counts as a minimum; but on the presentation of detailed statements of the courses pursued, they may be given credit to the extent of one year of college work.

6 Students that have completed the secondary school system of Holland and the Scandinavian countries, shall receive the same credit as that accorded to the students of the nine-year gymnasium curriculum.

7 Students that have completed the Italian secondary school system shall be entitled to the credit indicated upon the tabular statement as a maximum, with such modification of the credit as the detailed work done by the individual makes necessary.

8 The Department holds that no degree given *in cursu* should be conferred *honoris causa* and that no graduate degree should be

given except it is protected by the applicant holding the B.A. degree from an approved institution.

**Tabular Statement.** The school systems of foreign countries, to whose credentials credit may be given in lieu of Regents examinations toward qualifying certificates, are outlined below in accord with an agreement entered into at the conference referred to above. The information is arranged alphabetically by countries and by indentation. The side head in italics is the country; the first indentation, elementary education; the second, secondary, and the third, higher. The following information is given uniformly when such information is available: (1) the admission requirements to the secondary school in terms of the elementary school, (2) the number of years' recognition accorded, (3) the name of the secondary school in the language of the country, when possible, (4) the length of the course in the secondary school in years, (5) the recognition accorded the course in counts or years of college work by The University of the State of New York. When no information is given concerning a country it is from lack of definite, authentic reports at present accessible in the Department.

In October 1910, the *Midland Druggist* published what was then a complete study of the educational conditions in foreign countries. Since the publication of that journal and a subsequent journal reporting the eleventh International Congress of Pharmacy held in the Netherlands, September 1913, many changes have taken place, and the following study is a revision to date:

**Syllabuses.** Continued work on the syllabuses was in progress during the year; the *Teaching* under jurisdiction of the Assistant Commissioner for Higher Education; the *Dental* under advice of the State Dental Board. and the *Pharmaceutical* under direction of the National Syllabus Committee.

**Handbooks.** The issuance of the handbook was delayed this year through changes in the Regents Rules at the July meeting which, it was anticipated, would be completed at the June meeting. The result was that they could not be issued in time for the opening of the professional schools. Handbook 34, entitled University Scholarships, appeared for the first time in July 1916. The dates indicating the month and the year in this list is the date when the book first appeared from press in so far as the records of the Department show. The handbooks relating to Higher Education include: 3, Examinations, August 1893; 6, Publications (part I, General Department Publications) June 1906; 9, Medicine, June 1905; 9a, Chiropody, June 1913; 10, Dentistry, July 1905; 11, Pharmacy, July 1905; 12, Veterinary Medicine, July 1905; 13, Registration of Nurses, July 1906; 14, Certified Public Accountants, November 1907; 23, Qualifying Certificates, August 1908; 24, Organizations and Institutions, August 1901; 27, Law (Court of Appeals and Regents Rules) July 1907; 28, Optometry, December 1908; 32, College Graduate Certificates, February 1910; 33, Certified

Shorthand Reporters, June 1913; 34, University Scholarships, July 1916.

**Regents Rules.** Revision of the Regents Rules may be made at any meeting of the Board. Inasmuch as the Journal of the Regents is not published for distribution, the necessity arises of reprinting the rules from time to time. During the interval between the publication of the revised rules, such rules as affect higher education, amended during the year, will be published under this caption. In the interval between the publications of the revised rules, issued for distribution, the amendments enacted by the Regents are published in limited numbers for distribution but are sent upon request only.

The Regents Rules, enacted September 20, 1905, were published May 25, 1916 in an interleaved edition.

*Amendments.* The amended portions of the rules affecting higher education follow, the amendments appearing in italics.

September 14, 1916, subdivision *d* of section 3 was amended by changing the designation of the head of the Law Division to that of Chief of the Law Division and Counsel to the University.

The first paragraph of section 28 was amended to read:

§ 28 **Grades of secondary schools.** Secondary schools shall be graded as junior academic schools, middle academic schools, senior academic schools, high schools *and intermediate agricultural schools*, and the requirements therefor, subject to the approval of the Regents or the President of the University, or under the authority of either, shall be as follows: . . .

§ 361 **Definition.** A qualifying certificate is a certificate giving evidence that the holder has such academic education as is required by law *and Regents Rules* for admission to the study of the various professions and for admission to certain professional and technical schools and to the examination for certified public accountant and certified shorthand reporter.

§ 362 **Admission to examinations.** *a Who shall be admitted.* The academic examinations conducted in January, June and September of each year in Albany, Buffalo, New York City and Syracuse, shall be open only to candidates for qualifying certificates in medicine, dentistry, law, pharmacy, optometry, veterinary science, accountancy, nurse training, chiropody and reporting. No candidate who is under 16 years of age, or who is enrolled in a school entitled to give Regents examinations may be admitted.

*b Cards of admission.* No cards of admission shall be issued at the places of examination. Admission may be secured only by application in writing to the *Director of the Examinations and Inspections Division* and applications must be received at the Division at least ten days in advance of the opening day of the examination. The fee for admission shall be *50 cents for each half day session, or \$2 for all the sessions of the week.*

§ 364 **Requirements for qualifying certificates.** Qualifying certificates may be issued only for the purposes specified in section 361.

*a Qualifying certificates in dentistry, law, veterinary science, accountancy, and shorthand reporting may be secured in any one of the following ways:*

1 On evidence of the completion of the freshman year in a registered course of any college.

2 On evidence of the satisfactory completion of a four-year course in an approved high school or the equivalent.

3 By meeting the requirements for an academic *or college entrance* diploma.

4 By passing *within six successive years special* Regents examinations aggregating 72 counts at a minimum of 75 per cent in the following subjects:

*a Required, 53 counts:* English three years, 10 counts; *English fourth year, 3 counts; any second year foreign language, 10 counts;* elementary algebra, 5 counts; plane geometry, 5 counts; *two of the three sciences,* physics, chemistry, biology, 10 counts; American history with civics, 5 counts; *ancient history or the history of Great Britain and Ireland, 5 counts.*

*b Electives, 19 counts:* *An additional second year of a foreign language, namely, Latin second year, Greek second year, French second year, German second year, Spanish second year, Italian second year, or Hebrew second year, 10 counts; physics, 5 counts; chemistry, 5 counts; biology, 5 counts; physical geography, 5 counts; intermediate algebra, 2 counts; advanced algebra, 3 counts; solid geometry, 2 counts; plane trigonometry, 2 counts; ancient history, 5 counts; history of Great Britain and Ireland, 5 counts; modern history I, 3 counts; modern history II, 3 counts; economics, 2 counts; commercial arithmetic, 2 counts; elementary bookkeeping and business practice, 3 counts; advanced bookkeeping and office practice, 5 counts; shorthand, 100 word test, 10 counts; drawing' 6 counts.*

*The President of the University may, under extraordinary conditions, in his discretion, waive the time limit within which the certificate may be earned.*

5 By evidence of one or more years of high school work (each year of such work being equivalent to 18 counts) supplemented by *special* Regents examinations at 75 per cent in each subject sufficient to make a total of 72 counts. Candidates for qualifying certificates by this method are to be advised upon presenting evidence of high school work in what subjects it shall be necessary for them to take examinations to complete the requirements.

*b A dental student certificate may be secured after January 1, 1917, in any one of the five ways specified in section 364-a, except that evidence must be submitted showing the satisfactory completion of a one-year course in an approved school in each of the following sciences: physics, chemistry, and biology, or, in lieu thereof, the passing of each of these sciences at 75 per cent or above in Regents examinations.*

*c A medical student certificate may be secured after January 1, 1917, by presenting evidence of the completion of not less than one year of instruction in a college of liberal arts and science after the completion of an approved four-year high school course based on eight years of elementary preparation. The year of instruction must be at least 15 week-hours including chemistry (3), physics (3), biology (3), and any two of the three languages, English (3), German (3), or French (3).*

*d Prior to January 1, 1921, a medical student certificate for admission to a school of osteopathy may be secured in any of the five ways specified in*

*section 364-a, with the exception that evidence must be submitted showing the satisfactory completion of a one-year course in an approved school in the following sciences: physics, chemistry, biology, or, in lieu thereof, the passing of each of these three subjects at 75 per cent or above in Regents examinations.*

*e A chiropody student certificate may be secured by completing one year (after September 1, 1917, two years; September 1, 1919, three years; September 1, 1921, four years) of high school work; or by earning 18, 36, 54 and 72 counts, respectively, in Regents examinations at 75 per cent or above.*

*f An optometry student certificate may be secured in one of the following ways:*

*1 On evidence of the satisfactory completion of two years of approved high school work.*

*2 By passing at 75 per cent or above in each subject Regents examinations aggregating 36 counts.*

*g A nurse student certificate may be secured in one of the following ways:*

*1 On evidence of the satisfactory completion of one year of approved high school work or the equivalent.*

*2 By passing at 75 per cent or above in each subject Regents examinations aggregating 18 counts.*

*h A pharmacy student certificate may be secured by earning 15 counts (after January 1, 1918, 30 academic counts) in Regents examinations at 75 per cent or above in each subject; or by presenting evidence of study deemed by the Regents to be the equivalent.*

**§ 366 The degrees of professional schools recognized toward qualifying certificates.** In estimating equivalents for entrance to other professional schools, degrees shall be accepted from (1) theological schools registered as maintaining a three-year curriculum for 36 counts; (2) law schools registered as maintaining a three-year curriculum for 36 counts, a two-year curriculum for 18 counts; (3) medical schools registered as maintaining a four-year curriculum for 54 counts, accredited as maintaining a four-year curriculum for 36 counts, a three-year curriculum for 18 counts; (4) dental schools registered as maintaining a three-year curriculum for 36 counts; (5) veterinary schools registered as maintaining a three-year curriculum for 36 counts; (6) pharmacy schools registered as maintaining a three-year curriculum for 36 counts, a two-year curriculum for 18 counts. A certificate of fact shall be required in each instance and the certificates of professional schools shall be recognized for students completing the work subsequent to the date of registration or accrediting only.

**§ 367 Fee for qualifying certificate.** A fee of 25 cents is required for each qualifying certificate. *The fee must be paid before the certificate is issued.*

**§ 369 Approved secondary course.** Four years of secondary work based on eight years of elementary or the equivalent shall be required for the registration of secondary schools whose certificates are to be accepted in lieu of examinations. In order to be approved, a secondary course must include at least 38 weeks a year, 18 periods a week, 45 minutes a period, with satisfactory standing. Institutions may be registered in full or in part as they offer one or more years' work equivalent to that presented in the outline under

section 370. The maximum allowance in lieu of examinations that may be accorded to a certificate for the successful completion of a full year's work in a registered secondary school is 18 counts.

§ 409 **Requirements.** A school of medicine may be registered as maintaining a proper medical standard and as legally incorporated. It must have apparatus and equipment and resources of \$50,000. It must have at least six full-time salaried instructors, giving their entire time to medical work, a graded course of four full years of college work in medicine, and must require *prior to beginning the first year of medical study, the general education required by the rules of the Regents.*

§ 409 For subdivision *b* (1) and (2) substitute the following:

*b* The medical school must require (1) for admission, after January 1, 1917, not less than one year of instruction in a college of liberal arts and science after the completion of an approved four-year high school course based on eight years of elementary preparation. The year of college instruction must be at least 15 week-hours, including chemistry 3, physics 3, biology 3, and any two of the three languages, English 3, German 3, or French 3. (2) Prior to January 1, 1921, all matriculates of registered colleges of osteopathy must afford evidence of a general preliminary education equivalent to eight years of elementary preparation and an approved four-year high school course, including one year of physics, chemistry and biology.

§ 411 Change subdivision 5 to read:

5 Not less than 15 Regents counts — 4 Foundation units — (subsequent to January 1, 1918, 30 Regents counts) or the educational equivalent shall be the scholastic requirement for matriculation.

(The amendment of the statute, section 233, item 3, necessitates this proposed amending of subdivision 5).

Change the second sentence of subdivision 20 to read:

After January 1, 1913, the entrance requirement shall be the satisfactory completion of four years of high school work, or its equivalent, and the degree of Ph.G. earned before the degree of Ph.C. is conferred.

Change the second sentence of subdivision 21 to read:

The entrance requirements to this course shall be four years of high school work equivalent to 14½ units and the degree of Ph.G. earned before the degree of Ph.C. is conferred.

Change the second sentence of subdivision 24 to read:

A student failing in more than one junior subject shall, before becoming eligible to admission to the senior class of another school, qualify for the senior class at the school in which he failed. He may enter the junior class in any other school without such qualification.

Change the third sentence of subdivision 24 to read:

A student to be eligible for admission to final examinations shall attend at least 90 per cent of all exercises from the date of opening. Students shall not be registered later than two weeks after the opening of the term.

*Interpretation.* The interpretations of rules and decisions affecting higher education that have been made since August 1, 1915 follow in chronological order.

1 In recommending the Pennsylvania dental schools for registration by the Regents, the general preliminary education required for admission to these schools must be met by all matriculates of the class of 1918 and succeeding classes. October 25, 1915.

2 In issuing medical student certificates the successful completion of and graduation from a three-year course of a professional school registered by the Regents under sections 404, 406, 407 and 408, may and shall be accepted as the full equivalent of two years of college work, provided each individual meets the specific requirements, including chemistry, physics and biology, 150 hours of chemistry, physics or biology being the equivalent of 5 counts. February 23, 1916.

3 No blanket recommendation for registration of technical degrees under section 404 can be made, but registration of individual cases might be made depending upon the quality of the technical degree. February 28, 1916.

4 It would not be wise to lessen the recognition accorded equivalents for admission to nurse training schools. April 12, 1916.

5 In the registration of higher technical schools, such institutions as plainly meet all the requirements for registration under section 401, shall be so recommended to the Regents for registration, without limitation as to the teachers life certificate, any limitation to be made subsequently. May 26, 1916.

6 All applications for qualifying certificates made on or after September 15th should automatically come under the amended rule; all applicants for such certificates prior to that date should be notified of the amended rule and should be given one year, that is: January, June and September examinations, 1917, in which to complete the requirements under the old rule; and should be informed that, failing to meet these requirements within these three examinations, they would come under the operation of the amended rule, and would, upon application, be informed as to the subjects they would have to take in order to meet the requirements of such amended rule. September 21, 1916.

7 Inasmuch as there will be no opportunity between September 14, 1916 and January 1, 1917 for any student who was in the process of earning a medical student certificate prior to the first date to complete the requirements for such certificate under the old rule, it will be necessary to advise such persons that they must now

complete the requirements for a medical student certificate in accordance with the new rule. All persons who were entitled to the medical student certificate under the old rule, on or before September 14, 1916, should be granted such 60 count medical student certificate. October 17, 1916.

8 It is to be understood that the examinations of certain specific colleges are accepted only in lieu of Regents examinations for purposes of credentials admitting to college.

If, however, such college examinations are presented for acceptance for qualifying certificates in lieu of Regents examinations the college examinations need not be accepted, if, first, it is apparent that they are taken for the purpose of avoiding Regents examinations, and, second, under no circumstances when the passing mark earned in such college examinations is lower than 75 per cent.

Primarily, however, the acceptance of college examinations in lieu of Regents examinations is for certificates that will admit to colleges of liberal arts and science. October 18, 1916.

**Enforcement of professional laws.** The administration and enforcement of the laws relating to professional education not only require the action of the boards of examiners and their administrative officials, but also the services of the Counsel to the University, either in prosecutions or in defending actions or proceedings in the civil courts.

The report of the Counsel to the University for the current year is given under this caption and includes such prominent cases as affect the administration of the Education Law and of the professional laws. This report includes not only cases adjudicated but those in progress. The reports of the important cases acted upon by the courts or the Regents under special professional laws are reported under Medicine, Dentistry, Pharmacy, Veterinary Medicine, et al.

*Matter of Burden.* At a term of the police court of the city of Rochester, held January 17, 1915, William J. Burden, having pleaded guilty to the charge of committing and maintaining a public nuisance, was convicted and sentenced to pay a fine of \$500 and be imprisoned in the Monroe county penitentiary until such fine be paid, not exceeding 500 days.

On the 30th of October, 1915, the Medical Society of the County of Monroe preferred charges against William J. Burden and petitioned the Board of Regents and the Board of Examiners to exercise the authority vested in them by section 170 of the Laws

of 1909 and hear and determine the evidence submitted and to take proper action thereon.

On January 15, 1916, a committee consisting of Melvin J. Stearns M.D., Ralph H. Williams D.O., and Aaron B. Miller M.D., for the State Board of Medical Examiners, duly appointed in accordance with law to hear and determine the charges against said Burden, held a meeting for hearing such charges, and after such hearing made report of their findings and recommendation as follows:

Resolved, That this committee recommend to the Regents of the University that the charges preferred by the Medical Society of the County of Monroe against William J. Burden, a licensed physician of the State of New York, for the revocation of his license and for the annulment of the registration thereof, be sustained; and that the application of such society for the revocation of the license of the said Burden, and for the annulment of the registration thereof, be granted.

H. H. Widener, counsel for William J. Burden, was heard in the matter of the revocation of said Burden's license, and after such hearing it was voted, by the Regents at the regular meeting held February 24, 1916, That the case be referred back to the State Board of Medical Examiners, and that the committee which will sit for the purpose of hearing charges against Doctors Little and Curtis on the 18th of March, be requested to hear any new evidence that said Burden may present either in person or through counsel.

At a meeting of the Regents held April 27, 1916, the charges preferred by the Medical Society of the County of Monroe against William J. Burden, for the revocation of his medical license and for the annulment of the registration thereof, not having been proved, in accordance with the recommendation of the committee of the State Board of Medical Examiners, before whom a rehearing of the case was given, it was voted, That the charges against William J. Burden be dismissed.

*Matter of Grant.* At a term of the Supreme Court of the county of Erie, held February 9, 1915, George Hendry Grant having pleaded guilty to assault in the third degree, was sentenced by the said court to the Erie county penitentiary for a period of six months.

Charges were preferred by the Medical Society of the County of Erie against George Hendry Grant and petition was made to the Board of Regents and to the Board of Examiners to exercise the

authority vested in them by section 170 of the Laws of 1909, and to hear and determine the evidence submitted and to take proper action thereon.

On January 22, 1916, a committee consisting of William G. Bissell M. D., Arthur W. Booth M. D., and Ralph H. Williams D. O., for the State Board of Medical Examiners, duly appointed in accordance with law to hear and determine the charges against said Grant, held a meeting for hearing such charges and after careful consideration of the evidence, found itself obliged to determine that the misdemeanor of which said Grant was convicted is of itself sufficient to justify the revocation of his license and the annulment of the registration thereof, and that the offense pertained to or affected the professional standing of the practitioner. The committee therefore adopted the following resolution:

Resolved, That this committee recommend to the Regents of the University that the charges preferred by the Medical Society of the County of Erie against George Hendry Grant, a licensed physician of the State of New York, for the revocation of his license and for the annulment of the registration thereof, be sustained; and that the application of such society for the revocation of the license of the respondent and for the annulment of the registration thereof be granted.

Upon recommendation of the committee, it was voted, That action in the matter of the revocation of the medical license of George Hendry Grant be deferred until the next meeting of the Board of Regents which was held April 27, 1916, and on recommendation of the committee, it was voted, That the medical license of George Hendry Grant be revoked and his registration in Erie county and in any other county in which he may be registered, be annulled.

*Matter of Silverman.* Charges of fraud and deceit in his practice have been preferred against Edward I. Silverman by the Utica Optometry Society. At a hearing before a committee of the State Board of Examiners in Optometry held on November 22, 1915, these charges were sustained, and the committee has recommended to the Board of Regents the revocation of Mr Silverman's certificate of exemption and the annulment of his registration.

At a regular meeting of the Regents held April 27, 1916, on recommendation of the committee, it was voted, That the certificate of exemption from examination to practise optometry, issued to Edward I. Silverman April 8, 1909, be revoked and his registration annulled.

Mr Silverman appealed from this action on the grounds that he was not notified of the meeting. Several hearings were given him, but at a meeting held May 4, 1917 it was voted, That the charges against Edward I. Silverman having been well founded, the Board of Regents suspends him from the practice of his profession until January 1, 1918, and that this order of suspension be filed in the office of the county clerk of Oneida county, and his registration annulled until such date.

*Matter of Little.* Charges were preferred by the Medical Society of the County of Erie against William R. Little, a duly licensed physician of the State of New York, and registered as such in Erie county. The charges were filed in accordance with law, and Doctors William G. Bissell, Aaron B. Miller and Ralph H. Williams were duly appointed, in accordance with the statute, a committee to hear the charges, in the city of Rochester, on March 18, 1916.

Doctor Little was charged with giving a prescription for cocaine while in a state of intoxication, was arraigned before the city court of Buffalo on or about December 20, 1913, was convicted of the charge and sentenced to confinement in the Erie County Penitentiary for a period of one year. In December 1914, he was again convicted of the charge of intoxication, and sentenced to confinement in the Erie County Penitentiary for a period of six months.

Notice of the time and place of hearing, together with a copy of the charges, were duly served on said Little on February 16, 1916, and at the time and place appointed the committee met for the purpose of hearing the charges and of taking testimony thereon. The Medical Society of the County of Erie was represented by Alfred J. Harrison. Neither said Little nor any person representing him appeared in his defense, and the committee unanimously found said Little guilty of the charges preferred against him, and took action as follows:

*Resolved,* That this committee recommend to the Regents of the University that the charges preferred by the Medical Society of the County of Erie against William R. Little, a licensed physician of the State of New York, for the revocation of his license and for the annulment of the registration thereof, be sustained; and that the application of such society for the revocation of the license of said William R. Little, and for the annulment of the registration thereof, be granted.

WILLIAM G. BISSELL, *Chairman*

AARON B. MILLER

RALPH H. WILLIAMS

*Committee to hear charges*

On recommendation of the committee, it was voted, That the medical license of William R. Little be revoked and his registration in Erie county and in any other county in which he may be registered, be annulled.

*Matter of Curtis.* Walter H. Curtis, a duly licensed physician of the State of New York, and registered as such in Monroe county, was, on or about May 7, 1910, together with Pearl Curtis, duly indicted in Monroe county for the crime of keeping and maintaining a public nuisance in the city of Rochester, N. Y. Said Walter H. Curtis and Pearl Curtis, on November 2, 1910, were duly convicted of the crime with which they were charged, and said Walter H. Curtis was sentenced therefor to imprisonment in the Monroe County Penitentiary for a period of eight months and the payment of a fine of \$300.

Charges were preferred by the Medical Society of the County of Monroe against Walter H. Curtis, and the charges duly filed according to law. Notice of the time and place of hearing of said charges was served on Walter H. Curtis on February 23, 1916. A committee duly appointed in accordance with the statute, consisting of Doctors William G. Bissell, Aaron B. Miller and Ralph H. Williams, met for the purpose of hearing said charges at the time and place appointed, in the city of Rochester, on March 18, 1916. The Medical Society of the County of Monroe was represented at such hearing by H. Z. Harris. Said Curtis made no appearance, either in person or by attorney, before the committee. The committee found said Curtis guilty, and adopted the following resolution:

*Resolved,* That this committee recommend to the Regents of the University that the charges preferred by the Medical Society of the County of Monroe against Walter H. Curtis, a licensed physician of the State of New York, for the revocation of his license and for the annulment of the registration thereof, be sustained; and that the application of such society for the revocation of the license of the said Walter H. Curtis, and for the annulment of the registration thereof, be granted.

WILLIAM G. BISSELL, *Chairman*

AARON B. MILLER

RALPH H. WILLIAMS

At a regular meeting of the Regents held April 27, 1916, on recommendation of the committee, it was voted, That the medical license of Walter H. Curtis be revoked and his registration in Monroe county and in any other county in which he may be registered, be annulled.

**Inspections.** During the year inspections of universities, colleges, schools of medicine, dentistry, pharmacy, nursing, et al, were made by the Assistant Commissioner for Higher Education, the secretaries of the boards of examiners in medicine, dentistry, pharmacy, nursing, and others.

Attention has been called repeatedly to the importance of this work as a means of inspiration to the institutions, as an essential aid to the effective administration of the professional laws, and as an efficient means for correcting the misapprehensions of the members of the various professions affected, and of the public in general.

The Legislature, however, has failed to make the necessary appropriations for such special inspections of higher institutions. The makeshift policy of providing the means for inspection at the expense of the institution applying for recognition should cease at the earliest practicable moment, as the criticisms expressed and implied nullify in a measure the independent thought of the investigator and the independent action of the administrative officer whose findings are to become the basis of a report to the Regents for their consideration and action. An appropriation is again earnestly advocated to the end that institutions applying for recognition either new or advancing may be carried forward with sufficient thoroughness to give confidence therein to the institution and to the Regents.

**Examinations.** The Regents academic examinations furnish the standard of graduation and of admission to colleges. Certificates or diplomas are conferred by the Regents on students who satisfactorily pass the academic examinations. The entrance requirements to the professional schools, under the professional laws, are administered by the Regents who conduct academic examinations open to candidates not in attendance on the secondary schools. The credentials issued for admission to professional schools are called qualifying certificates. A clear distinction is thus made, the credential issued for admission to the college (the diploma) and the credential issued for admission to professional schools (the qualifying certificate). Qualifying certificates may be earned by successfully completing one or more years' work in secondary schools recognized by the Education Department, or by attendance on the recognized secondary school supplemented by Regents academic examinations.

Professional examinations are authorized by special professional statutes that have been enacted from time to time. The question papers are prepared by the boards of examiners and edited by the

Department. These examinations are proctored by the Department, the question papers rated by the professional boards and the records preserved in the Department. The professional examinations conducted by the Regents are for the licensing of teachers, physicians, chiropodists, dentists, pharmacists, druggists, veterinarians, and for the registration of nurses, public accountants, optometrists, shorthand reporters and architects. The Regents are also responsible for the examination of applicants applying for admission to the law schools and to the bar examinations. The professional examinations for admission to the bar are conducted by the State Board of Law Examiners.

*Time and place.* Examinations for professional licenses are conducted in January, June and September of each year, in accord with the several professional statutes. Special academic examinations are conducted in January, June and September of each year in Albany, Buffalo, New York and Syracuse.

*Dates.* The dates of the examinations are announced for periods of five years each, but, as it occasionally happens that a stated examination may not be held at the date announced, it is found helpful to publish a permanent, official record of the dates when the examinations were actually held. This is often of advantage in connection with court and other inquiries. For this reason the dates of examinations are made a part of this report, and are grouped in two classes, namely, those pertaining to the academic or secondary examinations and those for entrance on the practice of the professions. Examinations were held January 17-21 and June 19-23, 1916, for preliminary certificates, teachers elementary certificates and rural school renewable certificates; September 11-13, 1916, professional and technical students in academic subjects; January 17-21, 1916 and June 19-23, 1916 in all academic subjects. Examinations were held August 7-11, 1916, for teachers professional certificates, life state certificates, special commercial certificates, special stenographer certificates; September 19-22, 1916, in all professional subjects except law, which is conducted by the State Board of Law Examiners; January 25-28, 1916, May 16-19, 1916 and June 27-30, 1916 in all professional subjects. The State Board of Law Examiners held examinations for admission to the bar in 1916 as follows: January 18-19, April 19-20, June 21-22, October 3-4.

*Qualifying certificates.* During the year certificates qualifying the holders to enter the professional schools or the professional licensing examinations of the State were issued as a result of the

academic examinations, or on equivalent work based on credentials from secondary and higher institutions, or on equivalents supplemented by examinations. The following table indicates the extent and results of these examinations with the kind of certificates issued:

Qualifying certificates issued August 1, 1915 — July 31, 1916

Kind of certificate	Total	On equivalent	On par. equivalent	On examination	Per cent on equivalent	Per cent on par. equivalent	Per cent on examination
Law.....	968	654	109	195	68.6	11.2	20.2

Total.....	5 336	3 857	535	944	72.3	10.0	17.7

Professional examinations were also conducted during the year for entrance on professional practice in teaching, medicine, dentistry, pharmacy, veterinary medicine, nurse training, optometry, library, certified public accounting and druggist. The following table gives the number of examinations in each and an analysis of the results:

Professional examinations conducted by the Department, August 1, 1915 — July 31, 1916

	Education	Medical	Dental	Pharmacy	Veterinary medicine	Nurse training	Optometry	Library	C. P. A.	Druggist	Chiropodist	C. S. R.

Question papers for the professional examinations held during the school year August 1, 1915 to July 31, 1916 were printed to the number of 154,650; 21,632 answer papers were written and claimed; 18,650 answer papers were accepted.

**Summaries.** It has been customary to glean from the statistical tables certain classified facts for the use of the several groups of students who are interested in higher education and its several subdivisions. These are designed to contrast the year's experience with the preceding year and to form the basis of a comparison of growth in education extending over a period of years.

In 1916 the teaching force employed in the higher institutions in the State numbered 6011 as against 5650 in 1915, being an increase of 286 men and 75 women.

In 1916 there were in these institutions 56,116 students, including those unclassified and those pursuing graduate courses; an increase of 3510 students, 2701 of whom were men and 809 women. In the regular undergraduates courses it shows an increase of 2320 students and in the graduate courses a decrease of 81 students.

First degrees conferred in course during the year 1916 numbered 6476, of which 4640 were on men and 1836 on women. For the preceding year the number was 4384 on men and 1783 on women, a total of 6187. Of the 6476 degrees conferred in 1916, 2032 were given by professional schools divided as follows: theology, 50; law, 771; education, 8; medicine, 456; dentistry, 452; pharmacy, 267; veterinary medicine, 28. The honorary degrees conferred this year numbered 108 as against 91 in 1915 and 98 in 1914.

The total amount of property including investments is \$181,935,705.50, an increase of \$8,543,293, over that reported for 1915. The receipts were \$22,617,405.42, an increase of \$3,153,258.53 over the preceding year; the expenditures were \$20,885,553.39, an increase of \$3,032,110.84 over the preceding year.

The salary list for higher institutions was \$7,032,435.30 for 1916, a decrease of \$586,603.59 over the amount expended last year.

**Statistics.** The grand total for higher institutions, excluding foreign colléges, are here classified by officers of instruction, number and classification of students, degrees, summaries of property and expenditures.

## UNIVERSITIES

Reference has been made under the caption "Statistics of Higher Institutions" to the problems of student migration and its growing importance in the United States by reason of the changing relations that are occurring on the western continent. Under the caption "Department Activities" reference is made to a conference regarding the migration of students, and the principles are set

Fordham campus, showing the student body at drill. Eight hundred boys drill twice a week on the campus under the direction of the prefect and of the New York National Guard.

forth governing the recognition of foreign credentials with a tabular statement showing the recognition accorded foreign school systems.

In the light of the steady progress that is differentiating the American college from the American university, the problems involved can be more clearly set forth by comparisons and contrasts. During the year some thought was given to the answering of the question, "What constitutes a university?" which led to a careful consideration of the utterances of American educational leaders. The point of view was that taken from a great economic center, Buffalo, the home of a nation of Indians less than a century and a quarter ago, which, by the latest claims of the mayor, included 25,000 Germans, 90,000 Poles, 35,000 Italians, 40,000 Irish and 25,000 Hungarians or Austrians.

The location of universities is determined by economic laws rather than the whims of inexperienced advisers or short-sighted philanthropists. No university can hope to live in any other community than urban, but "*urban*" needs to be clearly defined. Forty-five years after a municipality bonded itself for \$100,000, to establish a college within its bounds, there was a total property investment in the university of \$6,500,000, the net property exceeding \$5,500,000. The total annual distribution within that municipality from that one institution considered as a business plant exceeded \$2,500,000, to say nothing of the constant increase in permanent population.

The university, established on municipal foundation supplemented by benevolent funds, friends and patrons, will be coeducational and nonsectarian, the culmination of an elementary and secondary school system embracing public and private schools, complementing and emulating each the other in higher attainments and loftier ideals.

Efficient professional schools will continue to meet each minimum statutory requirement and will rationally lead every scholastic advance. There will be a college of applied science with schools of engineering, as the extending boundaries of the educational municipality embrace and assimilate the various fields of power development.

There will be the college of fine arts embracing schools of applied science, of music, of painting, of architecture and of oratory.

First and foremost, there will be the college of liberal arts and science, free to all, of whatever race and creed, with clarifying judgments relating to politics, to commerce, to public affairs and to international relations.

There will be the graduate school leading to the minor and the major graduate degrees and to the school of life whose chief function will be the conservation, the advancement and the dissemination of knowledge. Better than all, it will promote and impart intellectual freedom; it will emancipate individuals and create leaders, men of courage, men of vision — Americans — responding in character and ideals to the poetic and prophetic call voiced in the words of a college president:

Give me men to match my mountains,  
Give me men to match my plains;  
Men with empires in their purpose,  
And new eras in their brains,  
Pioneers to clear thought's marshland  
And cleanse old error's fens.  
Give me men to match my mountains, give me men!

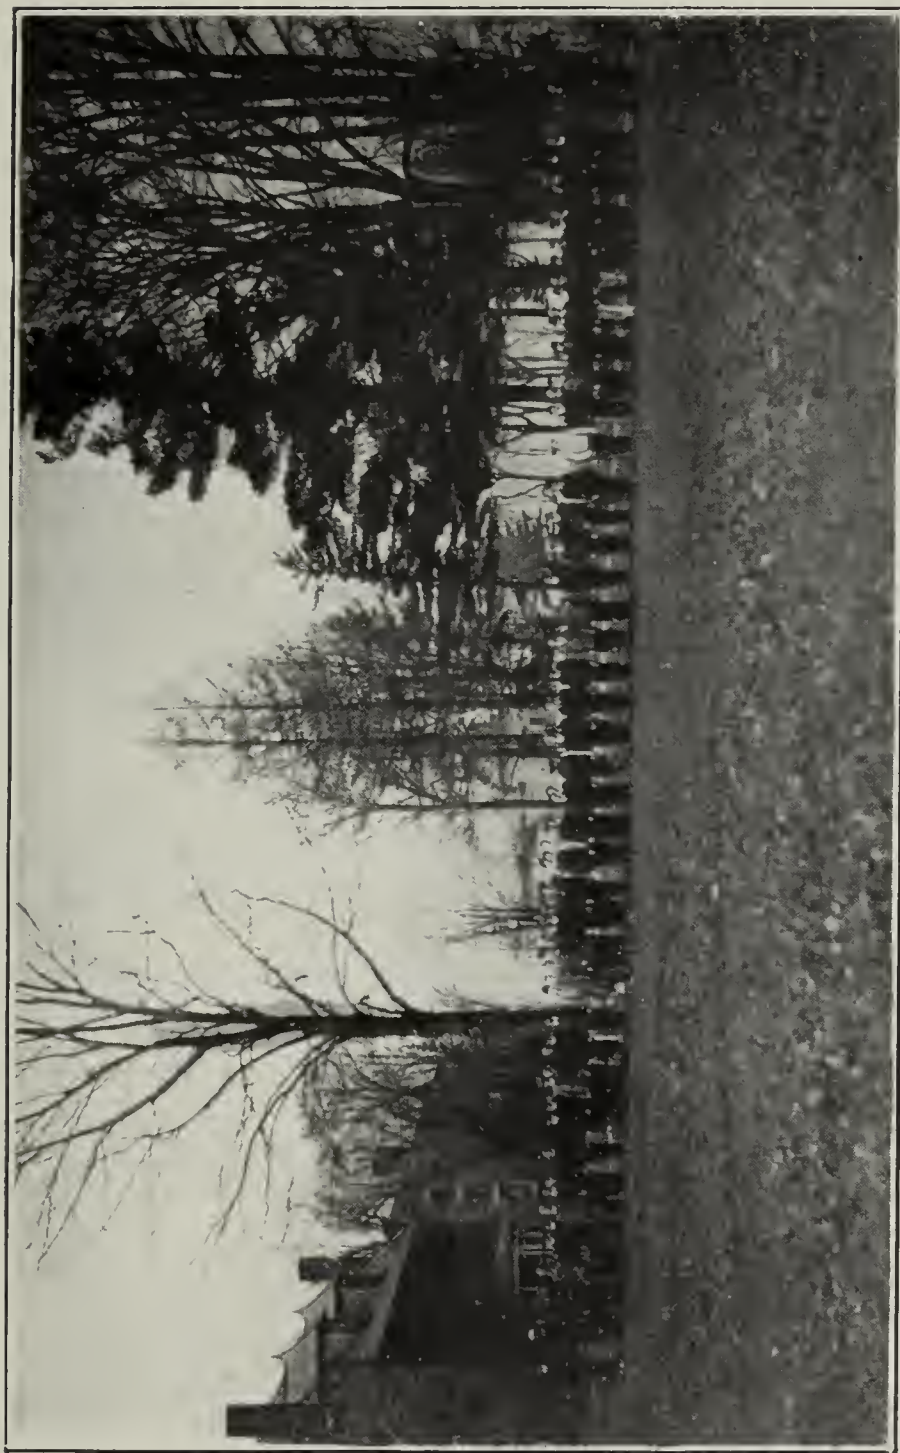

**Summary.** Again this report gives a summary of the students in attendance on the universities of the State. The statistics from the foreign institution classified in this group, are omitted. In 1916 there were 4878 students in graduate courses, of whom 3456 were men and 1332 were women. The total number of higher degrees conferred during the year was 1146, of which 771 were conferred on men and 375 on women. The total number of honorary degrees conferred was 108.

### COLLEGES

In a recent report some attention was given to the question of annual reports, especially those of the presidents of the boards of trustees. Two reports from college presidents, illustrative of their excellence and the importance of the matter reported, are used as types for the current year. They were sent by the presidents for the purpose of illustrating the most important events of the institution during the current school year. The Columbia report may properly be used as a model by the presidents, chancellors, deans and executive officers of the other higher institutions of the State.

A critic on college teachers is well worthy of consideration by all administrators responsible for the employment of the faculties of the higher institutions of the State:

There can be no reasonable doubt that part of the difficulty arises from the fact that many college teachers are not really college teachers at all, but men who should be engaged in other forms of intellectual work. They might, for example, be useful and successful men of letters; or they might be meritorious, or even distinguished, in conducting research and in guiding graduate

Hamilton College. Oldest representative of a college for men now found in New York State founded by Samuel Kirkland, missionary to the Oneida Indians, located in the village of Clinton and named in honor of Hamilton.

students. College teaching is something quite different from either of these, and it is worthy of pursuit as an end in itself. . . . It is rather distressing to find it publicly stated that it is the judgment of high officers in the United States army that the American youth brought to them for training by the operation of the selective draft act are both mentally and physically slouchy. . . . A slouchy mind expresses itself in a slouchy body, and a slouchy body readily invites a slouchy mind. The college is too often slouchy and attempts to entertain when it should instruct and discipline.

The report further illustrates the quickening due to war conditions, and the consequent thoughts occurring to educational leaders. In marked accord with Prof. George M. Forbes (University of Rochester), whose address before the holiday conference of academic principals awakened the highest enthusiasm, President Butler says,

No country can have a homogeneous or a safe basis for its public opinion and its institutions unless these rest upon the foundation of a single language. To protect the national unity and security, no community should be permitted to substitute any other language for English as the basis and instrument of common school education.

The change in the American point of view is exemplified in the quotations, "the unhappy lecture system imported bodily from the German universities of forty or fifty years ago; . . . the teacher who has nothing to give in his lecture but information has no just claim on public support and should be required to give way to the printed page."

The climax of the report is reached in the description of the red-letter day in the history of the university, May 10, 1917, when degrees were conferred by Columbia upon the English and French commissioners to the United States.

An equally interesting event occurred on May 17th when the British Ambassador, Sir Cecil Spring-Rice, the Right Honorable Arthur James Balfour, and eleven members of the British commission were received into membership in Phi Beta Kappa. A complete account of this remarkable meeting is published in the Phi Beta Kappa Key of October 1917.

The second report from college presidents illustrated the conditions in foreign countries, notably China. The president of Nanking University, replying to the request for information regarding the two most important items of the current year reports:

The first matter of importance in our work for the school year, September 1, 1916 to August 31, 1917, is the complete readjustment of our educational plan to conform with the Chinese government system. This system is based largely upon the Japanese divisions and organization. Within the main divisions we have kept to our own ideals and courses and standards, which is permitted by the government in all private schools. That is to say, the

content is largely as it has been, but the form has been brought into harmony with that of the government. Briefly, this plan we now follow is: We begin with a lower primary department of four years, which is based on a kindergarten of two to four years; then follows the higher primary work covering three years. Middle school follows, of four years. Then come junior college of two years, and senior college of three years. The last two divisions affect us most and are admirably adapted to needs and conditions in China. The two years of junior college are "preparatory" courses and the three years of the senior colleges make more specialized and intensive work on a given subject possible. We have junior college or preparatory courses for arts college, agriculture and forestry, medicine, education. In the senior colleges, at present, we offer only arts courses and agriculture and forestry courses. We feel that this new adjustment of our work marks a distinct advance in our development, and at the same time brings us more in harmony with national needs and practice.

The same process of differentiation in colleges of liberal arts and science is in progress as in universities. The year has seen a clear distinction made in the curriculum of the college, and a greater era of usefulness has come by such differentiation. A coeducational institution of the State (Adelphi College) has narrowed its student body by limiting admission to women and has broadened the content of the curriculum so as to provide training for specific life work at the same time that increased requirements for degrees are exacted of the students.

Secretarial work, for example, demands the broad outlook of the college graduate as do kindergarten, art and domestic science teaching.

There are other fields demanding the same powers and training, such as the higher positions of stenography, office duties and confidential clerks in state and business employ. A reasonable amount of time in the college curriculum, devoted to the preparation for life's work, need not interfere with the acquisition of scholarship or with the social life of the student.

From a new standpoint definitions of college terms are properly being introduced. Major subjects may be regarded as those deemed essential to sound education in college, as well as in the professional school. The major subjects are determined by the greater departments of knowledge. The minor subjects in proper proportion are to be utilized for the training essential to the rounding out of individual curriculums and may properly be denominated selective subjects. The major and the minor subjects, both required, complete the minimum curriculum. The electives provide subjects beyond this minimum to the full extent of the student's capacity for study.

*The importance of the college.* The magnitude of the university dwarfs the greatness of the college. In the seventies the American college was the synonym of higher education; the university existed in name only. At that time the college curriculum required four years and a three-year academic preparation for admission; the medical curriculum required a two-year course spread over three years of time without more than a competent, common school preparation for admission. Attendance on the professional schools of education, medicine, dentistry or pharmacy, then, was no more obligatory than in theology and law now. Fifteen week-hours were required in each of the three terms of the year, approximately 540 hours, or 2160 hours for graduation.

Today the State requires as a minimum a four-year course in medicine, 3400 hours, and for admission one year of college work after four years of secondary preparation. In dentistry, a profession that did not exist in the seventies, 4000 hours are now required in the four-year course, based on a specified four-year secondary preparation for admission. Now the college requires a four-year secondary school preparation for admission and a four-year college course for graduation with a required year ranging from 460 hours to 680, or, in 170 colleges of the United States, an average of 560 hours, which aggregate in a four-year course 2240 hours. That is, while the college curriculum has called for an additional year of preparation and 80 hours increase of college work, the medical curriculum calls for five years more of preparation and 2460 hours increase of professional study.

Again, during this period the growth of the university has obscured the work of the college. For example, the college graduate may receive a year's credit in lieu of attendance on a law school for admission to the bar; or he may receive a year's credit of the four years required in the study of medicine; or he may combine his course in science and medicine and complete the requirements for two degrees in six years; or he may combine his arts and medicine and complete the requirements for the two degrees in seven years. Necessarily, these possibilities lead large numbers of students from the purely cultural and disciplinary courses of the college curriculum into the specialized courses that not only give the power to think clearly, to live wisely, to accomplish fully, but also to earn a livelihood.

The attendance on the college has not been lessened by the growth of the university. On the contrary, the increase of the number of college students in this State has been normal and shows the

effect of the protection of college degrees by state authority. In 1903 there were 9471 college students in the State of New York; eleven years later, 13,400, an average annual growth of 300, or more than 4 per cent. Moreover, the facts show that the attendance of women on college has not increased in the proportion implied from the honors attained. The number of women attending colleges in this State increased from 4984 in 1903 to 6287 in 1914, the number of men increased from 4487 in 1903 to 7113 in 1914.

*Colleges for women.* A study prepared for Regent Charles B. Alexander this year shows the colleges for women in the United States arranged in two groups: first, those of the State of New York, second, those of the United States excluding New York State. The tables from which these statistics are compiled include endowments, buildings and dormitories, grounds and farm, library and scientific apparatus.

**Associations.** The multiplicity of educational associations, public and private, interested in institutions or actively engaged in the promotion of educational improvement continues to increase and the reports of their activities in the United States alone are voluminous. It is manifestly impossible to record others than the most prominent in general educational endeavor. For example, the National Education Association Year Book and List of Active Members, revised to December 31, 1916, is a 384 page volume.

The publications of this association can be obtained from D. W. Springer, Secretary, National Education Association, Ann Arbor, Mich.

The report of the proceedings and addresses of the thirteenth annual meeting of the Catholic Educational Association, held June 26-29, 1916, is a volume of 509 pages. The office of the secretary general is 1651 E. Main st., Columbus, Ohio.

The fifth annual report of the Council of Church Boards of Education in the United States of America, dated 1916, is edited by the secretary, whose address is 310 Searles Building, Monmouth, Ill.

There are bulletins and reports by the Board of Education of the Methodist Episcopal Church, South; the Reformed Church in America; the College Board of the Presbyterian Church in the United States of America; the Board of Education of the Presbyterian Church in the United States of America; the Ohio College Association; the Missouri College Union; the Southern Association of College Women, and the National Collegiate Athletic Association.

There is space for the reporting of a few associations only, and these are selected because of their affiliated work of examinations and certification.

*The Thirtieth Annual Convention* of the Association of Colleges and Preparatory Schools of the Middle States and Maryland was held under the auspices of Goucher College, Baltimore, Md., December 1-2, 1916. The proceedings were published by the association in 1917, and may be secured from the secretary, G. W. McClelland, University of Pennsylvania. The general topics of discussion at this meeting were "Real Values in Education," (a) Constructive Elements in the Curriculum; (b) Constructive Elements in the Classroom; (c) The Test of Real Values.

*The Fourteenth Annual Report* of the New England College Entrance Certificate Board for 1915-16 contains an account of the annual meeting of the board at Boston, Mass., April 22, 1916. The address of the secretary is Wesleyan University, Middletown, Conn. This board, founded in 1902, with eight colleges participating, now comprises fifteen institutions and approves 512 schools in New England, the basis of approval being the course of study, staff of teachers and students in attendance on the institutions.

*The Twenty-first Annual Meeting* of the North Central Association of Colleges and Secondary Schools was held at Chicago, Ill., March 24-25, 1916. The proceedings are edited by Henry E.

Brown, secretary of the association, whose address was Kenilworth, Ill. The president's address had for its theme "College and Character." The report of the committee for securing uniform legislation in all states represented for controlling the conferring of degrees is of special interest in the light of our own studies now in progress regarding the registration of colleges of liberal arts and science by the Regents.

*The Twenty-second Annual Meeting* of the Association of Colleges and Secondary Schools of the Southern States was held at Trinity College, Durham, N. C., November 16-17, 1916. Over one hundred delegates and visitors representing seventy-four colleges, schools and other educational organizations were in attendance.

*The Sixteenth Annual Report* of the College Entrance Examination Board was issued by the secretary in 1916, and includes the examinations of 1916. The Constitution and Definition of Requirements was issued December 1, 1916 in Document 82. The secretary was Thomas S. Fiske, 431 W. 117th st., New York City.

*The Ninth Conference* of the National Conference Committee on Standards of Colleges and Secondary Schools was held at New York, March 31, 1916. Among the interesting subjects presented at this conference was the report regarding the possibility of establishing a uniform certificate and the proper protection of the new method of admission to college by comprehensive examinations in chosen subjects.

**Summary.** This report continues the separate summary of the students in attendance on the colleges of liberal arts and science distinct from the universities with their graduate students. In 1916 there were 33 colleges of liberal arts and science, of which 17 were for men, 9 for women, and 7 for men and women.

There were 1715 teachers, 1306 men, 409 women, of whom 683 men and 2 women were in colleges for men, 205 men and 358 women in colleges for women, 418 men and 49 women in colleges for men and women.

There were 16,258 students in attendance, of whom 9257 were men and 7001 women. There were 6887 men and 261 women in the colleges for men, 4698 women in the colleges for women, and 2370 men and 2042 women in the colleges for men and women.

#### PROFESSIONAL SCHOOLS

The year was marked with unusual activity in the attempts made to amend professional educational laws. The administration of the veterinary practice act, amended the preceding year, involved much

additional labor and the modification of the dental practice act, the medical practice act and the pharmacy law, referred to in the following paragraph, necessitated Regents action in the revision of the rules affecting the entrance on the study of the several professions. The results of this activity crystallized in the creation through the appropriation bill of a distinct department and its assignment to the First Assistant Commissioner — the department of Professional Education. Under the statute and the Regents Rules, then, the First Assistant Commissioner has charge of Higher Education and is Director of Professional Education.

**Professional legislation, 1916.** The dental law was amended (ch. 129) by defining the practice of dentistry, providing for the appointment of a dental secretary by the Regents, advancing the period of dental study from three to four years, requiring annual registration and establishing for women the profession of dental hygienist. The pharmacy law was amended (ch. 327) by increasing the preliminary requirement from 15 to 30 counts; the medical law (ch. 328) by requiring the successful completion of a four-year high school course or its equivalent before beginning the first year of medical study. Chapter 380 authorized the College of the City of New York to confer vocational degrees.

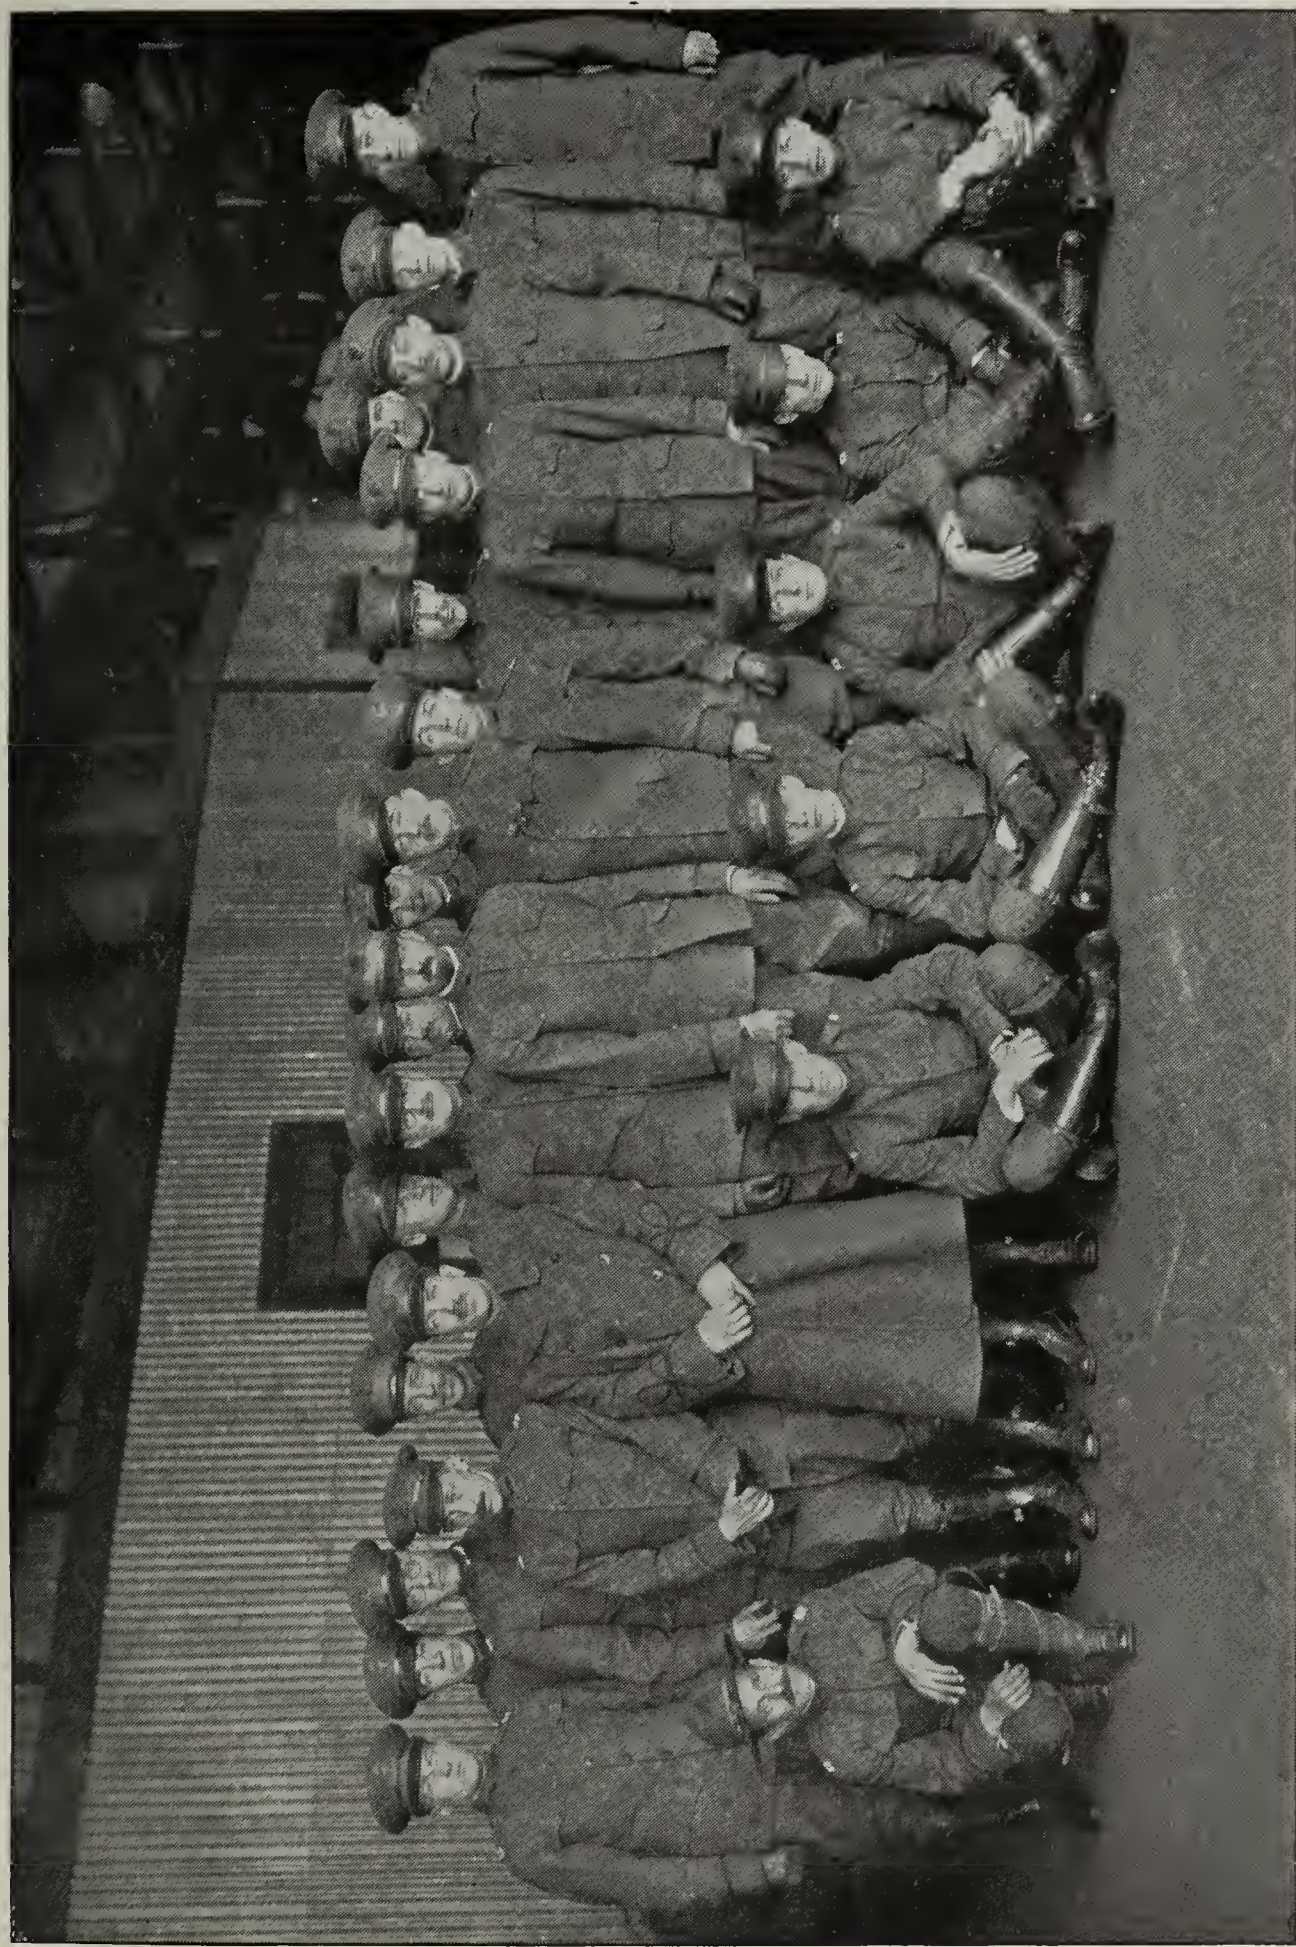

**Summaries.** In 1915 there were 1347 students in attendance in the theological schools of the State; 3110 in the law schools; 3025 in the schools of education; 3584 in the medical schools; 1232 in the dental schools; 1093 in schools of pharmacy; 142 in the veterinary schools; and 4502 in the 130 nurse training schools that reported.

In 1916 there were 1452 students in attendance in the theological schools of the State; 3415 in the law schools; 4304 in the schools of education; 4031 in the medical schools; 1545 in the dental schools; 1181 in schools of pharmacy; 186 in the veterinary schools; and 4766 in the 136 registered nurse training schools from which reports were received.

### Theology

Reference was made last year to the possibility of studying, from the United States census, the ratio of professional men to the population of the State and of the United States which will appear in the next Report for law, medicine, dentistry, veterinary medicine and pharmacy. The facts are not available in the census report regarding theology and its offshoot, education. The publications of the several denominations of the Church, however, show that the

Presbyterian Hospital and College of Physicians and Surgeons. Base hospital unit 2 left for France May 14, 1917.

. LIBRARY  
OF THE  
UNIVERSITY OF ILLINOIS

question is receiving careful consideration at the hands of the leaders, in evidence of which the following, from the Ninety-seventh Annual Report of the Board of Education of the Presbyterian Church for 1916, is illustrative:

The supply of candidates (for the ministry) has been stationary for the past few years, being one to every 1178 of the church membership, according to the Minutes of 1915. This, according to the statistics available since 1820, is about two-thirds of the normal supply of candidates. . . . Putting it in another way, we are forced to realize that had we not received 139 ministers from other denominations we would have been 110 short of the number on the roll the preceding year.

And yet there are those who believe sincerely that there are too many ministers. . . . Among other reasons for the failure of the Church to secure its proper quota of ministers are the following:

- 1 The larger religious activity of the laymen of the Church.
- 2 The present era of material prosperity, which tempts men to seek high careers and accumulate large fortunes.
- 3 The Church and its ministry are largely responsible for present conditions.

Schools of theology continue to receive recognition by the University and the registered list appears on another page of this report.

**Summary.** Detailed information concerning the numbers of students, officers of instruction, degrees granted, and courses offered in the various schools of theology is given in table I of exhibit K. In comparison with 1915 the theological schools of the State show for 1916 the same number of institutions, 8 more instructors and 105 more students.

### Education

When the Regents chartered the New York College for the Training of Teachers, which was founded in 1888, the distinction between the professional school and the independent college was not clearly drawn. But in 1890, when New York University organized its school of pedagogy, the classification of the higher institutions then developing for the training of teachers logically placed them among professional schools, so that Regents rule 408 standardized these institutions in the following words: "*School of education* means any teachers college, school of pedagogy or department of education in a university, whatever the corporate title."

On December 11, 1915 an article appeared in *School and Society* on the present organization of professional training for teachers in American universities, by Prof. Fred E. Bolton.

The following quotation from that article throws light on the different varieties of this class of higher institutions whose dif-

ferentiation begun in New York State as early as 1888 has been carried forward steadily and conservatively:

It will be noted that three general designations of the work attempted are used, viz: colleges, schools, and departments. These designations are not based on any carefully thought out differences in structure but are more or less loosely used in the absence of any standardized nomenclature. Sometimes college and school mean the same thing and department is sometimes used as synonymous with school. In most universities the study of education is regarded as a department of the college of arts or sciences in the sense that chemistry or physics is a department. A considerable number have named themselves "schools of education" but are in reality departments of the college allowing a certain amount of work in education to count toward a degree or to secure certain certificate privileges. Indeed some of the "colleges" have no distinctive curriculum and offer no teaching degree. Fourteen state universities have what they call departments of education. Twenty have what may be called "pseudo schools" with separate curriculums of their own, and only six — Florida, Kansas, Missouri, Ohio, Washington, Pennsylvania (not a state university) — have what appear to be colleges in the sense of having a really separate organization with a separate degree and curriculum (Alexander School Review Monograph No. 6, Feb. 1915). Columbia and Chicago have highly organized independent organizations leading to special teachers' degrees. New York University and Pittsburgh have independent organizations. Columbia has recently changed to a graduate organization, and Brown has inaugurated a form of graduate work. Inexactness in terminology in both the organization itself and the courses offered is quite baffling. In some cases the curriculum begins with the junior year. In Chicago, Pittsburgh, Ohio, Pennsylvania and Washington, the work begins with the freshman year and the college of education has control of the entire course.

**The Society of College Teachers.** The Society of College Teachers of Education was organized in 1902. The secretary-treasurer in 1914-15 was Carter Alexander of the George Peabody College for Teachers, Nashville, Tenn. The meeting of the society was held at Cincinnati, Ohio, February 23, 1915 and the papers presented for discussion at that meeting were issued in cooperation with the societies in the School Review Monographs.

**Certification of secondary school teachers.** In the annual report for 1913 under the caption "Secondary Education," the Assistant Commissioner discussed the certification of secondary school teachers which was more completely reported in 1915. These reports will prove of interest to those pursuing the development of the schools of education apparent in such studies as those from which we quote above.

**Summary.** Detailed statistics concerning the various schools of education for the year are given in table I, exhibit K. In 1916 there were 4 schools of education in the State, having 328 officers of instruction, 4304 students in attendance and 536 graduates.

**Examinations for renewal of college graduate limited certificates, August  
1915 to May 1916**

SUBJECTS	PAPERS WRITTEN	PAPERS ACCEPTED
Psychology.....	103	83

Total.....	585	420

During the year there have been issued 289 provisional certificates to graduates from approved pedagogical courses in colleges and universities; 289 college graduate professional permanent certificates; 260 limited certificates and 133 life certificates. The total number of certificates issued was 971; number renewed 89. This aggregates 1060 as against 855 reported last year.

### Law

The thirty-ninth annual meeting of the American Bar Association was held at Chicago, Ill., August 30—September 1, 1916, Elihu Root of New York presiding. The item of special interest in education was the report of the section of legal education, which was referred to the committee on legal education with instruction to report on the rules and recommendations next year. It was further provided that the rules and recommendations should be printed in the next issue of the Journal, *see* pages 652-54 of volume XLI (1916).

*The standard rules for admission to the bar*, referred to above, were adopted at a joint conference of the state bar examiners and law school teachers under the auspices of the section of legal education at Chicago, August 29-30, 1916.

Another important action by the American Bar Association was the amendment of by-law 14 (section of legal education) by adding thereto a paragraph which establishes "a council on legal education composed of seven members, the functions of which shall be to prepare the program of the section of legal education for the ensuing meeting and by correspondence and other practical means to enlist and increase interest and participation in the sessions of the section." The seven members comprise the chairman and the secretary of the section, the last two preceding ex-chairmen thereof, the chairman of the committee on legal education, a representative of the Association of American Law Schools and a representative of one of the state boards of bar examiners:

**Association of American Law Schools.** The sixteenth annual meeting of this association occurred December 28-29, 1916 at Chicago, Ill. In the report of the executive committee attention was called to the requirements of the association regarding preliminary education in which "it appears to be the practice of a number of schools to admit persons as candidates for the degree deficient in some of the entrance requirements and to permit such deficiencies to be made up while the student is pursuing his law course."

In view of this fact the committee offered resolutions requiring that schools exacting only the minimum entrance requirement of a four-year high school course should require that the same be completed before the study of law is begun, and that even though the required preliminary education be in excess of the minimum prescribed by article VI (1), it should be substantially completed before the study of law is begun.

A supplemental report of the executive committee gives the progress of investigations conducted by it regarding the standing of certain institutions in the association.

Two or three most important discussions occurred in the round table conferences. The first had to do with the executive committee's recommendation, "that after July 1, 1920 it will not accept toward any degree in law credits based upon instruction in night courses." The answer to the arguments advanced against this proposed action was made by the secretary:

The resolution, fairly interpreted, strikes at night school instruction, or instruction in law at night. Not that a man can not learn things after the sun goes down, and that you could not conduct a very good law school at night; but the night school as an educational institution is patronized by the man whose time is substantially occupied with other things. He is during the day earning a living. He is spending the best of his energy in other fields. The theory of the committee was that the legal profession has arrived at this point: that those who seek to enter it by way of graduation from the schools, and who seek to hold a degree in law, should for a period of at least three years make the study of law their chief and primary occupation. . . . We have plenty of lawyers and we are not to sit up nights devising ways for poor and worthy individuals to get to the bar; we might as well recognize frankly, once for all, that to attain to the status of a lawyer, and a membership in a learned profession, a man must expect to devote himself exclusively or substantially so to the study of law for a considerable period, at least three years.

The question was referred back to the incoming executive committee.

Another important question was a resolution fixing a minimum number of instructors in each school of the association which "shall consist of at least three instructors who devote substantially all their time to the work of the school." Three amendments were discussed: first, to refer back the question to the incoming executive committee; second, to define "substantially all their time" as meaning "at least seven hours a week," and third, that "as regards the present members of this association this rule shall take effect September 1, 1919." The motion as amended to take effect September 1, 1919 prevailed by a vote of 34 affirmative, 2 negative, 11 not voting.

The committee's resolution "that in case of members exacting only the minimum entrance requirement of a four-year high school course, all of such requirement should be completed before the study of law is begun" was adopted by the association, as was the resolution "that the period of study required by article VI (2) is to be interpreted as meaning resident study."

A recommendation made by the president in his annual address was adopted as follows: "The executive committee be instructed to confer with the officers of the American Bar Association or any committee which that body may appoint with a view to the formation of a council on legal education, whose functions should be similar to those of the Council on Medical Education, and to report the results of this conference with the Bar Association to the next annual meeting of this association.

**New York State Bar Association.** The thirty-ninth annual meeting was held at New York City January 14, 1916, President Clearwater presiding. A paper of interest in education was presented by Dean Fiero of Albany entitled "Legal Education" which led to seven conclusions to which was added the suggestion "that the matter of legal education is the business of the bar, and its influence needs to be still further exerted not only for the advancement but for the strict enforcement of that standard, and for a gradual but certain advancement of our educational ideals."

A resolution was presented that the whole subject of legal education and of qualifications and examinations for the bar be referred to a special committee with instructions to report recommendations upon the subject with special reference to eight items including, "the raising of standards to that of the college and law school degree, and the strict regulation of the admission to practice of lawyers from states with low standards," which was duly adopted.

**Summary.** Detailed statistics concerning the various law schools for the year are given in table 1 of exhibit K. In comparison with 1915 the law schools of the State show for 1916 the same number of institutions, 4 less officers of instruction, 139 more students, and 96 more LL.B. degrees conferred on completion of course. Through the courtesy of Franklin M. Danaher, secretary of the State Board of Law Examiners, the following statistical report is available:

Statistical report for 1915 and 1916

EXAMINATION	NUMBER EXAMINED		NUMBER FAILED		NUMBER ADMITTED		PER CENT OF FAILURE	
	1915	1916	1915	1916	1915	1916	1915	1916
January.....	292	247	126	119	166	128	43	48
April.....	236	230	105	116	131	114	44	50

Totals.....	1 324	1 245	543	552	781	693	41	44

All who were refused certificates of having passed in all the groups are reported as having failed, many of whom, however, received pass cards for having successfully passed one of the groups.

### Medicine

Despite the conclusive evidence set forth in the 1915 report of this Department, that the "mortality in the medical schools is more apparent than real," the tradition persists. Reference is made to it in the discussions of such representative bodies as the Association of American Medical Colleges and the American Bar Association.

**Association of American Medical Colleges.** The twenty-sixth annual meeting of this association was held in Chicago February 8, 1916. In the address of President C. R. Bardeen, he calls attention to an item that has for a decade received consideration by this Department, and the time seems ripe for entering upon the suggested experiment in New York State.

The old apprenticeship system in medical education had some marked advantages which present system of mass instruction lacks. Is it not possible to restore some of the advantages of the old apprenticeship system without loss of modern scientific training? Can we not utilize a large number of clinical centers for clinical teaching and a large number of progressive men as teachers instead of restricting clinical teaching to a few men connected with large hospitals adjacent to medical schools in large cities?

I believe this can be brought about by encouraging a greater number of practising physicians to qualify for the term doctor in its original sense of teacher. Why should not our medical students after two years of pre-medical college work and two or three years in the medical school be qualified to reside in hospitals, for the most part small hospitals, where they could earn board and room by helpful work about the place and at the same time study under the immediate supervision of members of the hospital staff? Such hospitals should provide diagnostic centers along the lines outlined above. If a few students thus acted as clinical clerks in a series of hospitals during the course of two or three years following the present second or third year in the medical school they could get a broad experience in direct contact with medicine as it is best practised at the present time. Variations in the types of hospitals would secure training in the varied lines of medicine. Each student would come in intimate contact with a considerable number of active progressive men whom he would stimulate and some of whom would in turn inspire. Only hospitals of a certain grade would be recognized for this service and this in turn would serve to stimulate hospital development.

From the 139 registered hospital nurse training schools of the State of New York it ought not to be difficult to select a number sufficient to provide for all the students in the medical schools of the State desirous of entering upon this special instruction.

Dr Gordon Wilson, at the same meeting, in his discussion of medical education with reference to rural Maryland, presents two types or classes of medical schools that are worthy of attention:

(1) The one modeled after the Johns Hopkins, and in which the requirements can hardly be set too high; (2) the other and larger class for the training of the practitioners of medicine.

The first type of school should have an absolutely self-limited number of students, and they should be thoroughly trained not only in clinical and laboratory medicine, but trained also in the methods of research. Naturally, the men who graduated from such a school would become teachers, research workers, specialists and practitioners and consultants in the larger towns and cities. . . .

This second type of school should give a full four-year course, and the work should have little of the elective in it. The clinical and laboratory courses in such a school should be of the very best, but the time devoted to research by the student should be limited to a minimum.

The question raised in this connection has received careful consideration by this Department for many years. It now looks as though the time would soon come when the public and the medical profession will recognize these two classes of physicians and provide for their education and recognition. The practical difficulty has arisen in connection with the differentiation of the school and the differentiation of the degree. When the M.D. degree shall come into its own it will cover the requirements of this higher type of school. The graduate of the lower type will receive a degree that will give him the honor his due, which will be recognized by the public and not detract from the honor of the holder. Several of the older countries of Europe have made the distinction in fact without differentiation in degrees. The two classes of degrees developing in America, the undergraduate and the graduate, make possible the distinction of this classification and the awarding of a suitable degree such as the M.B. for the undergraduate and the M.D. for the graduate.

**American Academy of Medicine.** The forty-first annual meet- of the academy was held in Detroit, Mich., June 9, 1916. Many interesting papers were presented, among which two were of special importance to education, namely, "Requirements Preliminary to the Study of Medicine and the Curriculum" by Dr N. B. Colwell, secretary to the Council on Education of the American Medical Association, and "Examinations for License to Practise and Hospital Interneship" by Dr John M. Baldy, president of the Bureau of Medical Education and Licensure of the State of Pennsylvania. These papers are published in the Journal of Sociologic Medicine for December 1916. Doctor Baldy raises the point of view that has

been repeatedly raised by others, especially by the members of the legislatures asked to enact medical legislation, as follows:

No state medical examining board thinks, when examining an applicant for the practice of medicine, of reexamining him in the A B C's or in reading, writing or arithmetic. No state examining board thinks it necessary to pass upon his qualifications in history, geography and the higher branches. Physics, chemistry, biology and languages are not taken into consideration in state medical examinations. If this be true of the work up to the medical school work and can be done safely, then why should it not be applied equally well to the work done in the medical school itself?

Some years ago, when there was no supervision whatever over the medical schools, when there was no standardization of medical schools and when state boards well knew that the majority of medical schools did not teach medicine properly, the situation was an entirely different one. At the present time medical schools are standardized. The weaker ones are rapidly eliminated.

Is it true "the state inspects the schools and assumes responsibility as to their curriculum and teaching force"? We read of inspections by the Medical Council, by the Carnegie Foundation; but what state of the Union today inspects its medical schools as it does its elementary, or assumes the responsibility for the curriculum and teaching force of the medical school that it assumes for the secondary?

**Council on Medical Education.** The twelfth annual conference of the Council on Medical Education of the American Medical Association was held in Chicago February 7, 1916. The chairman emphasized six points on medical education in America, the leading thought being, "We now have . . . as high a standard (of medical education) as adopted by any country in the world." Doctor Colwell reported progress in medical education from 1865.

In the joint session of the council and the Federation of State Medical Boards there was a symposium on the National Board of Medical Examiners of especial interest to the readers of this Report. The general attitude of state administrative officers was voiced by Dr Herbert Harlan, president of the State Medical Examining Board of Maryland: "Protection of the people is a state police function, and without an amendment to the constitution of the United States can not be taken over by the national government. Such an amendment is not to be hoped for. State medical examining boards must continue, but as a large number of state boards (forty-one) have the legal authority to recognize, as sufficient guaranty of fitness, examinations conducted by boards of other states — examinations in regard to the conduct of which, in many instances, little is known and nothing inquired into — there is no

legal objection to a change of statute granting a state board the authority to recognize the certificate or diploma of a national board as sufficient evidence of medical qualification; but only if, in the good judgment of the state board, the examinations, written, oral and practical, conducted by the national board are of such a character as to justify its acceptance."

The constitution and by-laws of the National Board of Medical Examiners for the United States is printed in the Journal of the American Medical Association for March 4, 1916.

**Annual meeting of the State Board of Medical Examiners.** The annual meeting of the Board of Medical Examiners convened in the office of the board October 21, 1915, with President Minton in the chair and Doctor Bissell acting as secretary pro tem. Doctor Zinsser's absence was excused because of the meeting of the Academy of Medicine in New York City. Doctor Minton was duly elected president and Doctor Booth vice president.

The president brought up the matter of review of papers by committees, whether in the opinion of the examiners the original rating as given a paper by the original examiners should appear upon the paper on return to the committee for review. It was the consensus of opinion that each paper, when sent to a member of the committee on review should contain the original examiner's rating and on formal motion it was voted that the State Board of Medical Examiners recommend to the Board of Regents that the rules governing the State Medical Board be changed to read, after rule 8, line 7, "it," "and such paper shall bear the rating given by the original examiner."

The Assistant Commissioner for Higher Education explained the manner in which members of the Board of Medical Examiners were formerly appointed, and the procedure now followed.

The question of the possible introduction of practical examinations was raised and it was explained that from lack of funds such method could not include all subjects at the present time. The following plan was suggested: any applicant for license that failed in only one subject should be given the option of undergoing a practical examination; the examination to be conducted by a member of the board with such association as might be necessary; the applicant to pass with a rating of 80 per cent; in the event of failure, to attend an institution of learning for not less than one year, and to become proficient in the subject. Such procedure would doubtless enlist the cooperation of institutions of learning throughout the State.

After a thorough discussion and on formal motion it was voted to recommend to the Regents that rule 8 be amended by adding at the end, "It is further provided that the committee or board review will be permitted only to a candidate whose rating by the original examiner is under 68 per cent."

The board then considered the communication regarding "Eminence and Authority" as contained upon page 37 of the medical handbook. After a thorough discussion and on formal motion it was voted that the members of the board see no reason why the present rule as defined under "Eminence and Authority," be changed, and suggest that this rule remain in force as at present outlined. It was the thought of the board that while the rule as at present outlined should remain in force as a definition of eminence and authority, the medical practice act might properly be amended so as to provide for the admission of reputable practitioners of long practice, without their being required to pass all the subjects given in the present examination.

On formal motion it was resolved that the Board of Medical Examiners express their sincere regret in the severance of the official relationship of Dr Otto V. Huffman and convey to him their best wishes for success in his new field, that this expression be spread upon the official minutes of the board, and be conveyed by the secretary to Doctor Huffman.

**Summaries.** The distribution of the medical students among the several higher institutions of New York State in 1916 was as follows: Columbia University, College of Physicians and Surgeons, 376; Cornell University Medical College, 216; Fordham University, School of Medicine, 252; Long Island College Hospital, 269; New York Homeopathic Medical College and Flower Hospital, 177; New York Medical College and Hospital for Women, 55; New York Polyclinic Medical School and Hospital, 422; New York Post-Graduate Medical School and Hospital, 772; New York University, University and Bellevue Hospital Medical College, 1039; Syracuse University, College of Medicine, 114; Union University, Albany Medical College, 150; University of Buffalo, medical department, 189.

The number of students, instructors and other information concerning the various medical schools are given in table 1, exhibit K. In comparison with 1915 the medical schools of the State for 1916 show the same number of registered institutions, 53 less officers of instruction and 470 more students. The number of degrees conferred was 50 less than in 1915.

COMPARISON OF MEDICAL SCHOOLS IN NEW YORK AND OTHER STATES  
AND COUNTRIES

This table shows for 1916 the rejections by topics, exclusive of candidates who took only the first half of the divided examinations. Each applicant is counted only once in the number of candidates, but under the several topics each failure is indicated, excluding any answer papers not examined.

Of the papers submitted by 483 graduates of New York schools 174 were rejected, while 153 of those submitted by 156 graduates of schools in other states, and 74 of those submitted by 21 graduates of schools in foreign countries, were rejected. In addition to these candidates from schools in which there was at least one failure, 23 graduates of 1 New York school and 25 graduates of 17 schools in other states and countries were examined.

## Chiropody

The responsibility for examinations in chiropody has been placed upon the State Board of Medical Examiners by amendment to the

medical practice act. This year covers the fourth year of its administration.

As in our reports of the other professions attention is given to national and state activities, so brief reports affecting chiropody will be given annually under this caption.

**National Association of Chiropodists.** The fifth annual convention of this association was held in Detroit July 31, August 1-3, 1916. Harmony and good fellowship were reported in marked evidence and clinics proved most interesting.

**The Pedic Society of New York State.** The twenty-first anniversary of this society was held June 13th in New York City. The scientific feature of the meeting was the lecture on "Bacteriology" with demonstrations. Delegates were elected to the national convention.

**Registration.** Schools of chiropody are registered by the Regents as maintaining satisfactory standing under the New York medical practice act and its amendments. The medical practice act affecting chiropody, list of recognized schools and synopsis of legal requirements for admission to practice in the several states of the Union are published annually in Handbook 9a, entitled Chiropody.

**Summary.** The number of students in the School of Chiropody of New York registered for 1916 was 96, of whom 86 were men and 10 women. The school reports 31 professors and adjunct professors, 17 instructors, tutors and lecturers, and 36 other assistants on the adjunct force.

**Examinations.** Four examinations were held during the year and the number of candidates were, September, 10; January, 5; May, 3; June, 19; total, 37. Thirty-six passed the examination and 1 was rejected; per cent rejected, 2.7. There were no honors conferred on examination.

## Dentistry

The year under revision has been one of much uncertainty in the dental schools of the United States caused by both the uncertainties of war conditions and the attempts to advance the curriculum.

**National associations.** No information has come to hand regarding the Seventh International Dental Congress planned to be held in Madrid, Spain, under the presidency of Doctor Aguilo.

*The National Dental Association.* This organization held its twentieth annual session at Louisville, Ky., July 24-28, 1916. The item of importance in education was emphasized by the president in his address. "A distinct advance in the educational curriculum of our dental colleges is now assured. Beginning in 1917 all the reputable dental colleges have arranged to operate a four-year course of 33 weeks in each year. Looking backward for over a period of more than 25 years of active teaching, it seems that the colleges of the United States have made wonderful strides. When I graduated it required only two years of twenty-four weeks each, and the course of instruction did not include practical bacteriology, histology or pathology and such a thing as a microscope was unknown in the college. There was no operative or pathologic technic taught but the raw students, many of whom could do little more than read and write, and with very little instruction in preliminary requirements of an educational nature, were simply turned loose on the patients in the infirmary."

*The National Association of Dental Faculties.* The thirty-third annual meeting of this association was held in Louisville, Ky., July 22-24, 1916. The association comprises thirty-two dental schools of the United States and Canada. The reports of the several committees of this association reveal the activity of the schools to a marked degree and throw many interesting sidelights on the administration and disciplining of the members of the organization.

*The Dental Faculties Association of American Universities.* The eighth annual meeting of this association was held at Chicago, Ill., January 28-29, 1916. Seven members of the association had representatives at the gathering. The president's address sets forth concisely the action leading up to the resolution discussed at the meeting "that we build our curriculum so that it will fit into the medical curriculum to the end that dental students desiring to do so may complete in the medical course by further combining subjects in a shorter time than by taking the various subjects independently." Another proposition strongly urged by several mem-

bers was that the first year's work be done entirely in the arts department, making the subjects taken obligatory rather than elective. A third proposition strongly urged by one of our members was that all the subjects should be taught either in the dental department or by special instructors in the arts department subject to advisement or control of the dental faculty."

The resolution referred to "approved the plan of a four-year course of not less than 4800 working hours, the curriculum to consist of not less than 4200 hours to be devoted to such subjects as are deemed essential to the technical and scientific education of the dental practitioner with the understanding that ancillary subjects shall be elective and not consume more than 600 hours of the course. The resolution was adopted by the association subject to the following interpretation: "the word 'elective' appearing in said resolutions as related to ancillary subjects shall be a function to be exercised by the administration of the respective dental schools and not by the students thereof."

The discussion of a resolution with regard to advanced standing to undergraduate medical students, after vigorous discussion, was amended "that they be promoted subject to any unfinished work of the first year and that the resolution so amended shall apply only to the present three-year curriculum."

**Dental Society of the State of New York.** The forty-eighth annual meeting of this society was opened May 11, 1916 in Albany. An activity of this association, little appreciated by the general public, is reported by the law committee and the executive council on formal motion appointed a committee to arrange for the time, place and expenses of a testimonial to be tendered to Dr William Carr for thirty-three years' service as chairman of the law committee and to the attorney for the law committee, William A. Purrington.

**State Board of Dental Examiners.** The annual meeting of the State Board of Dental Examiners was held in Albany October 17, 1916. There were present President Wright, Secretary Terry, Director of Professional Education Downing; and Messrs Walker, Cook, Burkhardt, Bennett, White and Gross.

A verbal report on the tentative syllabus on college courses made by Doctor Cook, who moved that the minimum schedule be 1000 hours a year, was adopted. On formal motion, the answering of the first six questions on the examination papers was made mandatory.

The adoption of the syllabus as read as a whole with such changes as were recommended by the individual examiners was formally voted.

The rules to govern reciprocity between New York State and Vermont were presented, and on formal motion, the matter of reciprocity was laid on the table.

The subjects and scope of the tentative hygienists' course of study were deferred to a special committee for conference and report at the morning session.

A committee of three was appointed to recommend subjects for the examination of dental hygienists.

At the adjourned meeting of the board held October 18th, Doctor Wright was elected president and Doctor Cook, editor.

The secretary was requested to secure from the Vermont State Board of Dental Examiners a set of their questions and the answer papers of one or more who took the examination and other information regarding the filing of papers and the keeping of records of the board. He was also instructed to notify the dental schools of the State of the change in the proposed syllabus.

The suggested subjects of the dental hygienist course of study and scope of the same were referred to a committee comprising Doctors Cook, Walker and Wright.

*Special meeting of the State Board of Dental Examiners.* This meeting was held in Albany, May 28, 1918. Its purpose was to receive the charges preferred against certain dentists for unprofessional and immoral conduct in aiding and abetting illegal practices.

The proposed revision of the rules of the board were also discussed. On formal motion, the president appointed a committee comprising Doctors Burkhart, West and Walker to hear the charges preferred against the dentists, the committee to meet on June 15th at the Education Building.

On formal motion, the president was empowered to appoint at any time in the future that charges may be preferred against legal practitioners, a committee of three to hear such charges and that the member of the board from the district in which the offense was committed should not serve on such committee.

On formal motion, rule 1 was suspended so that the next annual meeting of the board should be held in New York at the same time as the National Dental Association, the date and place to be designated in the call for the meeting.

**Summaries.** The number of student inspectors and other information concerning the various dental schools is given in table 1 of exhibit K. In comparison with 1915, the dental schools of the State show the same number of institutions, 1 less officers of instruction, 206 more students. There were 35 more degrees conferred.

**Examinations.** Dental licensing examinations were held January 25-29, June 27-July 1, and September 19-23, 1916. The results of the dental licensing examinations from 1898 to 1916 inclusive are presented in tabular form as well as the rejection by topics, in the following tables:

### Comparison of Dental Schools

The dental schools of New York State compare favorably with those of other states as shown by the licensing examinations. The table shows for 1916 the rejections by topics: group 1, New York schools; group 2, schools in other states and countries. Each applicant is counted only once in the number of candidates, but under the several topics each failure is indicated, excluding any answer papers not examined. Of the papers submitted by 476 graduates of New York schools, 174 were rejected, while 131 written by 116 graduates of schools in other states and countries were rejected. In addition to the above, 2 candidates had filed evidence of study under private preceptor before Aug. 1, 1895, five of whose papers were rejected and 6 candidates were graduates of schools against which no failure was charged in 1916.

## Pharmacy

The national gatherings in the interest of pharmacy during the year showed a keen perception of the importance of higher educational standards.

**National Associations.** *The American Pharmaceutical Association* held its sixty-fourth annual meeting at Atlantic City, September 5-9, 1916 under the presidency of Dr William C. Alpers. "All of the section meetings throughout the convention were well attended and the discussions were spirited and lengthy. The number of new resolutions adopted was not as great as at some former meetings, but there was every indication that the membership is coming more and more to be in agreement on certain fundamental matters which have been under discussion for many years."

The proposition to have the Carnegie Foundation investigate the pharmaceutical colleges of the country was discussed by the section on education and legislation. The failure of the foundation to carry on the work induced the leader of the discussion to suggest that the association should undertake this work at an early date.

*The National Association of Boards of Pharmacy.* The thirteenth annual convention of this association was held August 31st in Philadelphia. Twenty-eight states were represented at this meeting.

A resolution was adopted recommending that annual meetings of the association be held at the same date and place as the American Pharmaceutical Association conventions on Monday and Tuesday of the same week, provided that the program of sessions and the joint sessions of the faculties and boards be arranged so that the most important sessions of these bodies will not conflict. In order to make this resolution operative, a committee comprising the president, secretary and chairman of the executive committee was constituted to confer with the program committee of the American Pharmaceutical Association.

*American Conference of Pharmaceutical Faculties.* The seventeenth annual meeting of this association convened in Philadelphia, September 1st, Prof. H. V. Army presiding. The president commented on six items presented by his predecessor, including the Ohio "prerequisite" law, the advancement requirements for admission to schools of pharmacy, the protest of the New York State representatives in the conference, the inauguration of a course in pharmacy in a technical high school and establishment of a pharmaceutical scholarship.

The American Pharmaceutical Association was requested to print the report of the committee on "prerequisite" arguments, which appear in the Journal of September 1916.

A joint session of the boards and conference was held in Philadelphia September 1, 1916. The object of the meeting was the discussion of the possibility of bringing together the two associations and the bringing about of more favorable relations between the boards and the faculties.

**The New York State Pharmaceutical Association.** The thirty-eighth annual convention of this Association was held at Richfield Springs, June 20-23, 1916, President Wardell in the chair. The usual reports of the various committees show the interest of the association in both state and national affairs. Legislative measures in the State kept the legislative committee of the association actively engaged during the entire session. Heretofore the report of the State Board has been made both to the association and to the Regents. It has been first reported by the association and later abridged in the Regents reports. This year it is published as approved by the board and submitted to the Regents.

**State Board of Examiners.** The sixth annual meeting of the board was held in the Education Building, Albany, September 13-14, 1915. Except Mr Hyde, all the members of the board were present, and also the secretary. Wayne B. Bissell of Syracuse was

elected president for the ensuing year; Jacob Diner, of New York City, vice president; Warren L. Bradt and Alfred B. Husted, questions committee; and the violations committees for Albany, Alfred B. Husted, John Hurley, J. Leon Lascoff; for Buffalo, Byron M. Hyde, Willis G. Gregory, Wayne B. Bissell; for New York, George C. Diekman, Jacob Diner and Jacob Rehfuß.

On December 15, 1915, Wayne B. Bissell died. Mr Bissell was originally appointed an examiner on the Board of Pharmacy May 2, 1912 for the unexpired term of Judson B. Todd, deceased. On June 24, 1915 he was reappointed to succeed himself for a period of three years and on September 14, 1915 was elected president of the board. Mr Bissell served with distinction up to the time of his death. Being a man of sterling qualities and deeply interested in the profession of pharmacy he will be missed, not only by the members of the board, but by the pharmacists in general throughout the State.

At a meeting held April 27, 1916 the Board of Regents appointed Charles B. Sears of Auburn to succeed the late Mr Bissell as an examiner on the Board of Pharmacy.

On March 2, 1915 a special meeting of the Board of Pharmacy was held in the office in the Education Building in conjunction with the Pharmacy Council to take action on the question of increasing the entrance requirements in schools of pharmacy.

Reports were heard from delegates to the American Pharmaceutical Association, representing the deans of the pharmacy schools of New York State.

Upon formal motion the Pharmacy Council

*Voted*, That it is the sense of the Pharmacy Council that the requirements of the second year in high school or its equivalent be introduced after January 1, 1918.

Thereupon, the Board of Pharmacy

*Voted*, That the Board of Pharmacy indorse the action of the Pharmacy Council relative to the second year high school, or its equivalent, be required for entrance to schools of pharmacy after January 1, 1918.

On March 16th a bill was introduced in the Legislature amending section 233 of the pharmacy law by striking out the words in subdivision 3 (Had prior to the beginning of the first year in the school 15 Regents counts or the equivalent) and substituting therefor "Had prior to January 1, 1918, 15 academic counts or the equivalent, before beginning the first year of study in the school and after

that date had 30 academic counts or the equivalent before beginning such study." This measure became a law April 27, 1916, on which date it was signed by Governor Whitman.

At the meeting on March 2, 1916 Dr Jacob Diner of New York City was elected president to succeed the late Mr Bissell and Mr John Hurley of Little Falls was elected vice president.

At the meeting of the Board held September 13-14, 1915 eleven pharmacists appeared before the board to show cause why their licenses should not be revoked or suspended as provided for by the pharmacy law and the rules of the board.

After thoroughly considering the evidence presented the board  
*Voted*, To revoke the license of Frank S. Smith of Auburn.

To suspend for one year the license of Anson B. Holmes  
of Corning.

To suspend for six months the license of Wilhelm Becker  
of Jeffersonville.

The secretary was directed to advise the above of the action of the board and to request the return of their licenses to this office, which were duly received.

### *Experience of Candidates for Admission to the Licensing Examinations for Pharmacist and Druggist*

Since 1901 when the law became operative requiring registration for pharmacies and drug stores, provision was made on applications for registration for listing all the unlicensed employees irrespective of the character of the work engaged in.

Owing to the failure of the proprietors to list each and every employee, both the Department and this board have been subjected to great trouble and annoyance in adjusting experience of candidates seeking admission to the examinations for the reason that experience claimed and for which affidavits are submitted could not be verified from the records for registration of the pharmacies in which experience is claimed.

It does not seem right or fair that the candidate, who is really the sufferer, should be deprived of any experience because of the negligence of the proprietor in not listing him on his application for registration. At one time the responsibility for registration as apprentice was placed upon the proprietor but now the law places the responsibility upon the applicant.

It is only reasonable to conceive the fact that in a great many instances young men entering pharmacies are not aware of the

requirements of the law regarding registration as apprentice and the listing of their names on application for registration of pharmacies or drug stores, but since the registration of pharmacies has been in operation for upwards of sixteen years it is not unreasonable to expect that the proprietors should, knowing the requirements of the pharmacy law, make it a point to list each and every unlicensed employee and the capacity of the work engaged in. Statistics show that it is in the stores employing but a few such clerks that the proprietors, for various reasons expressed, fail to list all their unlicensed employees.

Inasmuch as a period of thirty days is provided for by law in which to file the application for registration of pharmacy or drug store, and in justice to the young men who are spending four of the best years of their lives in acquiring experience necessary for admission to the examinations, surely it is not asking too much of the proprietor to be accurate in filling out his application, listing each and every unlicensed employee as required, thereby establishing evidence of the experience of such candidates seeking admission to the examinations in the future.

### Optometry

The rise of optometry legally considered has occurred in the United States during the last ten years.

**Medical law of 1906.** The medical law in force prior to 1907 affected optometry only by the provision "this article shall not be construed to affect . . . any manufacturer of artificial eyes . . . in fitting such . . . on persons in need thereof."

This medical law was amended by the Legislature of 1907 through the combined efforts of several interested bodies, notably the regular, the homeopathic and the eclectic practitioners of medicine, the osteopaths and the optometrists. It is unnecessary to enter into a discussion of the alignment of these forces, the result of which was the amended medical act of 1907 in which the following provision is found, affecting optometry: "The article shall not be construed to affect . . . any person or manufacturer who mechanically fits or sells lenses, artificial eyes, limbs or other apparatus or appliances, or is engaged in the mechanical examination of eyes, for the purpose of constructing or adjusting spectacles, eyeglasses and lenses."

This action of the Legislature cleared up the atmosphere for the enactment of the first optometry law of the State, by chapter 460 of the Laws of 1908, which became a law on May 21st, and in which "the practice of optometry is defined to be the employment of any means other than the use of drugs for the measurement of the powers of vision and the adaptation of lenses for the aid thereof."

Under the rules of the Regents, the education preliminary to the study of optometry was fixed at the successful completion of two years in a recognized high school, subsequent to eight years of elementary preparation, or its equivalent, 30 counts in Regents examinations.

The professional education required, under the Regents rules, was the completion of a two-year course in optometry.

*1901.* The first optometry law was enacted by Minnesota in 1901, which required an examination only and made no provision for the general education and professional educational requirements that developed later.

*1906.* In 1906, five states had enacted optometry laws, namely, California, Minnesota, North Dakota, New Mexico and Oregon, but no special provision had been made for the general education preliminary to the study of optometry or a professional education preliminary to entrance on the licensing examination.

*1913.* In 1913, thirty-one states had optometry laws, and the thirty-second, Wisconsin, awaited the governor's signature; that is, in the twelve years from the enactment of the first law by Minnesota, the profession had been advanced to recognition by thirty-one states.

*1916.* In 1916 there were thirty-eight political divisions of the United States that had laws affecting the practice of optometry, namely, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin.

**Preliminary education.** The general education required by the law or rules of the several states follows: Arkansas, two years' high school; California, two years' high school; Colorado, fair primary; Connecticut, two years' high school; Delaware, two years' high school; Florida, two years' high school; Georgia, two years' high school; Indiana, diploma from a commissioned high school; Iowa, two years' high school; Maine, four years' high school; Maryland, two years' high school; Massachusetts, two years' high school; Michigan, four years' high school; Minnesota, four years' high school; New Hampshire, two years' high school; New Jersey, two years' high school; New York, two years' high school; Oklahoma, two years' high school; Oregon, two years' high school; Rhode Island, two years' high school; South Dakota, two years' high school; Tennessee, one year high school; Utah, two years' high school; Virginia, two years' high school; Washington, two years' high school; West Virginia, two years' high school. That is, four of the thirty-seven states require four years' high school or its equivalent for admission to the licensing examination; twenty require two years; one requires one year; one requires a primary education; and twelve have no requirement of a general education preliminary to the study of optometry.

**Professional education.** The professional educational requirements as set forth in law or rules in the several states, are: Arkansas, two years' study of optometry in an office or in a school of optometry; Colorado, diploma from approved school or three years' study and experience; Connecticut, two years' study or graduation from school; Delaware, three years' study or graduation

from school; Florida, two years' training or diploma from school; Georgia, diploma (after July 1, 1917) from the two-year course of an approved school; Illinois, two years' study or graduation from school; Indiana, two years' school; Iowa, two years' school; Maine, three years' study or two years' school; Massachusetts, two years' study or school; Michigan, two years' study or school; Minnesota, two years' apprenticeship or school; Montana, two years' school; New Hampshire, three years' study or two years' school; New Jersey, three years' study or two years' school; New York, three years' study or two years' school; North Dakota, two years' school; Oklahoma, two years' study or school; Oregon, two years' school or three years' study; Rhode Island, three years' study or two years' school; South Dakota, three years' study or two years' school; Tennessee, two years' study or two years' school; Utah, three years' study or three years' school, or three years' practice; Virginia, three year's study or two years' school; Washington, three years' study or two years' school; West Virginia, a year and one-half of study or two years' school; Wisconsin, two years' study or one year school. That is, twenty-eight of the thirty-seven states have professional requirements for admission to the licensing examination, either experience or schooling or study or all three, and ten have no professional requirement.

**Examinations.** Examinations are required for admission to the practice of optometry in the following states: Arizona, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, total thirty-four. Of this thirty-four, the following may in the discretion of the board indorse licenses from another state board extending like privileges: Georgia, Illinois, Iowa, Maine, Michigan, Minnesota, Tennessee. Four states permit of a modified examination, such as Arkansas, two years' reputable practice in the state, with an examination in practical optics prior to March 1917.

**Publications.** Optometry is a present illustration of the development of the professions in the United States. During the year under review, one of the important questions in the advancement of the profession received considerable attention — its publications. As usual, both those for and against the ownership of the Journal

by the association, present the usual arguments. On the one hand, the opponents claimed "the publishing business is a profession in itself and is outside the scope of the purposes of a trade or professional association." On the other hand, those in favor raised the question "what an organization like the American Optical Association exists for if not to further the educational interests of its members the same as any other specially scientific organization is very hard to see. . . . If such an undertaking were prohibited, it would not be long before a ban would be placed upon all printing save that vouchsafed to us by the trade journals."

An example of a distinction between the trade journal and the journal of a profession is found in the pages of the Journal, from which these questions are made. Since 1900, the Regents have annually revised the register of professional education in the United States and printed it in handbook form for gratuitous distribution throughout the world. One item of the register giving in concise form the statutory requirements for admission to practice of each profession, has appeared in the handbook under the caption "Synopsis." For example, an introductory sentence reads: "This study is made for those who would see at a glance the statutory requirements for the practice of optometry throughout the United States." This statement and the subsequent information regarding optometry in the United States appeared in the columns of the Journal without acknowledgment of the source or authority for the study.

**The American Optical Association.** The nineteenth annual convention of this association was held in Providence, R. I., July 15-22, 1916, President F. J. Alexander in the chair. The leading features of an American professional's annual gathering were clearly exemplified at this session.

The first three days of the convention were given up entirely to courses conducted under auspices of the scientific section of the association. At the same time, representatives of the wholesale and manufacturing houses were arranging displays of optical goods of all kinds.

At the formal opening, there were addresses of welcome by prominent representatives of the city and of the state responded by prominent representatives of the association. The president delivered his annual address and announced the convention committees.

The opening of the convention was preceded by an excursion to the works of the American Optical Company.

The convention settled down to regular work, taking up the formal lectures and talks on a large variety of subjects. Wednesday, an evening's program was of a special character, to which the public was invited and included musical numbers and a lecture. The closing day was given up to original research papers of the scientific section.

**National Organization of State Boards of Examiners.** The final illustration of the various associations cooperating in the advancing of the profession, is this organization that met upon special call December 11-12, 1916 at Chicago. The stenographic report of the Providence meeting was read and approved and the principal subjects taken up for consideration are given in the following outline:

*Optometry laws:* administration.

*Examinations:* preliminary requirements; professional requirements.

*Accrediting schools:* character of curriculums; length of courses; outline of subjects with number of hours assigned to each; teaching staff and equipment; textbooks, instruments etc.

*Board examinations:* scope and character of written examinations; number of questions and classification; correcting papers and appraising oral work; allotment of credits; passing percentage; minimum average percentage; minimum passing percentage of each group; scope of oral examinations; number and character of subjects; allotment of credits; passing percentage; minimum average percentage; minimum passing percentage for each group.

*Board accounting forms:* reciprocity; legislative recommendations; visit to optometry schools; 10 cent glasses as a menace to public welfare.

**Optical Society of the State of New York.** The twenty-first annual convention of this society met in Albany, June 19, 1916, President P. A. Dilworth in the chair.

The following from the president's address is illustrative of the purpose of these voluntary associations of the professions: "From the beginning, the purpose of the organization has been to promote and develop the interests of optometry as an independent profession. We have steadfastly upheld the ideals of a profession whose scope is clearly defined in our optometry law which does not trespass in the slightest degree upon the legitimate fields of any other profession. We have upheld high ideals of ethical practice; we desire friendly and harmonious relations with the other

professions, with which we may properly cooperate, and we insist upon our absolute right to continue our work of developing and advancing the standards of our profession, without any selfish dictation from outside interests."

The society adopted a resolution that the amendments to the optometry law presented to the last Legislature be indorsed by the convention; that the legislative committee cooperate with state society officers and the Education Department regarding the need or necessity for minor changes, which, after approval by the several local societies, shall be pressed by the legislative committee for legislative enactment. An education program of very considerable interest was successfully carried through.

**The State Board of Examiners in Optometry.** The eighth annual meeting was held in the State Education Building, Albany, October 19, 1916. Present: Messrs Bissell, Watts, Fox and Marchant. The minutes of the seventh annual meeting and the eighth annual report of the secretary were read and approved. The board was reorganized for the ensuing year by the election of C. F. Prentice as president and W. W. Bissell as secretary, and the appointment to the questions committee of W. W. Bissell and C. F. Prentice.

Applications for certificates of exemption by George A. Warner and Salvatore F. deMarti were reconsidered, but the additional evidence presented did not justify a reversal of the former decision of the board, and they were not recommended for exemption.

Upon additional evidence presented by Charles C. Taylor, Nathan Levy and Bernard Sentor, the board granted to each a certificate of exemption and a license to practice.

*Eighth annual report.* Examinations held, 3; October 1915, January and June 1916. Examination papers prepared; three full sets in each subject. Taking examinations: 29 new candidates; one subject; 11 previously failed.

Attained required standing: 26 new candidates; one subject; 9 previously failed.

Applications for certificates of exemption previously refused.

Reconsidered and recommended: Julius Applebaum, Adolph Landau, Joseph Ruthig, Abraham Sussman.

Reconsidered and refused: Samuel Blum, Orlando B. Shedd.

Pending: George H. Thamer, Nathan Levy, Bernard Sentor.

Charges preferred since last meeting: none.

The hearing in the case of E. I. Silverman, against whom charges were preferred by the Utica Optometrical Society, occurred in

Utica, N. Y., November 22, 1915. The committee appointed to hear the charges was W. W. Bissell, chairman, George R. Fox and Herbert C. Watts. After a careful consideration of the evidence taken, the committee unanimously voted to ask the Board of Regents to cancel said Silverman's certificate of exemption. Such a request has been made of the Board of Regents, accompanied by the evidence taken at the hearing.

The hearing in the case of Frederick Hoffa, against whom charges were preferred by the department of health of New York City, occurred in New York City, where the defendant lives, on January 24, 1916. The committee appointed to hear the charges was W. W. Bissell, chairman, George R. Fox and Herbert C. Watts. After a careful consideration of the evidence taken, the committee unanimously voted to ask the Board of Regents that the certificate of said Hoffa be canceled.

**Advisory Council.** No council has been provided for by Regents rules in optometry at the date of this report. The conference reported last year between the members of the board and the representatives of the profession resulted in the establishment of closer relations that will doubtless soon materialize in the formal appointment of a council representing the several interests of optometry in the State.

**Registration.** Schools of optometry receive recognition through registration by the Regents, and the list of institutions registered under section 413 is published in Handbook 28. There were no optometry schools registered during the year 1915-16.

**Inspection.** The inspection of the schools of optometry in the State and all others in process of development was made by representatives of the Department during the year, and attendance on the associations and meetings by these representatives proved helpful. Provision is made for the annual reporting of students and other data from the schools of the State, which will permit of contrast and comparison as the years go by.

**Summary.** The number of students, instructors and other information concerning the schools of optometry in the State is given in Table I of exhibit K. In comparison with 1915 the schools of optometry of the State show the same number of institutions, 4 less officers of instruction and 11 less students in attendance. There were 22 certificates conferred on graduation.

## Results of optometry licensing examinations 1909-16

**Veterinary Medicine**

This profession made a distinct advance during the period under review by assuming the responsibility for the publication of a journal devoted to the interests of veterinary medicine.

The minutes of the meeting of the committee of the International Veterinary Congress held in August 1914 are published in the October 1916 number of the Journal of the American Veterinary Medical Association with a significant footnote: "Different circumstances prevented the publication of the minutes of the London meeting at an earlier date." The secretary at that date was Prof. D. A. DeJong, Leyden, The Netherlands.

**American Veterinary Medical Association.** The fifty-third annual convention of this association was held in Detroit, Mich., August 21-24, 1916. Governor Ferris delivered the address of welcome, which was responded to by J. G. Rutherford of Alberta, Canada, which shows the international relations of this organization. The secretary's report recites the financial condition of the association, the necessity for its reorganization and the steps made toward its incorporation. The report of the committee on intelligence and education affirms that there are approximately 20,000 practising veterinarians in the United States and Canada and that there were in the veterinary schools approximately 3160 of whom 835 were seniors. "The demand is not for more but for veterinarians with a more thorough training, not only in strictly professional lines but in related lines that shall not only make him more efficient as a professional man, but more useful to humanity. . . . The greatest defect in veterinary education at present is the lack of a

thorough preliminary education upon which to build a professional training. . . . At present, there is a wide difference of opinion in the different colleges as to what our present entrance requirements mean. Prospective students that fail on the entrance examination at one college, go to another and pass the same or a similar examination. Most of the entrance examination questions are simple and the grading too liberal."

The committee also recommended the preparation of an outline schedule for a four-year veterinary course, that can be used as a guide for the various schools. There is much work to be done for the improvement of veterinary education in America. The veterinarians of the future must have a thorough technical and broadly human training. Calling ours a learned profession does not make it so. We are judged by the public and we shall only be recognized as a learned profession when we meet the standard set by similar professions."

**The New York State Conference for Veterinarians.** The ninth conference was held January 16-17, 1917, at Ithaca.

**State Board of Veterinary Examiners.** A meeting of this board was held February 7, 1916 at Albany. At this meeting, the following definition of the practice of veterinary medicine was adopted: "A person practises veterinary medicine within the meaning of this article, except as hereinafter stated, who holds himself out as being able to diagnose, treat, operate or prescribe for any animal diseases, pain, injury, deformity or physical condition, and who shall either offer or undertake, by any means or method, to diagnose, treat and operate or prescribe for any animal disease, pain, injury, deformity or physical condition."

*Procedure for revocation of a license or the annulment of registration.* Proceedings for the revocation of a license or the annulment of registration shall be begun by filing a written charge or charges against the accused. These charges may be preferred by any person or corporation or the Regents may on their own motion direct the executive officer of the Board of Regents to prefer said charges. Said charges shall be filed with the executive officer of the Board of Regents, and a copy thereof filed with the secretary of the board of Veterinary Medical Examiners. The Board of Veterinary Medical Examiners when charges are preferred, shall designate three of their number as a committee to hear and determine said charges. A time and place for the hearing of said charges shall be fixed by said committee as soon as convenient, and a copy of the charges, together with a notice of the time and place

when they will be heard and determined shall be served upon the accused or his counsel at least ten days before the date exactly fixed for said hearing. Where personal service or service upon counsel can not be effected, and such fact is certified on oath by any person duly authorized to make legal service, the Regents shall cause to be published for at least seven times for at least twenty days prior to the hearing in the local papers in the county in which the veterinarian was last known to practise a note to the effect that at a definite time and place the hearing will be had for the purpose of hearing charges against the veterinarian upon an application to revoke his license. At said hearing the accused shall have the right to cross examine the witnesses against him and to produce witnesses in his defense, and to appear personally or by counsel. The said committee shall make a written report of its findings and recommendations to be signed by all its members, and the same shall be forthwith transmitted to the executive officer of the Board of Regents. If the said committee shall unanimously find that said charges or any of them are sustained and shall unanimously recommend that the license of the accused be revoked or his registration be annulled, the Regents may thereupon in their discretion revoke said license or annul such registration or both. If the Regents shall annul such registration they shall forthwith transmit to the clerk of the county or counties in which said accused is registered as a veterinarian a certificate under their seal certifying that such registration has been annulled and said clerk shall upon receipt of said certificate file the same and forthwith mark said registration "Annulled." Any person who shall practise veterinary medicine after this registration has been marked "Annulled," shall be deemed to have practised veterinary medicine without registration. Where the license of any person has been revoked or his registration annulled, as herein provided, the Regents may after the expiration of one year entertain an application for a new license, in like manner as original applications for licenses are entertained; and upon such new application they may in their discretion, exempt the applicant from the necessity of undergoing any examination.

**Summaries.** In comparison with 1915 the veterinary schools of the State show the same number of institutions, 2 more officers of instruction and 46 more students. There were 6 less degrees conferred.

**Examinations.** The veterinary licensing examinations were held January 25-28, 1916, May 16-19, June 27-30, September 19-22, at Albany, Buffalo, New York, Syracuse. Twenty-nine veterinarians were licensed on the examination.

### Nurse Registration

Under the caption "Medicine" reference is made to the address of President C. R. Bardeen of the Association of American Medical Colleges at its twenty-sixth annual meeting, who called attention to an item that has received careful consideration by this Department for several years. The time seems ripe for the development, at least in the State of New York, of the suggestion made by President Bardeen. It is repeated in this place for convenience of study by leaders in nurse registration:

Is it not possible to restore some of the advantages of the old apprenticeship system without loss of modern scientific training? Can we not utilize a large number of clinical centers for clinical teaching and a large number of progressive men as teachers instead of restricting clinical teaching to a few men connected with large hospitals adjacent to medical schools in large cities?

I believe this can be brought about by encouraging a greater number of practising physicians to qualify for the term "doctor" in its original sense of teacher. Why should not our medical students, after two years of premedical college work and two or three years in a medical school, be qualified to reside in hospitals, for the most part small hospitals, where they could earn board and room by helpful work about the place and at the same time study under the immediate supervision of members of the hospital staff? Such hospitals could provide diagnostic centers along the lines outlined above. If a few students thus acted as clinical clerks in a series of hospitals during the course of two or three years following the present second or third year in the medical school they could get a broad experience in direct contact with medicine as it is best practised at the present time. Variations in the types of hospitals would secure training in the varied lines of medicine. Each student would come in intimate contact with a considerable number of active progressive men whom he would stimulate and some of whom would in turn inspire. Only hospitals of a certain grade would be recognized for this service and this in turn would serve to stimulate hospital development.

On the other hand, it should be noted that in addition to the advantages suggested by the speaker, the advantages to the hospital and to the nurse training school could be enhanced by the development of those that inspire teachers both for the medical schools and for the nurse training schools.

**American Nurses Association.** The nineteenth annual convention of this association met April 24 to May 3, 1916 in New Orleans, La., Anna W. Goodrich presiding. The proceedings are published in the June 1916 number of the American Journal of Nursing, which is volume 16, number 9. The proceedings in their logical arrangement, fulness and clarity may well serve as a model for other associations, as the Journal is for similar publications. A para-

graph from the president's address will illustrate one of the functions of the association and at the same time furnish the president's conception of a comprehensive law governing the practice of nursing:

The reports from those concerned with standardizing nursing education through state laws, will be of no slight interest. We shall find that one state has but a few weeks since, through some amendments, placed upon its statute books the most comprehensively progressive law governing the practice of nursing, that has yet been enacted, a law that requires that every woman desiring to practise as a graduate, certified or registered nurse, shall have not less than four years of high school and three years of professional training in a school of accepted standards; that provides for inspection and a registration fee sufficient to enable the work to be effectively carried on; and finally provides a reciprocity clause which is the most equitable that has yet been drawn since it permits a graduate in nursing of a training school maintaining standards equal to those of the state of Maryland, it matters not in what state the school may be, if already registered, to register without further examination.

**New York State Nurses Association.** The fifteenth annual convention of this association was held in Buffalo October 18-20 1916, proceedings of which appears in the December number of the American Journal of Nursing, volume 17, number 3. The evening session of Thursday was taken up by discussions of a bill presented for the state registration of nurses which was discussed by prominent medical men of Buffalo as well as by the members.

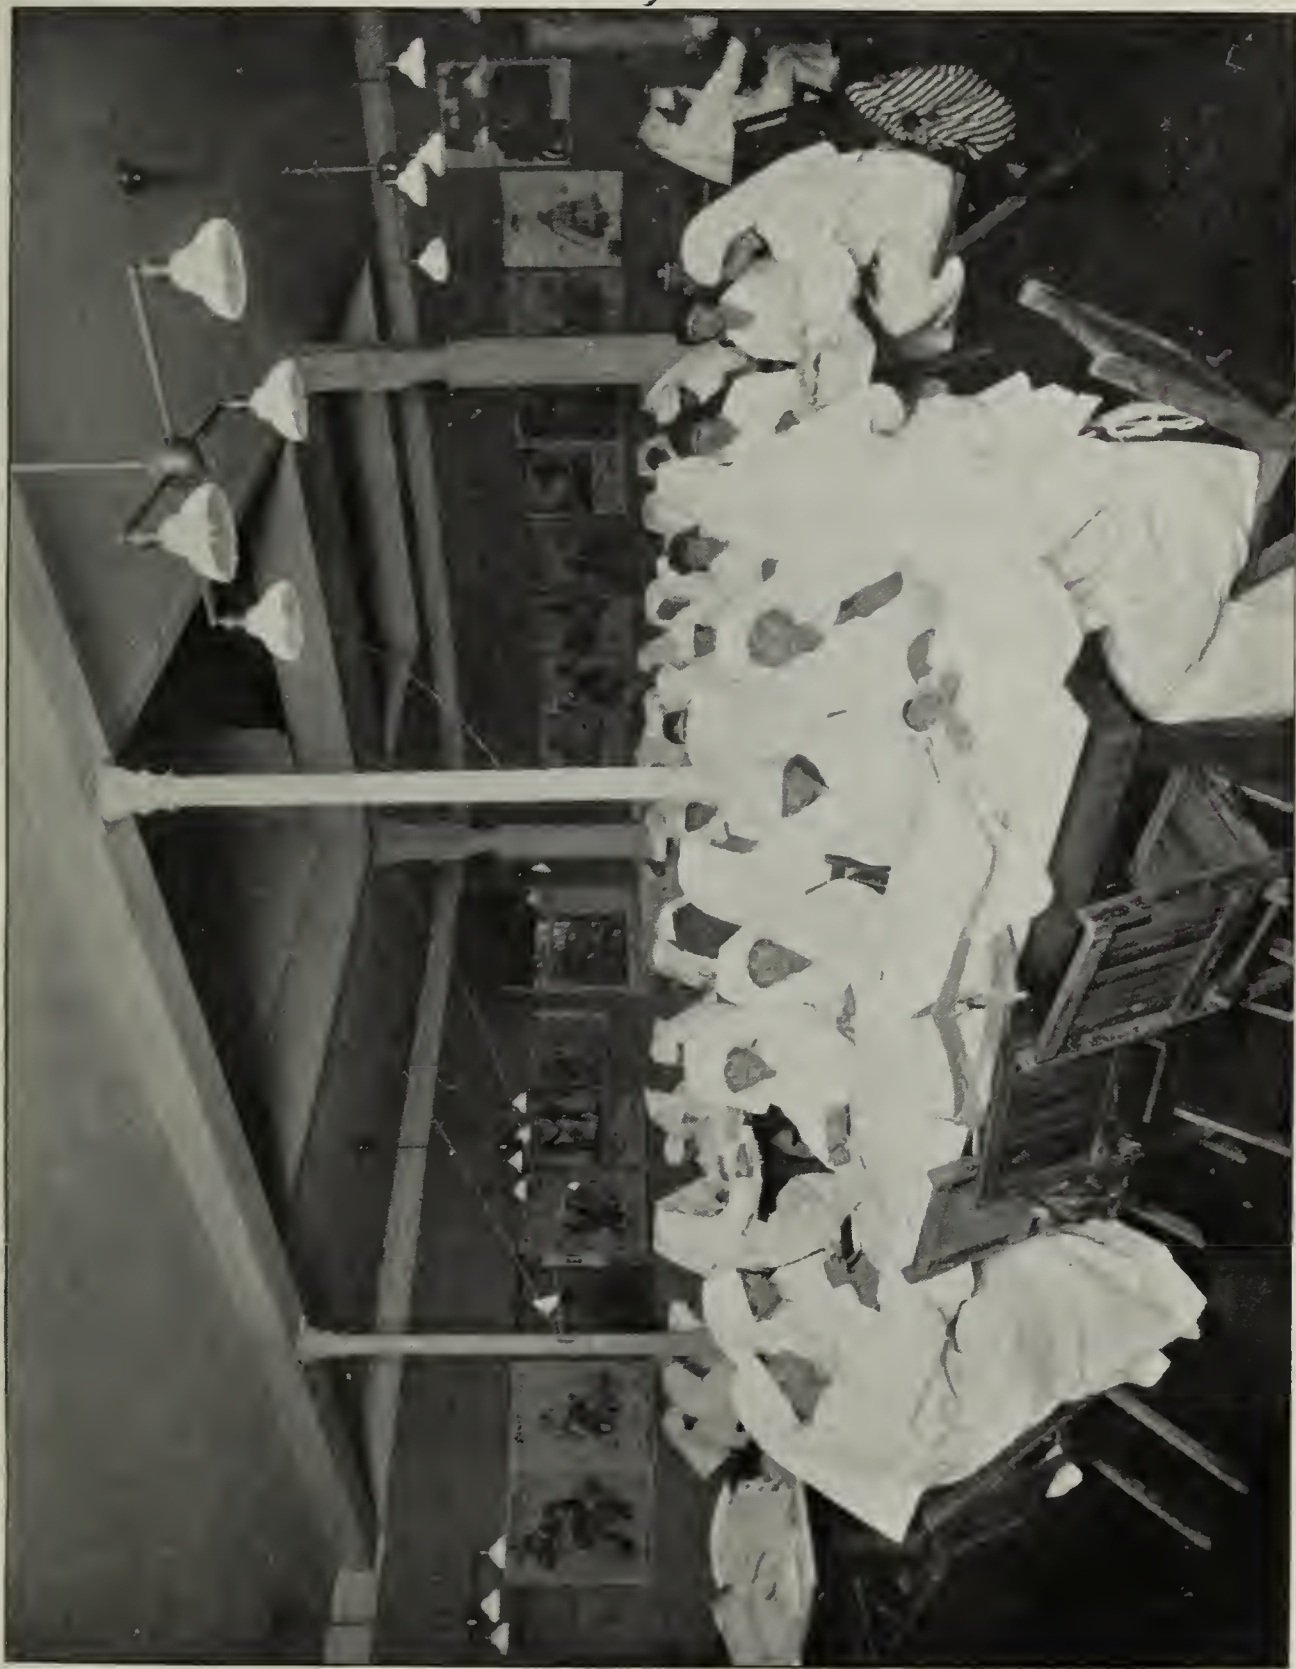

**The New York State League of Nursing Education.** The league held its meeting on October 17th, the day preceding the convention of the state association. Among the interesting papers presented which illustrate the character of the league, were the teaching of household economics in training schools, the teaching of nursing ethics, and scholastic requirements for nurses entering training schools.

**The State Board of Nurse Examiners.** The annual meeting of the State Board of Nurse Examiners was held in the State Education Building, Albany, October 20, 1916. Miss Lydia Anderson was elected president and Miss Jane Hitchcock secretary.

The following recommendations were made:

That the present Syllabus for the Guidance of Nurse Training Schools be revised.

That each registered nurse training school be required to submit for each graduate nurse at the time of her application for nurse registration a record of her theoretical and practical work and the standings for same while a pupil in training.

The Red Cross room at Vassar College constantly in use by students and faculty working in relays. Output of the first two months: 7776 compresses; 1734 bandages; 528 sponges, scrap-books and Christmas packages. Materials voluntarily subscribed.

That the membership of the board be increased to include additional members to more adequately cope with the ever increasing amount of work which each year is put upon it.

That the compensation of each member be increased to the amount originally allowed for such work.

*Legislation.* At their fourteenth annual convention, the New York State nurses voted to have presented to the Legislature of 1916 an amendment to the nurse practice act providing for the licensing of all schools of nursing and all the graduates of such schools by compulsory registration. After various conferences with representatives of the hospitals and the Regents it was decided to include in the text of the bill in the last part of section 254 the following clause: "There shall be an advisory council appointed annually by the Regents of The University of the State of New York which shall consist of the President of the Medical Society of the State of New York, a representative of the board of health of the city of New York, a representative of the State Department of Health, two representatives of the incorporated hospitals, one of such hospitals being in the city of New York, and five registered nurses, namely, the president of the New York State Nurses Association, the president of the New York State League for Nursing Education, a member of the faculty of a university or college giving advanced instruction in nursing, and two superintendents or principals of training schools for nurses. It shall be the duty of said council to advise the Regents as to the course to be pursued and the standard to be maintained in training schools for nurses and as to the rules for the examination of nurses applying for certification and from time to time to make such recommendations to the Regents as it shall deem proper for the better enforcement of this article. The said council shall meet from time to time upon the call of the Chancellor of the University or at the written request of any five members."

On February 22 the bill was introduced in the Senate by Senator Jones and on March 16th a circular letter outlining the object of the bill and signed by the president of the New York State Nurses Association and of the board of managers of Mt Sinai Hospital and vice presidents of St Luke's and the Presbyterian Hospitals, New York City, was sent throughout the State to hospital officers and trustees and persons likely to be interested in this legislation.

A joint hearing before the public health committee of the Senate and Assembly was held on March 23d in the Assembly chamber.

The opposition to the bill was voiced by Dr William D. Stillman of the National School of Certified Nurses, Albany, Mr Charles I. Tobin of Albany and Mr B. Germain Savage of Albany, while those who appeared in support of the bill included Dr John H. Finley, President of the University of the State of New York, Dr Augustus S. Downing, Assistant Commissioner for Higher Education, Miss Lillian Wald, Henry Street Settlement, Mr John B. Pine, vice president of St Luke's Hospital, New York City, Dr Linsley Williams, representing the State Department of Health, Doctor Hennington, secretary of the Medical Society of Monroe County, and Mrs Hugh R. Jack and Mrs Charles G. Stevenson, representing the New York State Nurses Association.

A very strong plea in favor of the bill was presented by Mr John B. Pine, who said in part:

Speaking as a hospital manager I feel that it is of the utmost importance that this bill should be passed for the efficiency of the hospitals and for the establishment of the nursing profession upon a proper professional basis. Of late years the trained nurse has become an element of the greatest importance in our community, as we all recognize, and the term "trained nurse" has come to have a very distinct and definite meaning.

The diploma which a graduate nurse receives from her hospital is equivalent to a degree which a man receives from his college or a doctor from his medical school, and it should be protected with as careful safeguards, in order that it may not become misleading.

The relation between the trained nurse and her patient is one of the utmost confidence, and is recognized by the law as a professional relation and it is necessary for the patient even more than the nurse that the title should be safeguarded.

That can be done by no possible way except by placing the whole matter under the control of the Regents, just as they have control of other classes of educational institutions.

The interests of the hospital and of the nurses I regard as identical. The school and the hospital are interdependent. One can not exist without the other, and the hospitals are rendering an enormous service not only to their own patients but to the public generally in training nurses. They must be protected in that work to carry it on effectively. We have sought in this bill to eliminate any feature which discriminates against any one. It can not be truthfully said to discriminate against the poor. Miss Wald has explained the relationship between the nurse and the poor. It is open to every one to employ any person as an attendant, and there can be no misunderstanding provided persons so employed do not represent themselves as graduate or trained nurses. During the last few years the term "trained attendant" has come into use quite generally in New York, not only in the school which Miss Wald mentioned, but in the Young Women's Christian Association it is applied to classes of young women who are taught

to know something about the care of the sick, and to minister to the comfort of the sick in ways which do not call for the exercise of professional skill or judgment. They are designated very properly "trained attendants," and that is a term which can be most safely and appropriately used in the case of just such women as attend Doctor Stillman's school. If they were described as trained attendants everybody would know what responsibility they might properly be asked to assume.

The suggestion that there should be a distinction between trained nurses of one grade and certified nurses of some other grade, and perhaps some other classification, seems to be wholly impracticable and likely to be confusing to the last degree. A man is either a graduate of a college or he is not a graduate of a college. He is either a doctor of medicine or he is not a doctor of medicine. A nurse either is or is not a trained nurse.

In conclusion Mr Pine presented a long list of hospitals and prominent persons who had indorsed the bill.

On April 10th the bill was reported in the Senate. On April 13th it was slightly amended and advanced to third reading, and on April 19th it passed the Senate by a vote of 28 to 17. The bill then went to the rules committee of the Assembly where it remained when the Legislature adjourned on April 20th.

*Inspector's report.* There are registered under the Regents 341 schools of nursing, 138 of which are located in New York State. Thirteen training schools for nurses have been registered during the past year, namely, Bushwick Hospital, Brooklyn; St Joseph's Hospital, Elmira; Olean Hospital, Olean; Physician's Hospital, Plattsburg; Clara Barton Hospital, Los Angeles, Cal.; State Hospital, Howard, R. I.; New Hampshire State Hospital, Concord, N. H.; Lawrence General Hospital, Lawrence, Mass.; Lynn Hospital, Lynn, Mass.; Burbank Hospital, Fitchburg, Mass.; Peter Bent Brigham Hospital, Boston, Mass.; Grant Hospital, Columbus, Ohio; Washington University, St Louis, Mo.

The registration of two schools has been rescinded, namely, Brooklyn Eastern District Hospital, Paterson General Hospital, Paterson, N. J.

*Inspections.* The inspector has made 174 visits to hospitals during the past year. Ten inspections were made in hospitals seeking the registration of their schools; 146 inspections were made in registered schools within the State; 5 in schools located without the State; 6 in schools accredited for receiving affiliations from registered schools; and 7 conferences held with training school committees. Two inspections were made in each of 5 registered schools, and 3 inspections in each of 6 registered schools.

Two conferences have been held with principals of evening high schools, one to consider prevocational courses for nurses and the other to protest against the course in "home nursing" which had wandered as far afield as the study of the "anatomy, physiology and pathology of the nervous system."

*Progress.* New residences for pupil nurses have been built by the Cohoes Hospital and by the German Hospital, New York City. Funds have been raised for the erection of new residences for pupil nurses at Mt Sinai Hospital, New York City, the F. F. Thompson Hospital of Canandaigua and the New Rochelle Hospital, New Rochelle.

Extensive improvements and additions to existing residences have been completed by the Homeopathic Hospital of Albany, the Hospital of the Good Shepherd of Syracuse, the Little Falls Hospital, Mary Immaculate Hospital of Jamaica, the Homeopathic Hospital of Buffalo, the Rochester General Hospital, the Williamsburg Hospital of Brooklyn, Corning Hospital and the Sisters of Charity Hospital of Buffalo.

More attention is being given to the health of pupils in training. During the past year one school has appointed a salaried physician who shall be responsible for the health of the pupils.

Student records have been improved and the card system is now in very general use in New York State. The annual reports submitted by the out-of-state nurse training schools that are registered with the State Department of Education as meeting our standards, give evidence that there is need for a system of nurse student records that shall be uniform throughout the United States and Canada. Many of these schools were registered before we had adopted in this State a uniform system of records for our own schools. It is interesting to note, however, that wherever there has been inspection, more uniform records have followed.

*Statistics.* Fifty-nine nurse training schools in New York State have affiliations with other nurse training schools or hospitals for clinical instruction to their pupils. Bloomingdale Hospital, White Plains, and St Lawrence State Hospital of Ogdensburg are offering affiliated and postgraduate courses in nursing of mental diseases. Mt Sinai Hospital has been in affiliation with Bloomingdale Hospital for such a course (elective) for the past two years. One other well-known nurse training school is contemplating an affiliation for mental nursing. One school (Bellevue, New York City) receives pupils by affiliation with thirty-nine other schools.

Fifty-eight nurse training schools in New York State changed principals during the current year. There are in training 1936 first year pupils, 1755 second year pupils, 1299 third year pupils, making a total of 4990 pupils in training, an increase of 370 over the preceding year; 1406 diplomas have been issued.

One school gives a three-year, three months' course; 89 schools give a three-year course; 37 give a two and one-half year's course; 7 give a two-year course. Six schools allow 4 weeks' vacation yearly for student nurses; 48 allow 3 weeks' vacation; 79 allow 2 weeks' vacation.

*Credentials.* Through the cooperation of the principals of the nurse training schools of this State over 2300 candidates have to date obtained from the State Department of Education nurse student certificates, approximately 1700 of this number having been issued during the current year. 3584 candidates for entrance to nurse training schools have submitted educational credentials to this Department for approval, as follows:

College graduates .....	49
60 to 120 counts.....	648
15 to 60 counts.....	759
15 counts .....	896
Equivalent .....	843
Not accepted .....	390
<hr/>	
Total .....	3584

From the above statistics it will be seen that 1456 candidates had educational qualifications in excess of the minimum requirement and that 1738 appear to have met only the minimum requirement. These statistics do not show, however, the fact that a very large number of the candidates who were accepted under the equivalent had covered academic work very much in excess of one year in high school, but as such work had not been conducted in approved secondary schools, academic credit could not be given for it. This group includes a very considerable number of high school graduates and students from private and commercial schools. It also includes a number of teachers.

In the year ending August 1915 approximately 2800 credentials were acted upon. This was an increase of over 600 over the preceding year. In the year ending August 1916, 3584 credentials were acted upon, a further increase of approximately 800. Therefore during the past year approximately 1400 more credentials have

been acted upon than were acted upon two years ago. We have on hand 723 cards for candidates who hold nurse student certificates but who have not entered nurse training schools up to date. The best schools are therefore making up classes from six months to one year in advance of entrance dates.

The foregoing statistics do not bear out the assertion made by some nurse training schools that there is a general shortage of educationally eligible candidates for nurse training. Without question there is a shortage of such candidates in some of the schools in the State but not in those schools which have become best known for their teaching facilities, whether such schools are in the small towns or large cities.

*Examinations.* There is a large group of schools in the State whose graduates practically never fail in securing certificates of registration. During the past year 56 schools sent up pupils for registration without having a single candidate fail. There is another group of schools whose pupils scarcely ever all pass in the examination. It would seem that if 56 schools in this State can successfully prepare their pupils when graduated to pass the state board examinations for nurse registration, the examinations must be reasonable and there is no reason why there should be from 25 to 100 per cent of failures from any school with proper teaching facilities. The large proportion of failures was confined to eleven schools.

*Examinations.* In 1915 there were 1283 candidates examined, of whom 1199 received certificates; 83 were rejected; 183 received honors and 93 were admitted under the waiver; in 1916 there were 1290 candidates examined of whom 1132 received certificates; 158 were rejected; 105 received honors and 91 were admitted under the waiver.

**Results of examinations, January-June 1916.** Examinations, 27 examined, 1290; rejected, 158; per cent rejected, 12.

**Librarianship**

That the influence of New York State in the development and fostering of the new professions through statute law, Regents rules and the registration of schools, finds illustration in the following quotation from the report of the chief librarian of the public library of Toronto for the year 1916.

One of the significant events of the year was the establishment of a provincial library training school for those who were in service in the province but who had not been trained for that service. This was planned by Mr W. O. Carson, the lately appointed inspector of public libraries for the province, and we helped him by granting the use of the lecture room of the Dovercourt branch for the sessions of the school and our branches for practice work. It was a great success from every standpoint and will develop no doubt into an established library school with a longer term. If this were done I would recommend that our board cooperate with the provincial government so that candidates for positions in our libraries would be accepted only after they had passed the examinations of this provincial school as well as our own examination.

**American Library Association.** The thirty-eighth annual meeting of this association was held at Asbury Park, N. J., June 26-July 1, 1916, First Vice President Walter L. Brown in the chair. The report of the committee on library training is of special interest from an educational standpoint. In addition to the work of examining the field of library training outside the regular library schools and examining of the schools that meet the minimum standard laid down by the committee in 1905-6, the committee further discussed the question whether the developments of the last ten years have made it necessary to modify or extend the minimum standard set down ten years ago. A suggestion made by the school of education of the University of Chicago that there was need of a survey on the field of library training led this committee to place in the hands of Dr Harold O. Rugg, the material collected by it.

“His work ought to give the committee much light upon the larger questions involved in such a study, particularly those of a strictly educational character as for example, What ought to be the curriculum of a library school? What pedagogical training and equipment ought to be required of teachers in library schools? What are the best methods of presentation in teaching library methods? and How far can actual practice in library work be made stimulating and effective as a means of training?”

It is proper to preserve in this record the action of the association in recognizing the survivors of the 1876 conference by reproducing the first of the telegrams which were addressed to Melvil Dewey and read as follows:

The American Library Association sends from this fortieth anniversary special greetings to that one of its founders whose indomitable courage, energy and persistence assured the early and permanent success of the association, and whose inventive genius in evolving the decimal classification and in initiating the library school has earned the worldwide recognition of the library profession.

**New York State Library Association.** The twenty-sixth meeting of this association was held at Richfield Springs, September 11, 1916. The most important feature of the meeting, which had a registration of over 250, was the school and library session—a meeting of teachers which librarians addressed. Each side inspired the other and the State Teachers Association is understood to have decided the course in inviting librarians to speak at its meetings of teachers.

**New York State Library School.** This institution is a teaching department of the University with college graduate rank and properly classified as a professional school.

By action of the Regents July 1, 1916, “all the degrees heretofore conferred by or in the name of, or for such schools be hereby confirmed and be deemed to have been and be duly conferred degrees of the State of New York.”

The list of graduates on whom the Regents conferred the degree of bachelor of library science through this division of the University is published under earlier caption entitled “Charters, degrees and licenses.” It reported for the year 1916, 17 members of the faculty; 12 instructors; and 39 others; regular student body was 43 (7 specials); and conferred 14 B.L.S. degrees.

**Summaries.** The number of students, instructors and other information concerning the library schools is given in table 1,

exhibit K. In 1915-16, there were 58 students pursuing regular courses in the New York State Library School, 25 in Pratt Institute School of Library Science, and 60 in the Syracuse University Library School. The number in the library school of the New York Public Library was not reported.

In 1915-16, 15 students received the degree of B.L.S. from the State Library School, 18 the degree of B.L.E. from Syracuse University.

In 1915-16, there were 12 (not including 36 lecturers and 5 other assistants) in the faculty of the State Library School, 8 full professors in Pratt, 1 professor and 6 instructors and 8 tutors in Syracuse University Library School.

In comparison with 1915, the library schools of the State show for 1916, 9 more students in the State Library School, 2 more in Pratt Institute School of Library Science and 5 less in the Syracuse University Library School.

In comparison with the same year, the library schools of the State show 5 less students received the degree of B.L.S. from the State Library School and 9 more the degree of B.L.E. from Syracuse University.

As the number of instructors were not reported in 1914-15, it is impossible to institute comparisons between that year and this.

### Accountancy

An event of great importance to accountancy occurred during the year, namely, the complete melding of the "Institute of Accountants in the United States of America" and the "American Association of Public Accountants."

**Introductory note.** In the preparation of the first year-book of the Institute of Accountants in the United States of America and what will probably be the last year-book of the American Association of Public Accountants, the executive committee has thought best to present the minutes of the meetings of the two organizations in chronological order. There has been the usual condensation of proceedings and omission of argument in the compilation of the record.

It has been deemed wise to reduce the number of pages in the book wherever possible, and accordingly the executive committee has authorized the omission of all speeches at the banquet and a considerable reduction in the length of the reports of state societies by the excision of everything except important facts.

During the year ended August 31, 1916, one new state law providing for the issuance of certificates to public accountants was enacted. This brings the number of state laws to forty. The text of all these laws appears in an appendix of this volume.

By the transference of membership from the American Association to the Institute of Accountants, the relation of each member to the institute becomes direct, and accordingly the only list of members now published is in alphabetical order.

**American Association of Public Accountants.** The twenty-ninth annual meeting of this association was held in New York September 19-20, 1916, President J. Porter Joplin in the chair.

The report of the committee on education is of interest. It includes a tabular report by Waldron H. Rand, chairman of the committee, giving in detail data from the departments of commerce and accounts in the American universities and colleges.

**New York State Society of Certified Public Accountants.** The proceedings of the annual meeting of this society has not appeared in any publication accessible at the date of this report.

**State Board of Examiners.** This board had at least 20 regular meetings during the year, at which 131 papers were reviewed in addition to those originally examined. Forty-three applications for certificates were considered and reports were made to the Department on a number of other questions concerning accountancy and reciprocity. Ten question papers were prepared for use during the year, two in each of the following subjects: auditing, commercial law, theory of accounts, practical accountancy—part 1, and practical accountancy—part 2.

The members of the board, in addition to the examination of papers give attention to the accounting experience of each applicant who passes the examinations after determining whether the Regents requirements are met, namely five years of experience, two of which were in the office of a certified public accountant. The board also passes on questions and answers of candidates from other states who desire certificates under the reciprocity clause.

**School of Commerce, Accounts and Finance.** This faculty of New York University was established in 1900 to meet the widespread demand for scientific preparation and training for business careers. The courses have two objects in view—to add to the knowledge of the students as to business operations, and to train men to think clearly about business problems.

For the year 1914-15, it reported 74 instructors, 2711 students and conferred the degree of B.C.S. on 198 candidates; for 1915-16, it reported 96 instructors, 3138 students and conferred the degree of B.C.S. on 242 candidates.

*Columbia University* in 1916, established a school of business. The record of the first year will appear in the next report.

#### Certified Shorthand Reporting

Attention was called in the last report to the development of this form of reporting and the possibility of its becoming a profession.

**National Shorthand Reporters Association.** The eighteenth annual convention of this organization was held in Philadelphia, Pa., August 14, 1916. The ideals of the association are portrayed in the speech of the chairman of the standardization committee when presenting the general report. This association "stands or should stand, for the development among its members of that which is highest and best in our profession. Its constitution declares as among its objects not only the securing of the benefits resulting

from organized effort, the recognition and promotion of professional ethics, the preservation and publication of historical data relating to the stenographic art, the enlightenment of the public as to the possibilities and limitations of shorthand and the promotion and maintenance of proper stenographic laws and proper compensation, but also the maintenance of a proper standard of efficiency. . . . In certain lines, one of fine intelligence and comprehension, with only a moderate rate of shorthand speed, may do quite satisfactory work, but in other lines there must not only be intelligence and comprehension but there must also be the highest possible skill in shorthand writing or the work will not measure up to the usual requirements. Words, clauses and sentences omitted from a report may be as fatal as words actually mistranscribed."

**New York State Stenographers Association.** The forty-first annual meeting of this association was held in New York City, December 27, 1916, President Peter J. Laughlin in the chair. Regarding legislation, he says "The last year has been no exception to the rule, and the report of your legislative committee will confirm my statement that no fewer than twenty-five bills were introduced in the Legislature either directly or indirectly inimical to the prosperity of our members."

Regarding certified shorthand reporting examinations, the president raised the question whether the educational standard of the State was not too high. "This association has from the inception of the law maintained that there should be a less rigid exactness in the educational requisite than the standard adopted by the Board of Regents and, notwithstanding our protests, we are confronted today with a rule which is even more oppressive to applicants than that which was adopted at the outset. Is it not advisable that we place ourselves upon record and call to the attention of the Department of Education the hardship that such a condition will work to many worthy and capable applicants who, while possessed of the skill and ability to report with accuracy, may fall short of the technical preliminary requirements?"

**State Board of Certified Shorthand Reporters.** The board of examiners for certified shorthand reporters met at New York, June 27, 1916. All the members were present at each meeting. The meetings were called for the purpose of examining candidates for certificates. Five candidates were examined in January, 3 of whom passed, and 2 candidates were examined in June, both of whom passed.

### Registered Architects

The report of last year gave in full the new law affecting the registration of architects in the State of New York, which is article 7A, chapter 454 of the Laws of 1915.

**State Board of Examiners.** The five members of the state board referred to in the act as the board of examiners were appointed by the Regents and held their first meeting for organization October 22, 1915. From October 22, 1915 to October 19, 1916 inclusive, the board held thirty-two meetings, six of which were in New York and twenty-six in Albany. The work of the board during its first ten meetings was devoted chiefly to the preparation of forms of applications for registration; form and design of certificate to be issued to the registered architects; the preparation of rules proposed for the government of the work of the board, and the consideration of requirements for examinations.

At the meeting of March 15, 1916, the board commenced its work of examining and reporting upon applications for registration. Up to and including the meeting of October 19th, the board has approved applications for registration of 1043 architects, and has recommended that certificates should not be granted without examination to 343 applicants.

Each application was carefully examined and in most cases letters of inquiry were sent to his sponsor and drawings called for, and in many instances special investigations of applicant's claims were made. The various form letters used in the correspondence are on file in the Department of Education. Thus far only one or two applications have been received for registration by examination. About 1900 applications were received for certificates without examination; hence there remain about 600 applications for certificates without examinations to receive final consideration by the board.

Handbook 35 entitled "Architecture" is in process of preparation.

The courses in architecture, as offered in American universities compiled by Secretary Clarence A. Martin, are printed in full for preservation and future reference.

COURSES IN ARCHITECTURE AS OFFERED IN AMERICAN UNIVERSITIES													EXPLANATION	
The figures given in columns A to H show the percentage of time apportioned to the several groups of studies. The figures are, however, presented at this time for study and correction, rather than as conclusions and they should be so considered. In particular, and this will be true in the final analysis as well, columns G and H signify little in comparative study, because these two groups are inseparable from entrance requirements which vary in the different schools. A low figure in G or H may be the result of a higher entrance requirement rather than the indication of a low standard in the curriculum.														
Before this work can be really significant it must be checked carefully by the schools represented and must include a full statement of the entrance requirements for each school.

### Technical and Other Schools

The attempt to outline adequately the material for a report under this caption resembles those so often found in the transactions of associations — “the committee rises and reports progress with a request that it be permitted to report in full at a coming session.”

**Higher technical schools of New York State.** The higher institutions classified as technical schools by the Regents include the technical and other higher institutions that may maintain courses in civil engineering, art, journalism, music, agriculture and forestry.

**Summary.** In 1916 there were 3320 students in attendance on the schools of engineering and technology of the State; 1391 in the schools of art; 2276 in the schools of music; 2216 in the schools of agriculture.

#### *Civil Engineering*

The voluminous reports of the American Society of Civil Engineers abound in interesting material, not only for the profession, but also for the general public.

**American Society of Civil Engineers.** The forty-eighth annual convention of this society was held in Pittsburgh, Pa., June 27-30, 1916. The chairman of the special committee on engineering education reported progress but was “not ready yet to make a final report.” He said that the Carnegie Foundation was now making a careful investigation in connection with his committee and has reached “an important advance in the solution of this wide reaching question.” A short statement of the important advance referred to was reported as “a definite formulation of the main problem.” The extent of the problem involved was set forth in the opening remarks. “If the committee on roads and pavements has been unable, after six years of work, to submit satisfactory specifications as to how to build so simple a thing as an ordinary highway, is it reasonable to expect the committee on education to submit, after seven years of work, satisfactory specifications as to how to build so intricate a thing as the royal road to learning?”

“If you engineers will give the schools a clearer definition of what the engineer is, the schoolmen will know how to use it in strengthening the school. We thus ask you engineers simply to tell us what the product should be and not how the school should be conducted to secure that product. If you will define the product for the schools, the schoolmen will prove competent to produce it.”

**Summaries.** In 1916, there were 1078 students in attendance

on the schools of civil engineering of the State, distributed among the several higher institutions as follows: Columbia, 75; Cornell, 450; New York University, 166; Polytechnic Institute, Brooklyn, 60; Rensselaer Polytechnic Institute, 236; Syracuse University, 91.

### *Electrical Engineering*

Mr C. le Maistre, general secretary of the International Electrotechnical Commission, arrived in New York on May 12th as a delegate of the National Standards Committee of Great Britain. Two meetings of the Standards Committee of the institute were held on June 16th and dinner was given at the Engineers Club, New York, in his honor by the officers and past presidents of the institute. Matters relating to standardization and to other subjects concerning the welfare and diplomas of the engineering profession were discussed. He arranged his stay in America, so as to prolong it sufficiently to attend the annual convention of the institute.

**American Institute of Electrical Engineers.** The thirty-third annual convention of the institute was held at Cleveland, Ohio, June 27-30, 1916. The Cleveland convention will be remembered as one of the most successful of the institute's annual conventions, both from technical and social standards. The president's address had for its subject "The Relation of Pure Science to Industrial Research."

Mr Le Maistre, general secretary of the International Electrotechnical Commission, read a paper entitled "Standardization," in which he outlined the development of engineering standards of Great Britain and the need of international standards and of some agreement in nomenclature and symbols for interpreting specifications offered by one country to another.

**Summaries.** In 1916 there were 61 students in attendance at Columbia and 17 degrees conferred; 47 at Polytechnic Institute, Brooklyn, and 6 degrees conferred; 141 at Rensselaer Polytechnic Institute and 18 degrees conferred; 101 at Syracuse University and 14 degrees conferred.

### *Mechanical Engineering*

Reference is made to the investigation of the engineering schools by the Carnegie Foundation.

From the presidential address of Dr D. S. Jacobs, it appears that a list has been prepared by the Foundation enumerating the essential factors desirable in young engineers, which follows in the order of importance: (1) Character, integrity, responsibility,

# POLYTECHNIC INSTITUTE

OF BROOKLYN, NEW YORK.

WAR SERVICE

## COURSES OF STUDY

## DEPARTMENT OF CHEMISTRY

General Chemistry { war application  
post-war competition

## Dye-stuff Intermediates

## Oxidation Products of Petroleum

## DEPARTMENT OF CIVIL ENGINEERING

Surveying including { Astronomy

## Sewerage and Sanitary Design --- Camp Sanitation

Bridge Design { Rapid Bridge Erection  
Temporary Bridges

## DEPARTMENT OF ELECTRICAL ENGINEERING

# Radio Communication

## Electrochemical Industries

## DEPARTMENT OF MECHANICAL ENGINEERING

Mechanical Laboratory } application to military  
Gas Power } and naval service

Works Engineering { Gun manufacture  
Munition Plants

SPECIAL WAR-SERVICE COURSE

Marine Engineering { Design of Marine Engines  
" " Auxiliaries  
" " Boilers

Naval Architecture { Ship calculation  
Plans  
Construction

## STUDENTS AND FACULTY ESTABLISHED IN WAR SERVICE

### Twenty Per cent of 1916-1917 Student Enrollment

### Ten Per cent of Faculty

resourcefulness, initiative. (2) Judgment, common sense, scientific attitude, perspective. (3) Efficiency, thoroughness, accuracy, industry. (4) Understanding of men, executive ability. (5) Knowledge of the fundamentals of engineering science. (6) Technic of practice and of business.

The president's address entitled "Education in Engineering," based on an experience as "a teacher of engineering subjects for over twenty years and having for over ten years since that time been employed in what some are pleased to call the practical side of the engineering profession as distinguished from the teaching side" is well worthy of consideration by all who are interested in this report, as evidence of which the following selections are adduced:

Mr Coxe was a firm believer that there is a "something" required in the making of an engineer which can not be gaged by an ordinary examination, and I remember well that he told me he employed some highly paid men who did not know an "integral sign from a dollar mark, and that he knew of others classed as the best of graduates he would rather pay high salaries to keep out of, than in, his organization. What is the "something"? What is it that the old-time superintendent has in mind as he shakes his head sadly when asked how some young graduate is progressing? The lad may have character, judgment, and perhaps everything in the Carnegie list, or at least he may think he has, and yet our old-time friend, often from the land of the heather, knows there is something lacking. And we ask again, what is this "something"?

Would that I could define the "something". It includes such qualities as

Taking a personal interest in one's work

Amenability to discipline

Perseverance under adverse circumstances

Cheerfulness and amity — the human side

None of these appear separately in the Carnegie list.

Let us analyze these qualities. It will be seen that possibly a lad from a grammar school would be as likely to possess them as the college man. If this is so then there is a lack in this side of the college training and it is here that we should improve. Consider the first, "Taking an interest in one's work." In this the college man often fails. I have known of cases where on being censured for lack of accuracy the college man said that he could not take enough interest in the work as it was not up to his capabilities and could be done by any office boy; and often a bright office boy would pass him. The young man to succeed must take such an interest in his work that he will take pride in doing it in the very best way, be it what it may. He should be determined to hang on until the finish. The man who has an engagement that calls him away when he is asked to help in an emergency, seldom wins. The practical foreman will often keep the young college man he is trying out on monotonous work to determine his staying powers. Industry is given as an essential in the Carnegie list, but

the determination and staying powers that count for success include more than simply industry. The man must be more than industrious; he must not only work hard and continuously but be so interested in his work that he feels a personal responsibility in it. Further the "industry" should be of the sort that is not governed by the clock but which calls for many nights of labor, either in home study or in the field. Success is the fruit of hard labor achieved through the building up of many things into a grand and harmonious whole. The Good Book speaks of time-servers and those who work from the heart; there is no better criterion than this to distinguish between one who will fail and one who should succeed.

The second is "amenability to discipline." There is a lesser importance assigned to this than there should be in other as well as in teaching lines. The old-time preceptor with his hickory rod or stout ruler was but carrying out the home discipline where the word *obey* carried its full force. Perhaps the wave will change to bring back the good features of the old *régime* — let us hope so. We certainly can and are doing much in our colleges to teach respect for authority and obedience to rules, but we should do more; let us not overlook this most important part of an engineer's equipment, and emphasize the importance of his being governed by these principles in the field. . . .

We hear and read much respecting teaching methods. Methods are not all; the spirit which unconsciously develops is a most vital factor. I can not fail to observe that there has been a great change in one respect since I was a boy. In my school days a failure to acquire a subject was laid to the student; now there is a tendency to lay it to the teacher. Much of this is due to the attitude of the parents. A fond mother once told me she thought it strange that no teacher could be found capable of teaching her boy mathematics, not realizing that she herself might be the greatest stumbling block through transmitting the idea that the fault lay anywhere else than with her son. A way never has been and never will be found to acquire knowledge without study, and much of the trouble experienced by some students arises through a lack of study or a failure to appreciate the fact that the fault is their own.

As far as can be determined from statistics the average age of graduation from college has not changed appreciably during the past century, being somewhat over twenty-two and a half years. It would therefore seem that irrespective of what is taught, there are elements entering a college course which have led to men graduating at about this age. I believe it advisable to have a four-year college course, but I would make the entrance requirements and the course such that the students would be graduated at as early an age as has been and is the current practice.

I have taken the stand and firmly believe that our present entrance requirements do not accurately gage the ability of an applicant, and that it is a mistake to make the entrance requirements too high for an engineering college. High technical requirements may result in the preparatory schools specializing along narrow lines in an endeavor to have the student enter college at an early age, to the sacrifice of a broader education. Again, high technical requirements discourage those who have worked in machine shops and the like and later on desire to enter a college. I have watched and encouraged such men and appreciate how hard it is for them to bring their

minds back to the different studies; still, once these men get the right hold, they make the best of students and later the best of engineers. Where I have expressed this view the question has been asked, "How can we select men for the colleges if we do not rely on examinations, and how can we secure as good men with lower requirements as with higher requirements?" My reply has been that, in addition to the examinations each and every applicant should be met by a board, and all of the circumstances connected with his case considered. Further, the examinations should be given in a way that will bring out the reasoning powers of the students, which can be accomplished if each man is given an oral examination of some length. Here again we have the harder against the easier way, but I am firmly of the opinion that there is no easy way of doing good teaching.

As to education in general, we all agree that our sons should be trained along well-balanced courses. The shop foreman who received only a grammar school education will send his son to college, for he knows what it means to be handicapped through lack of training, and how hard it is to make up for that lack of training by studying at nights later in life after long working days; as study he must to keep in the race with the college-trained man. In many instances where I have worked long enough with the men at a plant to really know them, it has been touching to find how many, especially the older ones, appreciate the fact that they have lost their opportunities. Many a time such men have come to me and said that I should make it my duty to warn young men to get an education. Yet many of these men had all the qualifications in the Carnegie list except the two items which those discussing the list have classed as the least important. One does not have to turn to the successful man to find character; many a man who has missed his chance has noble qualities and is a prince at heart. We should not therefore belittle these two items, even though we agree on the importance of those that precede them, for their lack has led many a man to failure.

Space permits these illustrations only, but the summarization of the speaker is given in its entirety.

1 That there be a closer cooperation between the engineering colleges and those employing graduates, and that the engineering societies be encouraged to work along this line.

2 That the technical requirements for entrance to colleges be lowered rather than raised, that preparatory schools be encouraged to give more attention to teaching good English and to giving a broad general education, and that applicants be also judged as to their initiative and general make-up in deciding whether they should be admitted.

3 That the courses be so arranged as to train the initiative and develop the human side; that the students be taught to work in a cheerful and efficient way; that there be proper time for daily relaxation of the mind and that the students be encouraged to use this time to the best advantage.

4 That the professors get down to hard work with their students and know all of them well enough to be thoroughly acquainted with their personal characteristics.

5 That the professors in practical engineering subjects have practical experience so that they can speak with authority.

6 That professors in charge of practical engineering departments be encouraged to undertake practical engineering work, and that their college work be so arranged that they can be relieved from meeting classes when the engineering work makes this necessary.

7 That special attention be given to teaching the fundamentals of engineering science, even though this may result in the elimination of certain specialized branches.

8 That greater practice be given in the writing of concise and logical reports in good English, and in speaking on one's feet.

9 That the students be encouraged to confer with the professors, and that regular hours be provided for this purpose, all to the end that the teachers may extend a helping hand where needed and that there be a mutual understanding and trust.

**National Association.** The thirty-seventh annual meeting of this society was held December 5-8, 1918 in New York. Its outstanding feature was the large attendance, the total of which exceeded that of the previous year by 431. There were delegates from most of the local sections, 16 of the 20 being represented in this meeting.

**Summaries.** In 1916 there were 1307 students in attendance on the schools of mechanical engineering in the State distributed among the several higher institutions, as follows: Columbia 53; Cornell 942; New York University 79; Polytechnic Institute, Brooklyn, 38; Rensselaer Polytechnic 126; Syracuse 69.

### *Mining Engineering*

This branch of engineering was grouped with mechanical in the last report with a view to development of the record later. During the year under revision, the reports of the annual meeting neither for the United States nor for New York State, have appeared in print in the files of this Department or of the State Library.

**Summaries.** In 1916 there were 54 students in attendance on Columbia College of Mining Engineering.

### *Stationary Engineering*

No report of the thirty-fourth annual convention of the National Association of Stationary Engineers or of the twenty-first annual convention of the New York State Association reached this Department or the State Library before this report went to press.

**Summaries.** In 1916 the students in attendance on the schools of stationary engineering in the State were not reported.

### *Schools of Art and Journalism*

As already intimated, this portion of the report necessarily partakes of the nature of a report of progress. An earnest effort has been made to obtain an accurate report from all institutions incorporated by the Regents and by the Legislature and through general laws with a view to their preservation in permanent form.

**Schools of art.** There are three institutions of higher education classed under this caption now in active operation in the State.

**Summaries.** In 1916 there were 1731 students in attendance on the schools of art in the State distributed among the several higher institutions as follows: Cooper Union Art School for Woman 340; New York School of Applied Design 404; Syracuse University 987.

**Schools of journalism.** The annual conference of the Association of the American Teachers of Journalism has not appeared in report form that has reached the Department or the State Library at the date of this report. The next annual report should bring this matter down to date.

**Summaries.** In 1916 there were 144 students in attendance on the School of Journalism in Columbia University.

### *Schools of Music*

Progress is reported in the development of music in the schools of the State and discussions in progress that are leading to wider recognition of this branch of the fine arts.

**National Association.** The thirty-eighth annual meeting of the Music Teachers National Association was held in New York City December 27-29, 1916. The high quality of the two preceding meetings was fully maintained, the enthusiasm of those in attendance was perhaps greater. The enrolment of full members was larger than at any year since the organization in 1906, and also the number of persons actually present at the session. Twenty-five states were represented in the attendance. The following is illustrative of

president Erb's address: "The thought which is beneath all of these remarks, namely, that the musical profession is too much concerned with its own affairs to get the point of view of the world at large or to do its share of the world's work, and the musician in the community, who is not also of the community, is by that sign an outsider."

A live topic was presented in the paper entitled "The Value of Examinations." "Some contend that the passing of examinations does not prove practical or useful mastery of any subject. Some pin their faith in examinations, on the ground that few subjects would be thoroughly studied, were it not for the tests that must be passed. But when the work of a professional musician is analysed, does not the analysis prove that he is continually being examined as to his fitness for work, either as a performer or teacher?"

Another important educational question was treated in the paper entitled "Questions of Standards in Music Teaching." "If we wish to standardize the music-teaching profession by determining what the norm or type of teaching excellence shall be, especially if we fix this by means of legislative action, we find ourselves in a very different attitude as to the significance of the standard, that the thing is true to what it pretends to be or the best, the norm. . . . Finally, there is a third way of determining standards. It is largely based upon the second, but differs in this respect, that the standard is not offered to the public to choose or reject but is made mandatory by legislation. This limiting of the freedom of the individual and society brings about a condition which must be seriously considered when we wish to apply such a method to the standardization of music teachers. . . . The three fundamental objections to the establishment of standards of legislative enactment especially where this would be dependent upon an examination in music teaching are (1) the dislike of the American to a limitation of his freedom; (2) the difficulty of procuring adequate judgments free from suspicion; (3) the difficulty of determining by examination the characteristic excellence that belongs to the teacher.

**State association.** The proceedings of the twenty-eighth annual convention of the New York State Music Teachers Association is not available at the date this report goes to press.

**Summaries.** In 1916 there were 2276 students in attendance on the schools of music in the State distributed among the several higher institutions, as follows: Cortland Conservatory of Music,

259; Grand Conservatory of Music, 71; Institute of Musical Art, 607; Ithaca Conservatory of Music, 535; Metropolitan College of Music, 313; New York College of Music, 491.

### *Agriculture*

Again report of progress only is possible.

**State association.** The seventy-sixth annual convention of the New York State Agricultural Society met in the State Capitol at Albany, January 18-19, 1916, President John J. Dillon in the chair, who called attention to the fact "that we are on the home stretch of the century in opening the seventy-sixth annual convention, all meetings of which have been held in the city of Albany."

"Agricultural Education in the High Schools and in the Schools of the State" was discussed in the final paper by Layton S. Hawkins, Director of the Division of Agriculture and Industrial Education of the State of New York, which was illustrated by views of the work of students in the schools of the State.

**Summaries.** In 1916 there were 2216 students in attendance on the schools of agriculture in the State distributed among the several higher institutions, as follows: New York State School of Agriculture, Alfred University, 207; New York State College of Agriculture, Cornell University, 1704; New York State School of Agriculture, St Lawrence University, 162; College of Agriculture, Syracuse University, 143.

**Forestry.** No report of the thirty-fifth annual meeting of the American Forestry Association is available as this report goes to press.

**State association.** The same report of progress as made for the American association is made on the 1916 meeting of the state association.

**Summaries.** In 1916 there were 297 students in attendance on the New York State College of Forestry, Syracuse University.

## Summary

### Statement a

Number of school districts in State, not including cities..	10 324
Number of districts that maintained school and had libraries.....	10 078
Number of districts that neither maintained school nor had libraries.....	229
Number of districts that maintained school and had no libraries.....	17
	<hr/>
Total.....	10 324

Of the 17 districts that maintained school and had no libraries 1 was newly organized, 1 was rebuilding, 2 were very poor, and 11 had lost their libraries by fire.

### Statement b

453	districts	had	fewer	than	50	books	each	
2 033	districts	had	as	many	as	50	books	each, and fewer than 100
4 909	"	"	"		100	"	"	200
1 947	"	"	"		200	"	"	500
344	"	"	"		500	"	"	1 000
392	districts	had	more	than	1000	books	each.	

### Statement c

Number of districts that had school libraries each containing	
1 book or more.....	10 078
50 books or more.....	9 625
100 " " " .....	7 592
200 " " " .....	2 683
500 " " " .....	736
1 000 " " " .....	392

## EXHIBIT L

## EXHIBIT L

### LICENSES

Tables showing physicians, chiropodists, dentists, veterinarians, pharmacists, druggists, optometrists, accountants, certified shorthand reporters and nurses licensed.

[973]

## LICENSES

Under the heading "Professional education" the number of years of the professional course required by statute at the date of the candidate's matriculation is given, with the date of his degree from the professional school. The method of licensing the candidate is given under the heading "Examinations," figures indicating the number of trials; (Ex) the full examination; (Px) partial; (Fx) final. The column headed "Month" gives the month in which the candidate was examined: Ja., January; F, February; M, May; Je, June; S, September; O, October. An average of the standings attained in all subjects taken is given under the letters F, failed; P, passed. No applicant passes the examination whose standing falls below 75 per cent, except nurses, pharmacists and druggists.

September 1, 1891, the medical statute required all physicians to be licensed by the Regents unless previously registered and legally authorized, and subsequent statutes exacted the same of dentists and veterinarians. There are six methods of admission to medical practice in the State, arising from the advancing requirements of the medical practice act: (1) license on examination, Ex; (2) by indorsement of license, IL, followed by the abbreviation of the state registered (applicants examined and licensed by other state boards registered by the Regents as maintaining standards not lower than those provided by the statute); (3) by indorsement for eminence and authority, EA (the Commissioner, on approval of the Regents, may indorse a license or diploma of a physician who has reached a position of conceded eminence and authority in his profession); (4) by indorsement of diploma, ID (applicants who matriculated in a New York State medical school before June 5, 1890 and who received the degree from a registered medical school before August 1, 1895); (5) on recommendation of the State Board of Medical Examiners, Rec (to make valid imperfect registrations); (6) indorsement of a certificate, Ct (for registry in another county if such certificate clearly shows that the original registration was of an authority issued under seal by the Regents, or if such certificate itself was indorsed by the Regents).

There are five methods of admission to dental practice in the State, arising from the advancing requirements of the dental practice act: (1) license on examination, Ex; (2) by indorsement of license, IL, followed by the abbreviation of the state registered (applicants examined and licensed by other state boards registered by the Regents as maintaining standards not lower than those provided by the statute. In October 1909 the Regents rescinded the only agreements to indorse licenses under this provision of the statute, viz, Pennsylvania and New Jersey); (3) by indorsement on the recommendation of the board after an oral examination, RP (the Regents indorse the diploma of a graduate from a registered school if the graduate has been in lawful practice for six years next preceding his application, provided his preliminary and professional education met the New York statutory requirements); (4) on certificate of study, CS (the Regents may issue a license to an applicant who has passed the written examination before the board). No new cases can arise under this provision, which expired by limitation January 1, 1904, and the record is preserved for reference

to former reports; (5) indorsement of a certificate, Ct (for registry in another county if such certificate clearly shows that the original registration was of an authority issued under seal by the Regents or if the certificate is indorsed by the Regents as entitled to registration).

There are five methods of admission to practise veterinary medicine in the State, arising from the advancing requirements of the statute affecting the practice of veterinary medicine and surgery: (1) license on examination, Ex; (2) by indorsement of license, IL, followed by the abbreviation of the state registered (applicants examined and licensed by other state boards registered by the Regents as maintaining standards not lower than those provided by the statute); (3) by indorsement of diploma, ID (applicants that matriculated in a New York State veterinary medical school before July 1, 1896, and that received the veterinary degree from a registered veterinary medical school before July 1, 1897); (4) on recommendation of the State Board of Veterinary Medical Examiners, Rec (to make valid imperfect registration); (5) indorsement of a certificate, Ct (for registry in another county if such certificate clearly shows that the original registration was of an authority issued under seal by the Regents or if such certificate itself is indorsed by the Regents as entitled to registration).

Tabular information regarding the certificates to practise optometry has been rearranged to conform, so far as practicable, with the facts given in the other tables. These tables have been brought forward into the order required by the organization of professional schools. The tabular matter regarding certified public accountants has also been recast and placed before the statistics regarding registered nurses, for the same reason.

Record of medical licensing examinations and indorsement of credentials,  
August 1, 1915–July 31, 1916
